#### Notes of the Week.

March 29th, 1898.

Brazliian Finance. "It was hoped", says the London Economist of the 12th of March "that with the advent to power of Dr. Campos Salles, the new President, financial affairs in Brazil would improve. So far, however, from that hope being realised, matters have since gone from bad to worse, and it is now a question whether national bankruptey can be avoided. The fall in the exchange to 6 3/8 d. per mil reis adds very heavily to the amount which must be provided for the service of the foreign debt, and, although it is understood that the payments to be made in April have been provided for, such a drain as is now being experienced cannot be aorne for long. No wonder, then, that "Brazilians" have follen heavily'

The Economist is mistaken as regards the advent to power of Dr. Campos Salles, he has been elected but will not take over the government until the close of the current period, in November next: nor is it less mistaken in imagining that Dr. Campos Salles, or anyone else can improve exchange so long as the economical situation remain as it is. The depreciation of exchange during the last two years is the almost exclusive effect of the fall of coffee, that has disorganized our whole economy and turned the balance of paynents unquestionably against the Country. It is not disputed that the initial depreciation originated in excessive and imprudent emissions, but their effect has been discounted long since, and the fall from 10 pence in 1896 cannot be attributed to this cause, but exclusively to the fall of coffee. We refer the Economist to our editorial in this issue, and look to it and the other important financial organs of the city to put the matter fairly before the public that it may decide whether the moment has not arrived to offer some spontaneons assistance to a country that has struggled so long and gallantly against overwhelming odds.

The Boat race. A meagre telegram dated 26th instinforms us that Oxford again won the beat race, bringing up the record to 32 for Oxford against 22 for Cambridge.

The most prominent event of the week has been the return of political exiles from Fernando de Noronha on Saturday last. Their petition for haleas corpus was immediately submitted to the judgment of the Supreme Court, which decided, however, that it was incompetent, and that it rests, in this case, with the Legislature which granted the extraordinary powers to the Government under which their imprisonment was effected. We express no opinion as to the justness of the decision. It is a technical point that only lawyers are competent to decide, but trust that the prisoners, whether guilty or no, will be granted the right common to all of an immediate trial by their peers, which the constitution and justice equally guarantee.

We have no sympathy with this system of taking men and locking them up indefinitely without a trial. If they are guilty, let it be proved at once, and if that cannot be

done, let them loose.

The prospect of the return of these political prisoners created a good deal of commotion in certain circles, the troops and marine being all held in readiness as if some disturbance would be expected. Nothing of the kind has happened; in fact, searcely any notice has been taken of their arrival.

We are informed, from São Paulo, that Dr. Campos Salles absolutely booked his passage for Europe by the ss. *Thames* to sail on the 20th April, but at the last moment cancelled his order. We do not know whether this has anything to do with the return of the political prisoners, but, anyhow, regret that Dr. Campos Salles should not be able to pay another visit to Europe before assuming the reins of power, as in the present crisis his advice and assistance might be of the greatest value at home in arriving at some solution of the financial problem.

If any proof were requisite as to what we have always insisted on that the volume of Customs' revenues depends more on the relative state of prosperity of buyers than on tariffs or even depreciation of the currency it is afforded by the returns for the past year. Whilst import duties in 1897 showed enormous reductions for Rio, São Paulo, and Victoria, the States that have suffered severely from the fall in coffee, other States such as Pará and Amazonas, where everything is on the boom, show very large increase, the revenue derived from import duties at Pará alone being 3,843,444\$ more in 1897 than in 1896!

If people have the money and want a thing, they will get it no matter what it cost. But if they are poor with their incomes cut down to half, they can't get it, however much they may desire, and must go without it, as we

are doing in Rio.

It is on this account that we anticipate but little revival in trade until our economical situation improves which will only be when coffee goes up; and are inclined to view the actual growth of imports of certain classes, mostly soft goods, as a flash in the pan that cannot be upheld very long. That there is real increase is evident from the statistics we lately published, as well as by the custom house returns, which show that revenue from imports for the month of March is almost identical with that of the same month, last year, being 6.791:0708 with that of the same month, last year, being 6,791:070\$ up to 24th of month, compared with 6,802,235\$ last year in spite of the heavy reduction of duties operated by the new tariff. The falling off noticeable in January or February, in spite of the increased values of exports from Great Britain since November last, is plausible, as such exports would only arrive in January or February, and probably not be despatched until March, when they would commence to affect Revenue returns. However satisfactory the increment may be from the revenue point of view, it is far from opportune on economical grounds, as it must add to our burden of foreign payments without any equivalent compensation in regard to exports, coffee on the c ntrary tumbling every day. Under such circums ances it is hard to see how exchange can be sustained, unless assistance comes from outside, which, in the interests of all alike, is devoutly to be desired. Nevertheless, we regard the new tariff as a mistake under the circumstances, and that even the commercial classes that expected to benefit most by the revival of trade will ultimately find out what they gain by the reduction of duties is more than lost again by consequent depreciation of the currency. It is too late now to alter it, nor is any more tinkering of the tariff advisable until Government make up its mind, as we are informed it has done, to put duties on a gold basis, at least a part of them, in which case a new and wholesale revision would be advisable.

The population of Brazil, according to the Census Com-tion in 1890 was 14,332,915 souls distributed as follows:

mission, in 1890 was 14,552,510 South distribute	*****	1.
Alagôas	511,440	i

San David	1,384,753	, 1
São Paulo	310,926	
Sergipe	020,020	

14,333,915

The previous Census of 1872 gave the population as 10,112,061 so that the increase in eighteen years has been

4,221.954, or at the rate of 2.3 % per annum.
In 1890 the Union counted 1,024 municipal districts and its population consisted of 7,237,932 males and 7,095,980 The disproportion of the sexes is greatest, in the States of São Paulo and Minas, wich is attributed to immigration. The principal cities are as follows, Rio 522,651; Bahia 174,412; Pernambuco 111,556; São Paulo 64,934 (has now nerrly 200,000); Ouro Preto 59,249; Porto Alegre 52,421; Belém 50,064; Fortaleza 40,902; Manáos 38,720; and Nictheroy 34,269.

One of two things is certain; since 1890 the growth has been much more rapid, or official statistics are very We are inclined to believe both one and the other It is certain for example that São Paulo has to be the fact. at least 180,000, estimating the inmates per domicile at the

low rate of five; whilst it is likewise pretty certain that Porto Alegre has a much larger population than 52.421.

Amongst the States, Minas is a long way ahead with 3,184,099, Bahia coming a bad second with 1,919,802, after which follow only São Paulo and Pernambuco with more than one million; Rio Grande do Sul running pretty close with 897,455, which we consider a low estimate.

Taking the figures of the census as correct, and allowing the same rate of increase as in the last eighteen years the present population of Brazil must be about 17,000,000.

What we want to know, and the Census does not tell us, is the proportion between its white and colored population. There can be little doubt that the white element is growing at a much more rapid rate, it indeed, the colored is not disappearing altogether, a contingency that may be viewed without alarm, and even with a certain degree of camplacency. The weak must go to the wall.

SÃO PAULO (Brazilian) RAILWAY— The directors recommend the payment of the following interim dividend for the half year ended Dccember 31st. last: -On the preference shares at the rate of 5 per cent. per annum on the amounts from time to time paid up, less income tax; on the ordinary shares at the rate of 11 per cent. per annum, free of income-tax; on the new ordinary shares at the rate of 11 per cent. per annum on the amounts from time to time paid up, free of income-tax. The amount carried forward, after providing for income tax, will be the sum of £105,000 subject to audit.

Though we have no want of confidence in our own judgment, it is always a satisfaction to find our opinions confirmed by competent critics. A well-known Engineer, resident in São Paulo, whose opinion would carry weight.

were it convenient to publish names, writes as follows:

"I was particularly pleased with the ideas developed by THE BRAZILIAN REVIEW in regard to the São Paulo and Mogyana Railway dispute, and believe that the solution offered is the only one rescible to conciliate all interests offered is the only one possible to conciliate all interests, and must be the one finally adopted. Unfortunately the London directors seem unable to appreciate the tremendous risk they are running, or otherwise the fusion could have been carried out long ago".

We thoroughly believe that there is only one solution,

as our correspondent writes, and in the interest of the English shareholders of the most prosperous concern in South America intend to do our best to keep the matter before the public here and at home, If the board has become so fossilized as to be incapable of a new departure, the share holders should recollect that boards are removeable before

it be too late.

THE CEARA HARBOUR AGAIN.— What is this? Decree no 476 of the 16th inst, orders the London branch of the Treasury to pay to the Ceará Harbour Co. the not inconsiderable sum of £3,692,19.8 for works on the port. We thought the Ceará Harbour was dead and gone and liquidated by this time.

THE RIO CRICKET AND ATHLETIC ASSOCIATION is getting on like a house afire; it already counts 130 members and expects to make up forty of fifty more. Sometime in May the Association expects to inaugurate their new grounds at Nictheroy with a big match. Besides the cricket ground, the Association have constructed tennis courts and a bicycle track; so there will be plenty of choice for members how they shall best keep up that great desideratum of the Anglo-Saxon mens sana in corpore sano. We eat so much bife and imbibe such vast quantitites of liquids, all of which run to fat, that exercise is not a virtue but a necessity with us, just as candle gormandizing is to the hapless Esquimaux. We must eat less, sweat more, or bust. To eat less is repugnant, and busting unpleasant; so the only alternative is to work it off by good hard play. That, the Rio Athletic Association undertakes to assist us to do in the most agreeable manner possible. The grounds will be supplied with a hand-some Pavilion with all the latest improvements and that sine qua non a well stocked bar will not be forgotten. Little

hope for the R. A. A. if it were. The Committee will shortly publish the fixtures for the coming season and meanwhile will be glad-if members will communicate up to 11 h April next their ideas as to the colours they think most so able for the Association. What do you think of Red, Green and Yellow: that would be startling and original, and please the Brazzies. Nothing like killing two birds with one stone whilst you're about it

There is, we believe, no industry in the country more neglected or that is likely to give better returns to foreign capital than mining; and it is always with satisfaction that we hear of new departures in this direction. Minas Geraes has for centuries been known as a great gold and diamond producing area. Indeed, 200 years ago it was the most produc-tive gold field in the world. The Portuguese Government, however, undertook to kill the goose that laid such golden eggs by clapping on a twenty per cent royalty as its share of all gold extracted, so that as soon as the surface placers were exhausted, mining became unprofitable and the yield fell off

to an insignificant figure.

About 1830 a revival took place when English capital commenced to interest itself in Brazil, and several mines were re-opened, with extremely satisfactory results in some cases, and failure in others. The refractory nature of the ore, the great distance from the coast, and costly communications, made mining at that time both difficult and risky; whilst the "peculiar institution" - slavery - placed another and almost insuperable difficulty in the way of British capital. All that is altered now. Railway communications connect the mining districts with the coast, and freights are most moderate; slavery has disappeared, and free labour is cheap and tolerably abundant, whilst the methods of mining have undergone such a revolution that ores incapable of profitable treatment a few years ago, are to day perfectly tractable, and yield big profits. That the introducion of the chlorination and cyanide processes will prove as beneficial in Minas as it has in other gold fields there can be no question. The ores have always been regarded as peculiarly refractory owing to the large percentage of pyrites, and the loss of gold particularly heavy, often as much as 25 %. This the Morrho Velho Co. has already reduced considerably and with further experiments and more perfect appliances, expects to get down to  $5^{\circ}/_{0}$  or  $6^{\circ}/_{0}$ .

When the extraction of the gold from the refractiory Minas ores has been practically demonstrated on a large scale we anticipate a boom in Brazilian Mining that will rival South Africa or Australia. The gold is here, there is no doubt of that, only awaiting capital energy, and science to extract and make it productive. Every gold field in the World had its boom except this, but our turn cannot be far off now, and when it ever does come, those that had the sense to get hold of likely properties at the present nominal prices will not fail

to reap their reward.

A very good property known as the Garapata Estate is about to be offered on the London market, which we trust

will be but a fore-runner of many others.

The Garapata property is situated right in the heart of the richest mining district of the country, where mining has been profitably carried on for centuries, and in the neighborhood of the well known St. John del Rey, Gongo-Secco, Rossa Grande, and Minas and Goyaz working mines.

The Central Railway passes right through the district within 15 miles of the mine itself, so that communications are now very different to what they were when the Ouro Preto and D. Pedro mines were started some years ago. The property is well timbered, whilst the streams that traverse it can be made to supply about 60 to 70 H. P. for

motive power.

The reports of two well known English experts, which have been shown us, leave little doubt of the valuable nature of the property. The principal workings are known as the Mina Alla and Mina Baixa. The Mina Alla is a well defined neef, striking East and West, and dipping 250. appears to be some twelve to fifteen feet thick. Tha gangue consists of highly pyritic quartz, the country rock being feliated micaceous, talcose, and graphitic schists.

1888, when owing to the careless method of understoping a cave took place, and work on this mine was entirely suspended.

The Mina Baira appears not to be a reef at all, but an interstratification in which the gold has been concentrated by the impervious nature of the close chloritic strata that form the foot wall. These workings are at a depth of 325 feet below the outcrop. A large chamber has been excava-ted 125 feet wide by 8 to 15 high, and as far as can be judged, the deposit seems likely to continue down and laterally. spite of the considerable amount of work down there is no dump, a proof of the uniform character of the ore

Labour is good and cheap, first rate miners, Italian and Brazilians being obtainable at 2 to four shillings per diem.

Assays of the ore taken at the Minas and Goyaz Co.'s

laboratory are certified to have given the following results:

The property seems a good one, and one that can be safely recommended to the attention of the capitalists. such properties there are thousands scattered up and down the country that await only energy and capital to develop them. It is enterprise of this kind, that is so badly wanted and that Government should spare no trouble to attract.

The annual output for the whole of Brazil is estimated at only 108,000 ounces, or less than that of the British or French Guiana, and scarcely half of a single month's yield of

When the output is 200,000 or 300,000 ounces per month, as we firmly expect to see it, there will be an end of

crises, and of their origin-paper money.

The true means of improving our currency is to increase our gold output; but before capital can be attracted on any large scale some alterations in legislation is necessary, as well as some kind of guarantee as to titles. This the State Governments should look to.

Should the mine yield anything like this on a large scale there can be no doubt about its future. The property is decidedly interesting, and can be safely investigated by foreign capital on the look out for a good deal.

A NEW MINING COMPANY FOR BRAZIL. We had scarcely closed the foregoing lines when we received news from London of the registration of a new mining company, the object of which, the memorandum of association states to be, to acquire certain mines, mining rights, &c., in South America, in particular the property known as the Faria Gold Mining Company of Brazil, Limited, the old company, upon the terms of an agreement expressed to be made between the said old company of the first part, H. Ward, the liquidator, of the second part, and this company of the third part; and to develop and turn to account the said mines in such manner as the company shall see fit; and further, to acquire any other mines and mining, water and other rights, grants, leases, claims, concessions, options of purchase, metalliferous land, alluvial ground, mineral deposits, &c., in any part of the world, and to carry on the business of a mining, smelting and trading company in all its branches, to lay out towns and villages, and to construct, maintain and work rail and tram roads, wharves, docks, piers, &c. The signatories

R. Bawtree, Lyndhurst, Carshalton-grove, Sutton..... 1 J. Larkman, 11, Whitehall-gardens, Gunnersbury...

The first directors—of whom there shall be not less than three nor more than five—are E. A. Pontifex, J. Taylor, E. de Wael, L. Maichain, and J. Ledan. Qualification £250. Remuneration, £600 per annum and a percentage of the profits, divisible.

We have received a very useful little exchange table from 5 to 7 pence published by Mr. Joaquim D. Morse, of São Paulo, calculated out to 64ths, instead of 32nds as hitherto. The table gives the value of 1 to £9 sterling in reis for every 64th of a penny from 5 to 7d., as well as the eorresponding value of the sterling penny, franc, mark, and dollar. It is in a very portable form and will be a careful Vade-mecum for brokers et id genus omne. We have checked some of the figures, which are worked out to milinsimos of a rei, and found them very correct as far as we have investigated, which is satisfactory with so many tables in which accuracy seem to be the last thing aimed at. Mr. Morse's tables are edited by the Typographia Industrial in São Paulo, where they can be obtained at the cost of 2\$000. Elaborate calculations of this character are laborious and rarely compensate the author from a financial point of view, and deserve encouragement.

The articles of association of Naumann, Gepp & Co. L't'd., successors of the well-known firm of Naumann. Gepp & Co., have been duly approved by the São Paulo Government.

#### PARÁ

(From our own Correspondent)

5th March, 1898.

RUBBER. In the first days of the week beginning on 21st February the following prices were paid for Rubber:

Islands fine 11\$100 Amazon fine 12\$000/12\$100 " Coarse 6\$000 " coarse 8\$300/3\$400

the sterling cost of the fine rubber being f.o. b.

Islands 3/3 1/2 per 1b. Amazon 3/3 — 3/9 1/4 per 1b.

Notwithstanding the high prices paid here, and the stock in first hands, which consisted of 200 tons of Amazon Rubber held for still higher prices, the market in England weakened and the demand ceased. Some holders getting anxious, forced part of their stock and they had to sell at 3/11, being a decline of 1/2d. on previous prices paid for spot rubber.

The market here followed the weakness in the English markets, buyers withdrawing entirely from the market for Amazon rubber, and the demand for Islands not being general, prices declined gradually to 10\$700 equivalent to 3/5 1/4. In Amazon Rubber nothing was done, as holders In Amazon Rubber nothing was done, as holders did not offer their lots on the market, waiting patiently for the demand to strengthen.

The weakness in England did not last long, the market becoming firm again with increased demand, and the price of 3/11 1/2 was done for rubber for forward delivery.

The last quotation received from there are of 3/11 1/4

for spot rubber, market strong with a good demand.

Here the market improved also considerably, although the sterling cost remains lower than when we sent our last report,

To-day we quote:

Islands fine 11\$000 to 11\$400 (cost f. o. b. 3/5 192 — 3/5 3/4) Amazon '' 12\$000 (' do . 3/8 1/2 )

Although the prices in reis are the same as previously paid, the sterling cost is less owing to a lower rate of exchange, a fact, however, which the sellers here do not take into consideration, their principal object being to obtain the price in reis, which they want to get regardless of exchange.

All probabilities in consuming markets are for higher prices, as it is not natural that, the crop being now practically over, and but a small stock here in first hands, they should decline.

The exports last month, after the 19th were :

February 20th ss "Sobralense" for Europe 487 tons "Rio Amazonas" ... 10

The receipts this month up to date are 220 tons.

The exports consist of 296 tons shipped to New York by the steamer "Benedict", which sailed yesterday.

The total exports last month were 3,300 tons repre-

senting a sterling value of about £ 1,200,000.

Since the 19th ulto. the pauta for Rubber had the following alterations.

21st to 26th February 118157 for fine, 78947 Coarse 28th Feb. to 5th March 118135 4, ,, 68868 ,,

Cocoa. The total arrivals for the month of February were 130 tons. Shipments during the month 79 tons, whereof 42 for France.

The prices have been maintained at 2\$200 to 2\$150 per kilo.

Nurs. Since my last report the following sales at auction were effected.

The total shipments for last month were

700 Hects. for New York 5938 ,, ,, Europe

ncluding shipments in transit from Manáos.

The cash balances of the banks on the 28th ulto, were as follows:

London & River Plate Bank, Ltd.,... Rs. 1,434,254\$380 London & Brazilian Bank, Ltd.,..., 1,838,645\$560 The British Bank of So. America, Ld. , 595,036\$700 Banco do Pará....
Banco Commercial do Pará.... 7,560,158\$961 4,568,465\$996 807,324\$850 538,239\$780

Rs. 17,342,226\$227

Custom House receipts for February/98 Rs. 1,762,4028597 Recebedoria, ", ", ", ", 1,852,9428665

The Bank of England Dividend. According Bank of England returns the rest with the addition of £ 252,376 amounts to £ 3,745,103 and a dividend at the rate of 10 per cent, per annum is expected to be paid for the half year-ended the 28th February against the previous payments at the same rate. After this distribution the rest will remain at about £ 3,015,000. This will give a yield to investors at present prices of Bank stock of little over 23/10/0, not a very high rate, but quite good enough considering the security.

Bank of England stock on Feb 10th touched a record price, the quotation being 363. In 1895 the price varied between 336 and 322 in 1896 between 345 and 322, and in 1897between 351 1/2 and 326. It will be observed that yesterday's figure represents an advance of 27 on the highest of 1895, 18

on the highest of 1896, and 11½ on the highest of 1897.

From an inspection of quotations dating as far back as 1732 it appears that Bank stock was only purchasable under par in the year 1762, when it might have been bought for 91, and in 1761, when it stood at 98. The year 1763 saw it at a lowest of 111. From that date it went on improving steadily until 1768, when its highest price was 170 and its lowest 158. In 1770 it fell considerably, the highest quotation being 153 and the lowest 105, or 53 points lower than the lowest of two years before.

In 1771 the extreme variations were 155-134, and in 1779 118-106. The quotation advanced to the second century in 1802, when 207 is recorded as the highest price, 178 being the lowest. In each of the three succeeding years the highest price obtained fell below 200; but in 1806 the highest was 223, with a lowest of 191; and from 1807 onwards both highest and lowest are always returned as above the 200 until 1825, when the highest is given as 299 and the lowest as 196-a very substantial difference of 103 being involved.

The year 1840 saw the highest price at 179, with a lowest of 156. For a lowest approximating to this we have to go back as far as 1801, when the price was returned at 148. The year 1885 saw the highest at 308½ and the lowest at 287½. The highest price registered during the decade 1885-95 was 346, which is higher than the highest of 1896, but not so high as the highest of last year—351½.

German Banking. The Financial News states that the death of Herr Schwabach provoked speculators to conjectures of some deal between the Disconto-Gesellschaft and the banking firm of S. Bleischroder; but these ramours lack all probability. The shares of the Disconto-Gesellschaft, which, had been neglected for a very long time, rose about 5 per cent. during the week. The shares of the Dresdner Bank were also firm. The board proposes a dividend at the rate of 6 per cent. as compared with 8 per cent. for the preceding year, and the balance-sheet proves again how steadily this company is continuing to progress. The dividend of the Bank fur Handel und Industrie (Darmstaedter Bank) is proposed at the rate of 8 per cent. — the same as for the preceding year. The balance-sheet of the Deutsche Bank has also been published. The dividend will be 10 per cent., as it was in 1896. The Leipziger Bank has published a very satisfactory statement, and pays 9 per cent., as against 8 per cent. This bank increases its capital from 32,000,000 marks to 48,000,000 marks. The balance-sheet of the Austrian Credit Anstalt and the dividend of 17fl. did not make any impression, and dealings in Credit shares are quite insignificant.

#### WILL BRAZIL DEFAULT?

That is the inquiry that agitates the financial world rhat is the inquiry that agitates the financial world very time a coupon is about to mature. It is paid; the perplexed bondholders thankfully pocket their dividends, and then the wondering begins all over again. A year or so ago the inquiry was first started, and owed its origin to a communication of the Financial News' special correspondent of the paper, which was communicative of this paper, which was communicative of this paper, which was communicative. dent, now editor of this paper, which was somewhat misconstrued, but in which he stated that nothing could save the country from insolvency except a rise in the price of coffee or the sale of the State Railways, unless its foreign creditors came to its aid in time. A year has passed away, coffee has fallen lower and lower still, reducing the value of the country's earnings and disturbing still more the already unstable equilibrium of our economy. If the balance of our foreign payments was, to say the best of it, unstable before, the reduction in the international value of our principal staple export by nearly half in the course of a few months upset it altogether, and set our currency rolling down the hill of depreciation at an unprecedented and alarming rate. accelerated still more by the heavy extraordinary expenditure forced on the present Government by the reckless orders of war ships and material by its predecessora. Nor is there any stopping it so long as the balance of payment is so unquestionably against the country. The demand for bills must continue in excess of the supply, and the currency depreciate continuously and proportionately. This we This we predicted a year ago, when coffee was still quoted at 7 1/2 cents per lb. in New York. To-day with a quotation of 5 cents, the situation is infinitely aggravated, and has become at last so insupportable that all classes, foreigners and Brazilians alike, would welcome the climax, and absolutely look forward to suspension of payments with feelings of relief.

The burden of foreign debt in ordinarily prosperous times was heavy but supportable; to day it is the straw that turns the scale, and makes improvement impossible. Suspension of payments would afford the necessary relief; and if the Government had not been animated by the sternest determination to resist to the last and carry out its obligations to the bitter end, which, however, cannot now be far off, the incessant clamour of friends and foes, the walls of Commerce, not to mention political considerations, would long ago have closed the chapter of their difficulties and cut the Gordian knot by suspending foreign payments altogether.

Perhaps it would have been better had they done so.

Every payment abroad, every coupon that falls due is but a fresh call on our exhausted market to supply exchange that is insufficient for its own purposes, depresses exchange still more and makes successive payments still more difficult, until at last a point must be reached when the depreciation will be so immense as to absorb all the revenue of the country, and foreign payments must necessarily cease. Exclusive of the extraordinary payments referred to, the sum demanded for the annual service of the foreign debt is not large, and does not exceed 3 1/2 million sterling, including guarantees of interest on Railway and other capital, which to a population of 17 millions should be almost insensible. And yet it is this payment that has become unsupportable, because it absorbs more than half of almost insensible. the total revenue of the country, but worst of all is the direct agent to-day of the increasing depreciation of the only circulating medium we possess. To continue long as things are going is impossible: the point will necessarily be reached, and that quickly, when everything is sold that is realizable, or pawned on which money can be raised, when the volume of currency exacted to satisfy our foreign obligations will be such that no taxation can satisfy, and insolvency will force itself on an unwilling Government malgré lui,

Eppur si muo e. The denouement is palpable, and draws daily nearer, and yet no one moves, whether here nor abroad to save the credit of a country that can show a financial record without stain, of which any Nationality might be proud.

And yet we believe that Brazil will not default; that means will be found to avert the impending catastrophe, that would be no disgrace to Brazil, because before succumbing to the inevitable she has struggled and sacrificed to the bitter end, but must east an indellible slur on the haute finance that permitted such a country to go to the wall in face of such irresistible difficulties and after so heroic a struggle.

We feel certain, we repeat, that European financiers will not allow such a disaster, nor risk a repetition of the Baring crisis, when it can be so easily averted. With a little timely assistance Brazil can get over all her difficulties. Allow her breathing time, and like the Argentine Republic she will emerge rehabilitated and strengthened, and offering to capital and labour alike ever growing opportunities for profitable employment and development.

Shall all these potentialities be destroyed by bankrupey? We do not believe European Finance to be so blind to its own interests.

The suspension of foreign payments would bring in its train consequences so serious that it is impossible to contemplate it without dismay, and must be followed by some similar measure in regard to the home gold debt, at least, that would carry misery to many a household, many a hospital and asylum, and orphan child.

The suspension of guarantees to railway enterprise must mean in most cases not only total loss of interest on the capital invested, but in many (as will be seen by our analysis in another column of some of the traffic returns) absolute ruin, as even the traffic would have to be suspended, and so the relief, afforded to national economy by the suspension of foreign payments would be lost again in consequence of the disorganization of our internal communications that such a measure must effect. Look at it as we may, it must be an immense disaster, here and abroad; and no sacrifices are too great or guarantees too onerous, if by their means it can be averted.

And yet it is inevitable, unless foreign assistance be forthcoming and that quickly. The matter will brook no delay; what is to be done, must be done quickly, or we perish.

We advise government to send to London a commissioner armed with full powers to see what can be done to ease our market of the pressure of foreign payments that has become unbearable, before the ever increasing burden of taxation, that the progressive depreciation of the currency entails, breed a new and terrible revolution, in which, not the monarchy as some imagine, but the very worst elements of our society will float to the surface, and if European Bankers are so blind to their own interests as to refuse assistance, to suspend payments without delay.

#### THE BRAZILIAN REVIEW

Saturday evening, March 26th, 1898.

Exchange has been doing just what was expected of it, in spite of all the well-meant efforts of one of the foreign banks to bolster it up. On Saturday 19th the London & River Plate Bank opened with 3 1/8, little money coming forwrd, being the only bank drawing at this rate. This rate was maintained until Thursday with but a slack demand until the afternoon, when a more lively demand sprung up and rates gave way to 6 1/16. Friday was a holyday, and on Saturday the rate opened at 6 3/32 and 6 1/16, at which rate plenty of money was offering, and rates fell to 6d., the German Bank retiring its counter-rate altogether. Later on something was done at 5 1/32, weakening off to 6 1/16, at which rate, the lowest yet touched, the record of the week closed with plenty of buyers at 6 1/16d, for the end of April, and 6d. for longer dates.

At Santos the movement is considered average, about £ 140,000 the previous week and more than £ 400,000 before. Rates at Santos seem to have been slightly better than Rio, the average bank counter rate coming out at 6 7/64 for the week compared with 6 3/32 at Rio.

rate coming out at 6 7/64 for the week compared with 6 3/32 at Rio.

Extremes during the week 6 1/16d. and 6 5/32 for Bank, and 6 1/16 and 6 7/32 for private paper at Rio, and 6 3/32-5/32 for Bank paper at Santos, and 6 1/16-6 3/16d. for private.

Declared sales during the week have fallen off considerably, showing a total of only 141.000 bags for Rio and Santos against an average of 228,000 per week for the previous three weeks of the month and that of 150,000 per week for January and February, which combined with the fall of prices in foreign markets is sufficient to explain the unmistakeable weakness of exchange.

The value of coffee shipped from Rio and Santos during the week amounted to £ 235,328 compared with £ 247,337 last week, and an average of £ 430,031 since lst January.

To judge from the customs returns imports are continuing to grow, as was anticipated in our former number. The revenue derived from this source showing for the first time for more than a year, a positive increase compared with the same month of the previous year, being on 26th inst. 6.876,9928 aguinst 6,853;128\$; which, taking into consideration the reduction of the tariff, must represent a real increase in the value of imports equivalent to at least 20 per cent! How we are to pay for this increase is not so clear!

The volume of the S. Paulo stock exchange business, only Rs. 435:000\$ for the week, shows a terrible falling-off, consequent on the fizzling of the Paulista and Mogyana speculations for a rise; the latter, especially, having left many sanguine operators with saudades of their hard-earned oof. Better luck next time, but put your money on some thing safer, and don't trust too much to appearances which are often sadly deceitful. Prices, however, are fairly maintained for both Paulista and Mogyana shares, the lame ducks and weak kneed fraternity that could not hold on being liquidated by this time.

Two large importing houses in S. Paulo are reported to be in a bad way and about to call a meeting of creditors, the liabilities being Rs. 600:000\$ and 1,000:000\$ respectively.

The only sales by judicial order (alvará) during the week were 5 apolices 4 p. c. geld, at 975\$, and 80 shares of the Gia. Melhoramentos no Brazil at 20\$000.

on Brazil at 20\( 8000\).

No improvement is noticeable in Stock Exchange business. On the contrary, it has fallen again to an aggregate of only 1,372;267\( \$\)
Compared with 1,778:675\( \$\) last week, of which Government stock and bonds absorbed \$11:761\( \$\), Bank shares \$491:251\( \$\) and Railway securities, sundries and debentures only \$\( \frac{9}{2}.255\( \frac{8}{2}.\)

There is not much alteration in quotations of Government bonds this week, securities payable in currency being generally weak, whilst gold bonds are firm and inclined to rise, 4 p. c. converted Apolices having risen 27 points to 1,017\( \$\), whilst 1895\( 5\) p. c. currency loan has fallen 3 points to 754\( \frac{8}{2}.\) 1807\( 6\) p. c. ten points to 880\( \frac{8}{2}.\) and 5 1 Municipal bonds two points, to 151\( \frac{8}{2}.\)

Evidently the public does not believe much in suspension of payment, which, if it come at all must commence with the gold debt; and, as we state in another column, we quite agree with public opinion in this matter. There will be no suspension, of that we are convinced; and can assure our readers on the very highest authority, that Government does not cogitate any such suicidal policy. Whether or no it may ultimately become unavoidable is another matter, but for the present at least, there is no such intention, and there are yet may resources unfouched that must be exhausted before such a disaster can be accepted with an easy mind and the consciousness of having done everything humanly possible to avert it.

Bank shares are about the same as last week, Commercio having risen three points to 214\( \frac{8}{2},\) and Railway shares is next to nothing, confined to a few operations in Leonaldina at 7\( \frac{8}{2} \) full of 250 vice and to a few operations in Leonaldina at 7\( \frac{8}{2} \) and at 7\( \frac{8}{2} \) and at 7\( \frac{8}{2} \) and at 7\( \frac{8}{2} \) on fill of 250 vice and to a few operations in Leonaldina at 7\( \frac{8}{2} \)

one, to 245\$.

The movement in Railway shares is next to nothing, confined to a few operations in *Leopoldina* at 7\$250, a fall of 250 reis, and one in \$\overline{Sto} Ohristov\overline{a} \text{tram}\$ shares at \$155\$, the, same price as last week. Sorocabana Debentures are also weaficak, having fallen again from 53\$ last week to 51\$.

\*\*Leopoldina\*\* 100\$\*\* debentures remain about the same at 9\$500, those of 200\$\*\* have weakened again to 95\$\*\* from 99\$\*\* last week, and \$120\$\*\* for the last week of January.

Late advices give the following quotations for Brazilian Bonds:—1880, 4 p. c. 53, 1895, 5 p. c. at 56  $\frac{1}{2}$ , 1888 at 55, and 1879 at 64 %.

Mail advices give us the following alteration in quotations of Brazilian Stocks and Bonds. on the 6th March; 1882, 4 1/2 p. c. at 61—63 against 60—62 last week; 1889, 4 p. c. at 62—63 against 61—63; West of Minss bonds fell heavily from 64-66 the to 60—611/2; other government against 60 against 61 against 6 nmen securitees showing no alteration.

Amongst railway shares, Central Bahia fell again from 46—49 the previous week to 43—46; and G't Westrn of Brazil from-II—12 to 10 1/2—11 1/2; Recife & S. Francisco shares also dropped to 75.77 from 77—79; whilst S. Paulo rose a point from 34 1/2—35 1/2 to 35 1/2—36 1/2; Macahé & Campos likewise recovered a point, closing at 35—36, as also Mogyana debentures which rose from 102/105 to 103—105, there being no alteration in other railway securities.

Amongst industrials, Rio de Janeiro City Improvements rose a point to 10 1/2—10 3/4; and Dumont Or'dy fell 1/2 a point to 4 1/2—5, pref'shares remaining firm at 7 1/2—8 1/2, but debenturs being quoted a point lower at 89—90.

Western & Brazilians. L. rose a point to 11 1/2—11 3/4, and preferred 1/4 point to 3 3/4—4 1/2, and the 4p. c. debenture stock from 1/105—107 to 106—108.

105 -107 to 106-108.

COMPARATIVE STATEMENT OF EMBARKMENTS FOR THE WEEK ENDING MARCH 26th, 1898.

			тот	LVI	TOTAL FOR CROP.				
	U. States	Europe	Brazil and Coast- wise	British Coloni- es	Other Ports	This week	Same week last year	Rio & This week	Santos Last year
Rio	51.165	28.580	4.669	2.350		86.764	67.189	3,433627	2.358039
Santos.		87.555				87.555	13.160	4.978469	3.820928
	!								
Total	<b>5</b> 1 165	116.135	4.669	2.350		174.319	80.349	8.412096	6.178064
Daily average	7.309	16.590	667	335		24.002	11.478	31.388	22.97

Shipments this week have been insignificant, at the rate of only 24,902 per diem, compared with 34,222 last week, and a general daily average of 31,388 since the commencement of the crop.

t is worthy of notice that this week both entries and shipments from Rio and Santos are almost exactly similar, the first being 79,590 and 80,123 respectively and shipments 86,764 against 87,555. Of the total shipments for the week 46,135 went to Europe, and only 51,165 to the States, the rest going to South Africa and the coast. All the coffee for the States was shipped from Rio, absolutely none going from Santos.

Compared with same week last year, shipments are more than double. The total shipments for the crop now reach 8,412,096 against 6,178,964 last year, and the daily average 31,388 against 22,970.

THE FOREMENTIONED COFFEE WAS SHIPPED BY THE FOLLOWING STEAMERS TO THE FOLLOWING DESTINATIONS:

showing an aggregate reduction for the week of 10,000 bags, the

showing an aggregate reduction for the week of 10,000 bags, the stocks being still almost double those of last year.

In our third number of 15th March we fell into a stupid error of stating that Havre stock has been reduced during the week by 300,000 bags. The mistake was due to the inaccuracy of a copy of the European Bureau's telegram dated giving the figures precisely as stated in the REVIEW, in which the stock of Brazilian coffee at Havre was put down at 572,000, in place of 772,000, as it should have been.

A little consideration, however, should have shown that such a reduction was impossible and that something must be wrong with the figures.

Deliveries at New York continue fairly average, being 94,000 in this week compared with 83,000 last week and 98,000 last year, those for the last four weeks being 376,000 against 332,000 last year.

According to Messrs. Diruring and Zoon the visible supply has diminished 570 tons since 1st February or 1.6 per cent.

The New York Coffee Exchange gives the visible supply on 1st March as 6,024,900 bags compared with 6,031,500 on 1st February, a reduction of 1 per cent.

According to Messrs. During & Zoon's circular the stock, arrivals and deliveries up to the 1st March were as follows:

arrivais and deliveries up to ti	ie ist mai	ch were a	s follows :	
	£	1st Mar.	1st Feb.	1st Mar. 1897
STOCKS on 1st.   Europe United States		$\substack{186,250 \\ 57,187}$	$^{178,200}_{57,705}$	$117,050 \\ 29,706$
Total		243,367	235,905	146,756
Arrivals Europe United States		48,030 26,058	50,980 36,647	$\substack{42,050 \\ 27,647}$
Total	• • • • • • • • • • • • • • • • • • • •	74,148	87,627	69,697
		Febr'y	January	Febr'y
DELIVERIES   Europe United State	s	40,040 26,647	42,930 32,941	31,749 $24,882$
Tota!		66,687	75,871	56,582

Stocks in Europe continue to grow showing an increase of 4 1 12 7. since 1st Feb., whilst those of the United States show a slight reduction of not quite 1 7.: Arrivals at European and American ports fell off 15.4 7. compared with February, being 29 7. for the United States, and only 3.7 7. for Europe. Deliveries on the contrary increased 17.8 7., at the rute of 19 7. for the United States but only 6.7 7. for Europe.

That the low retail prices current in the United States greatly stimulate consumption there can be no question, and if on the one hand low prices are a nuisance, at least they help us to get rid of stocks that would otherwise stick on our hands.

The visible supply of coffee on 1st March in tons was as follows:

Prices have failen again all along the line. In currency the Rio quotatlers close about the same as last week for No. 7, but decidedly weaker for other grades. Reduced to its gold value the average price of No. 7 comes out at 1\$711 per 10 kilos, compared with 1\$808 the average for last week; a fall of 5.3 cp. New Yerk prices having fallen simultaneously 3.1 cp. for No. 7 spot and 3.4 cp. for Merch options.

The official valuation of coffee for appraisement of duties was 840 reis per kilo for Rio and Minas, and 740 reis for 85e Paulo; the cost f. o. b. coming out about 1\$262 gold for No. 7 and 2\$038 for good average, per bag of 60 kilos. At this rate, the shipments of the week from Rio and Santos alone are worth £235,323 compared with £247,337 last week, and an average of £460,031 per week for the crop.

the crop.

The sterling value of the Rio and Santos crop to date is now £17,665,177

Santos, March 24th, 1898.

Our market has been a little more active since the last report, although on a lower basis: yet the volume of business done is only middling and there is no pressure to sell or buy.

Agents (Commissarios) accompany the market; probably following instructions from owners, who see no more chance of any important rise, the new crop being so near at hand. Currency prices are:

8\$400 to 8\$509 for superior 7\$500 to 7\$700 for good 6\$500 to 7\$000 for medium (regular)

Primes are generally sold 500 reis above superior, but there is Primes are generally sold 5000 rets above superior, but there is very little demand from Europe for fine and finest goods or "specialties," the run being on superior, good average, and lately on regular, which are somewhat more plentiful. This shows that importation is almost exclusively done for exchange purposes, inland dealers and distributors keep out of it. It is not to be wondered at, as the enormous receipts and the desire of the Brazillans to sell must exercise up the importance markets and e. & for prices have cone down to on the importing markets, and c. & fr. prices have gone down to

28[6 — 28] — for superior 25[6 — 26] — " good average 22[6 — 28] — " regulars.

The fall is not very big on last quotations, the more so as prices have gone down very gradually, and a fair business must have been done at each successive drop

Lower freight by outside steamers have facilitated transactions

Peaberries are almost entirely neglected both by the States and

Europe. Bourbon Coffee, especially finest grades are in fairly good demand for the United States interior markets, but there is little offering. The bulk of the business has been done as usually of late for European account; and of the two big roasting concerns of the States only one is supposed to have sent large orders to this port.

From the Bulletin de Havre, of February 28th, we extract the

From the Bulletin de Havre, of February 28th, we extract the following:

"The annual statistical crop estimates of the Dutch brokers has just come to hand, and seems to us to be highly instructive and to sufficiently explain why prices have fallen so low. Last year they estimated the total annual production for 1896/37 at 12,608,000 bags, and that for the season of 1897/98 at 11,271,000. Now they have concluded that definite results for 1896/37 mount up to 13,685,000 against 10,365,000 for 1895/96; that is, a surplus of 3,250,000 over that season, and about one million over their original estimate. For the season 1897/98, they find themselves obliged to raise their valuation of the probable crop to a total of 15,350,000; that is to say, an increase of 4,179,000 bags over their forecast last year.

For the season 1898/39 their first approximate estimate is 13,359,000; that is to say, a reduction of 2,091,000 on that of the preceding season, and almost exactly the same as the crop for 1896/97. Commenting on these figures a House remarks that in the estimate of 13,359,000 bags of the Dutch brokers, the Rio and Santos crop enters for 8 1/4 millions. Now it is scarcely probable that these crop enters for 8 million bags, and admitting the preciseness of the last valuations that have come to hand, it seems quite possible that they will not even exceed 7 to 7 1/2 millions. It is, therefore, quite on the millions, or at the most 13 millions".

A correspondent writes to the Jornal do Commercio as follows:

"The valuing Commission estimated the coming crop of Rio de Janeiro at 2,500,000 bags. After this estimate was made news has come of a poor flowering, late and very irregular. The season, however, continues very unfavorable for the development of the berries, which presented a poor appearance and have been burned by the sun, causing great loss to planters. Any rain that may fall, from now forward, will be useful for to fortifying the trees, already very much weakened by the prolonged drought, but will also tend to increase the difficulties of gathering and drying the crop, and is likely to deteriorate still more the quality, already not very good. Under these circumstances, it not being possible to calculate exactly what will be the percentage of the bad and damaged beans, the Commission is of the opinion that the original estimate of 2.500,000 bags should be maintained, and can confidently assert, in view of the trustworthy informations received from all the producing centres, that the coming crop will be small and, in general, of an inferior quality to what is being at present harvested.

being at present harvested.

The high prices of nearly all produce, the heavy tariffs on the railway, as well as the little discrimination shown in the imposition of

State taxes, and the scarcity of money, all maketo, it impossible to the

planter to hold out against the exaggerated fall of prices.

We give this for what it is worth; but must say that independent information received from São Paulo, as well as other districts in Minas and Rio, šeem to indicate that the next crop will not certainly be as big as the present one, and that it will decidedly be of less weight and lower grade.

It is strange that with so favourable a season both here and in Sautos so many arrivals at Buenos Ayres from our ports should have to report fever aboard. The Buenos Ayres Standard states that the Provence landed a yellow fever patient at Flores Island, whilst the Norwegian Barque Signer had eight cases abourd, four fatal including the Captain. The Attivitá also entered with fever aboard besides other steamers and sailing vessels.

The Rio market, says the Standard, seems to be open again to River-Plate live stock, as the firm of Matto & Co., which holds a five

years' contract from the Municipality for supply of fresh meat, has made arrangements for supply from Montevideo and this market. Some consignments have gone forward already from Montevideo and the City of Lincoln and Southgarth will take two large shipments

River-Plate fixtures during the week ending March 13th were as

County Antrim, 6 months, to load general cargo in the Plate for Rio de Janeiro, P. T.

Rio de Janeiro, P. T.

Freda, prompt, to load grain at Montevideo for Rio, 20sh.

Sufir to load hay at Rosario for Rio or Santos \$3. gold.

Buenos Ayres advices state that the freight market elbsed dull for the whole week ending 19th March, the only parcels booked for Brazil being cattle and horses at £4. per ss Guarany for Pará, besides 400 tons of cereals and 800 tons sundries for other ports.

The vessels loading for Brazil on the 19th in the Plate were as follows: ss Hippomenes loading 800 tons of maiz for Warden & Co. for Rio.

The Bk. Sylvia loading at Rosario for Rio.

The British schooner Margaret Murray, of London, bound from Parahyba (Brazil) for Liverpool, passed the Old Head of Kinsale the other night in charge of the second mate, who signalled that the captain was dead and that the chief officer was lying in his berth seriously ill. The vessel, short handed, was making for Queenstown, as the remainder of the crew were worn out from exposure and ways were. Extrapret. overwork. Fairplay.

The Royal Mail Steam Packet Co. has ordered, says the Jornal do Commercio, a new steamer that will measure 500 tons more than the Danubs or Nils, and 34 feet greater length. Amongst the improvements to be introduced are a second saloon, electric fans and deck cabins.

The only charter reported this week is that of the Waterfox by Mr. Wm. R. Mac Niven, on account of Messrs. Wille, Schmilinsky & Co. to load £ 6.000 bags of coffee for Port Elizabeth. Freight £ 600 lump sum.

The Treasury Council has advised that the duties recovered on two bottoms imported for the service of the Sudamerikanische Dampf Gesellschaft for its Rio Grande service should be returned and reductions made in the estimate for the steam barges Este and Cangassu, but that coal imported by the Company for its own use should not be admitted free of duty.

The Sudamerikanische is a highly favored Company that generally succeeds in getting whatever it wants, and is actually carrying on a coasting trade between Rio Grande and Porto Alegre in the teeth of late legislation and greatly to the prejudice of other less favored concerns.

Goods are shipped out from Hamburg to the port of Rio Grande and there transhipped to the company's steam lighter for transport to Porto Alegre. Is the service from Rio Grande to Porto Alegre coasting, or no? that is the question Rio Grande owners are anxious to settle.

The ministry of marine has reduced from 500 to 250 reis the pilot–dues for  $Lloyd\ Brazileiro$  ships visiting Sergipe ports.

antos Freight Market. The ss "Franklin" has been chartered

Santos Freight Market. The ss "Franklin" has been chartered for Havre @ 21/- plus 5 % of per 1.000 kilos.

Freights to Hamburg, Antwerp and Rotterdam by regular liners keep up to 30/- plus 5 % of per 1.000 kilos, but the steamer "Try Geta" has been chartered for our port at 21/ plus 5 % or two ports (@ 13/- plus 5 %); it remains to be seen where she is going to.

It is evidently a futile attempt on part of the regular steamship lines to put up their freight rates, as plenty of room in first-class outsiders is offered, and exporters of coffee are obliged to contract shipping conveyance at the cheapest rates possible; as present low prices of coffee put them in the same position as shippers of wheat, coal, or any other low priced produce.

## Bailway News and Enterprise.

LEOPOLDINA RAILWAY COMPANY.

THE BONDHOLDERS' COMMITTEE CONCLUDES ITS LABOURS -PROSPECTS OF THE NEW COMPANY.

THE BONDHOLDERS' COMMITTEE CONCLEDES ITS LABOURS—
PROSPECTS OF THE NEW COMPANY.

A meeting of the holders of certificates insued by the bondholders' committee of the Leopoldina Railway Company was held yesterday, at Winchester House, Mr. Robert Benson presiding.

The Chairman said the committee, as such, had now reached the conclusion of its labours, and henceforth their interests would be represented by a responsible English company which would hold its meetings regularly as prescribed by law. By last spring they had made sufficient progress with their negotiations to call the certificate-holders together and submit to them heads of agreement for the acquisition of the undertakings of the Leopoldina Railway, the Macché and Campos Railway, the Rio de Juneiro and Northern Railway, and other railways forming the system of the then Leopoldina Railway way Company by a new English company: the new company to allot shares credited as fully paid in exchange for bonds and shares of the old companies at rates set out in the heads of agreement. The heads of agreement were aproved by separate meetings of the holders of certificates representing the different classes of bonds known in London, and the committee was authorised and directed to carry out the arrangement proposed. Upon it becoming clear that possession of the railway would shortly be obtained, the new company was at once registered in London (upon December 6, 1897), with an authorised share capital of £ 5,500,000, and borrowing powers limited to two-thirds of the fully-paid share capital. In settling the financial form of the undertaking they had followed the model of the best Buenos Ayres railway companies. As directors, they had secured the services of three gentlemen to begin with, whom he regarded as the most valuable that could be got — Mr. Edward Herdman, Mr. J. H. Wicks (of Messrs. Jacob Walter & C°. Brazilian merchants), and Mr. Harrison Hodgson, C. F., an engineer of high standing, well acquainted already with foreign railways, who was at that moment i

a railway which was capitalised at only £ 5,000 per mile, and which had on it already a gross traffic of the value of £ 600 per mile per annum, ought to be able to pay well. The conditions were now different. In order to get an estimate from an independent English source, the committee got a report made by Messrs, Livesey. Taking the moderate figures of 1896 (the latest to hand) as a basis, they computed that after certain necessary capital expenditure had been made, and with certain readjustment of rates and fares, they ought at 8d. exchange, to get over £ 800,000 gross, and work the line for 63 per cent. Let them assume that, including the settlement with the Government bank and other creditors, there would, after paying for improvements, be about £ 2,000,000 debenture stock outstanding. At 4 per cent, that would require only £ 80,000 a year, and their engineers thought they might get £ 800,000 gross and £ 206,000 net. It was true that since they estimate was made the exchange had fallen to 6d. The hope was that they would succeed in getting a sliding scale of rates in Brazilian currency — something like what railways had in River Plate. An improved service must mean increased receipts. In any case the English company could count henceforward on getting all that the concern earned and could be made to earn.

With regard to the financial position of the committee, he said they contributed 2s. 6d. each per £ 100 towards expenses. The total sum received was £ 7,152 2s. 6d., being 2s. 6d. per cent. on £ 5,721,700 bonds deposited — that was on nearly all the bonds held, so far as they knew, in England. What few bonds remained on paying the 2s. 6d. Per £ 100. Out of the £ 7,152 2s. 6d. received already the had paid out £ 5,441 17s., and had now a balance in hand of £ 1,710 5s. 6d. There were still considerable expenses to be

on paying the 2s. 6d. per  $\pm$  100. Out of the £ 7,152 2s. 6d. received already the had paid out £ 5,441 17s., and had now a balance in hand of £ 1,710 5s. 6d. There were still considerable expenses to be paid and the committee had arranged with the English company that all sums due by it in excess of that amount were to be assumed by the hormore.

by the comanpy.

Mr. E. Kennedy proposed that £ 2,500 be voted to the

Mr. E. Kennedy proposed that £ 2,500 be voted to the directors for their services.

Mr. Miley seconded, and it was agreed to.

On the motion of Mr. B. Cohen. M, P. (who said that the committee had rescued the property for the bondholders), seconded by Mr. Bruce Gardyne, a cordial vote of thanks was passed to the chairman and his colleagues.

Observing the returns published it is evident that many English Railway Managers in this country have yet to be educated up to the knowledge of what a traffic return really should be, their advantages knowledge of what a traffic return really should be, their advantages and importance. From many lines we have not succeeded in obtaining any returns at all, whilst scarcely any have, apparently, any working expenses, showing nothing but receipts and traffic. Enviable situation! The most important line of all has neither receipts nor working expenses, to judge by its returns, and it is to be presumed carries immense quantities of coffee for purely philanthropic motives, without charge and without expense: Truly we live in a wonderful country! However, we don't despair. Rome was not built in a day and no doubt by pegging away we shall educate the Companies up to the level of, say, the Argentine Republic, where full returns are published weekly of the traffic of all the English lines, not forgetting to include the weekly receipts! we had hoped better things of English Companies:

The PAULISTA Railway Report, however, makes up for many

The PAULISTA Railway Report, however, makes up for many deficiencies and is remarkably complete and up to date. We have received already the figures for the month of January, but hold them over for another issue. The financial movement of the past year shows how solid and satisfactory in every sense the progress of this company really is. No alteration was made in tariffs during the year and the growth of receipts from 19,693:1273 to 22,223:839\$ was the spontaneous result of the growth of traffic, representing nearly 13 per cent in a single year! Unfortunately, the continuous fall of exchange from an average of 9d. during 1896 to that of only 7 45:64 in 1897, depreciated currency to such a degree that although the gross receipts were, as has been shown, 13% more than in 1896, reduced to sterling theyshow a slight inferiority, being about £708,734, compared with £738,483 in 1896, a loss of 4 p. c. That with a fall of more than 14% in the value of the currency, the real value of receipts should have depreciated only 2.6%, indicates indisputably the progressive nature of the traffic. Receipts per, mile per week averaged £22, against £22.17.-9 for 1896. Working expenses estimated in currency were 8 per cent, higher than in 1896, but 7 1/2 per cent less if reduced to their sterling value, the saving of £26,115 thus effected almost counterbalancing the loss of £29,749, in exchange. The balance, after payment of the working expenses of 1897 shows growth of Rs.1,829,856, and, in spite of depreciation its sterling value is only £193 less thau in 1896. The PAULISTA Railway Report, however, makes up for many tiencies and is remarkably complete and up to date. We have

Examining the manner in which the balance has been employed, it becomes evident how the money leaked away, as although the service of debentures was some £7,000 or £8,000 less than the previous year, it took 501:643\$ more of our currency to satisfy it.

The traffic of this line compares most favorably with even the very best Argentine lines the aggregate yearly receipts per kilometer being at the rate of £715 compared with £535 per kilometer for the Buenos Ayres Southern; £923, for the Buenos Ayres Western, and £995 for the Central Argentine with its heavy local passenger traffic, all the rest coming a long way behind.

all the rest coming a long way behind.

The situation of the Pautista Ry, is solid, not even the tremendous depreciation of receipts being sufficient to seriously affect its prosperity. Should Exchange continue to drop, unquestionably, the burden of foreign debt would ultimately affect profits but a further drop of any importance seems to us improbable, if not almost impossible, because either one of two alternatives is inevitable, a composition of some kind in London, or a suspension of payments; and in either case exchange must improve. We regard the Paulista Railway as one othe first if not the first property of the country, and one that will continue to improve for many years to come.

The somewhat meaoure statistics furnished by the Minas and Rio.

will continue to improve for many years to come.

The somewhat meagre statistics furnished by the Minas and Rio, line, do not admit of positive conclusions. Receipts, seem to have fallen off heavily for the two months ending February 28th of the current year being at the rate of £ 8.14/- per mile per week, compared with £ 11.28h, for the same period last year, a fall of 21 p.cent, and the effect, apparently, of the falling off in the up-traffic, mostly imports, common to nearly all the coffee producing districts, whilst the increase of the Central Ry, tariff has also affected this branch as well as the passenger traffic. Nevertheless, this is one of the most promising of the guaranteed lines and has always shown a balance over working expenses, which balance amounted to £ 14,308 in 1896. Concern was undoubtedly overcapitalized as usual with all these The guaranteed railways; but, should things come to the worst, will always succeed in covering working expenses and in earning at least sufficient to cover part of the interest on the 6 % debenture debt of £ 56,000:

The Alagoas Railway shows a falling of in Sterling receipts from £ 5.12sh. to £ 4.3sh. per mile per week, the effect, apparently, of the depreciation of the currency and perhaps somewhat also of the shrinkage of imports and the up-traffic. The total volume of the traffic, however, shows a slight increase, being 53,092, against 51,715 tons last year. This line appears to us to be enjoying a particularly intelligent administration, that is not content to simply clap on rates whenever depreciation of the currency reduces receipts, but endeavours by all the means in its power to foment production in its eighborhood, the surest way of guaranteeing ultimate success. The Company had not in 1896 yet succeeded balancing receipts and expenditure there beingthen an excess of expenditure of £ 31., and its prospects would be far from cheering should the guarantee be stopped, the outstanding debenture debt being about £350,000. stopped, the outstanding debenture debt being about £350,000.

As for the poor D. There G. . . . .

As for the poor D. Thereza Christina, what would become of it with its miserable receipts of 18 shillings and 3 pence per mile per week if the guarantee stopped, it would be hard to say. This is one of those contractors' lines built only to give profit to their financiers. The line was condemned to failure from the start depending absolutely on the Tubarão coal mines for its potential traffic, and their failure involved that of the railway as well. When the line was started the nature of the coal mines was perfectly well known, and that they were not likely to prove profitable; yet in the face of this a company was hanched with a capital of £408,940 between deferred and preferred shares, besides a debenture debt of £255,000, which is likely to prove a total loss to its unfortunate shareholders. It is in view of such outragious negocios that we cannot but regret that English law is not more efficacious in protecting investers, not only against absolute outragious negocios that we cannot but regret that English law is not more efficacious in protecting investers, not only against absolute misstatements in the prospectus, but also against what is held back and is often of far greater importance. To build a line like this trusting solely to the guarantee, and to offer it to the public as a desirable investment, was a proceeding we do not care to define, but that seems to merit something stronger than mere disapproval. The prospects of the line are hopeless, at least for very many years to come when immigration may perhaps have worked marvels in Santa Catharina as elsewhere Whilst there's life there's hope, and that is all the consolation we can afford. we can afford.

The Archiv fur Eisenbahnwesen published by the Prussian Government gives the following as the total length of the world's railways, seventeen times greater than that of the Equator.

A Company of the Comp		Increase
	Miles	_since 1891
Europe	156,224	-since 1891 9.7 %
Asia	26,889	22.1 %
Africa	8,169	/ 25.2 o/o
America	229,723	8.0 %
Australia	13,888	12.7 %
Total	433,963	9.3 °/o

Brazil figures in the total for 8,505 miles and the Argentine Republic for very little more, 9,000 miles.

Mr. Richard Halstead, Messrs. Byer Peacock & Co.'s posident engineer, in Buenos Ayres, is at present in São Paulo on a visit of inspection. The Peacock engines are greatly appreciated in São Paulo, where they have been used for years with the best results on the Mogyana and Paulista lines. In the Argentine, where they are still more popular, there are said to be 400 in use.
