Wileman's Brazilian Review

A WEEKLY JOURNAL OF TRADE, FINANCE, ECONOMICS AND SHIPPING

VOL. 29

RIO DE JANEIRO, 10th. AUGUST, 1936

N.º 6

Notes

Drinks

Imports of Drinks generally into Brazil during May 1936 totalled 457,366 kilos of value £13,898 as against 413,942 kilos and £12,850 during April 1936, and 566,260 kilos and £17,748 during May 1935. Totals to May, 31st, 1936 were 2,046,470 kilos and £63,392 compared with 2,328,580 kilos and £73,433 during the same period of 1935. (See Statistical Tables).

Motor Trucks

Brazilian imports of Motor Trucks during May last totalled 506 units, as compared with 913 during April 1936 and 1,038 in May 1935. Ford is again at the top of the list, with 204 Trucks, followed by Chevrolet with 150, and International with 80. (See Statistical Tables).

The weekly session of the Federal Council of Council of Overseas Trade was held Overseas Trade on Monday last under the presidency of Minister Sebastião Sampaio, Dr. José Carlos de Macedo Soares, Minister of State for Foreign Affairs, attending.

The weekly subject matter, which was extraordinarily long, included; Memorial from São Paulo interests in the cotton ginning trade, soliciting either the liberation of exchange on exports of raw cotton or the re-establishment of the 35% official exchange quota on cotton seed oils and cakes, etc.; Communication from the Brazilian Consulate at Kobe, reporting on the institution of an organisation for the increment of importation of coffee, cocoa, mineral ores, and other products, from Latin-American countries; Further communication from the same Consulate relating to the possibilities of introducing Brazilian products into Japanese markets in view of the commercial war existing between that country and Australia; Telegram from the Governor and Commercial Association of Pará, soliciting the liberation of exchange on exports of Pará (Brazil) Nuts, shelled; and other matters.

Minister Sebastião Sampaio, in his Director's report for the week, mentioned the telegrams received from the Bahia and Sergipe State Chambers of Propaganda and Commercial Expansion and other commercial entities regarding the tour of the Secretary of the Council, Consul Aluizio de Magalhães. Communications received from this representative of the Council have dealt with several matters of importance on which interested parties had appealed; these are, — the registry of sales of cotton to German importers with the Banco do Brasil; licences to import tobacco, cocoa and hides into Germany, under the terms of the recent provisional agreement; reduction of the visa fees on certificates of origin covering Bahia exports to Poland; insufficient facilities, especially by rail, for effective transport of Sergipe goods; tariff protection

for cocoanut flour, in order to increase the consumption of the product, exports to Singapore still being considerable. The emissary of the Council also informed that the Governors of the two States he had visited (Bahia and Sergipe) had backed up the respective Secretaries of Agriculture in the declarations made at the meeting of the Council in Rio, by signing Decrees revising the basic operation of the State Chambers of Propaganda and Commercial Expansion, which are calculated to afford excellent possibilities of collaboration, both with the mother-organ in Rio and with other State Chambers. It is to be hoped that Governors of other States still to be visited will follow this initiative.

Sr. Raul Leite suggested the adoption of several measures for the protection of the salted hides export trade, and solutions of the appeals of Bahia and Sergipe interests as submitted by Consul Aluizio de Magalhães, Minister, Sampaio mentioning steps already taken. The possibility of reduction of the official exchange quota on salted hides on an experimental basis was discussed at some length.

In the order of the day, the Council accepted the motion of Sr. Eivaldo Lodi on the report of Sr. Lennhoff Britto relating to the Custom's duties on amianthus fibres. Sr. Lodi moved that the appeal of the national factories was justifiable, and that the matter be submitted to the consideration of the Superior Tariff Council with the suggestion that the rate should be modified in order to provide a stimulant to the development of the national manufacturing industry, without detriment to the extraction of the raw material in national mines.

The motion of Sr. Victor Vianna approving the programme for the projected National Exhibition to be held in 1938 as submitted by the Permanent Commission of Fairs and Exhibitions, was also passed. The Commission proposed the date of inauguration as March 15th, 1938, plans of outlay, etc., being duly tendered for approval.

Sr. Souza Mello spoke on the question of priority of rights of national vessels to carry coffee to overseas ports, moving that the petition of the Lloyd Brasileiro in this connection was amply covered in the project of law which passed the Council in October last, and which is at present waiting final ratification in the Senate. Sr. Lennhoff Britto moved that the tariff on imported wooden manufactured articles should be extended to cover wooden parts for sewing machines. The original tariff includes only sewing-machine covers, cases, etc., and the motion is the result of a petition from Merrrs, Cia. Gropp, of Blumenau, who suggested that the national timber and woodwork trades would be much benefitted if a protective measure such as this were applied. Both the above motions were passed.

Final acts included the nomination of two Commissions, the first to attend Sr. Alvaro Maia, Governor of the State of Amazonas, and present the compliments of the Council; the second to represent the Council on the embarkation of Sr. Alberto Boavista, Director of the Exchange Department of the Banco do Brazil, on his leaving for Europe on leave of absence.

In regard to the petition of the São Paulo cotton gin-

★ THE LINE OF COMFORT - SERVICE - COURTESY ★

ners mentioned in the weekly subject matter, the Commercial Association of São Paulo has requested all and any concerns interested to express their opinions in the respect, in accordance with the terms of the new regulations controlling petitions for modifications of exchange quotas.

"Drawback" Decree N.º 994 institutes the application of the "drawback" system in the collection and refund of custom's dues. The system had been admitted by a previous Decree some five years ago, in the early days of the Provisional Government, and had been duly confirmed as law by the Constitutional Government on coming into power last year; despite this, the actual application of the policy only comes into force now. The Decree authorising this provides for the remission of Custom's duties on imports of prime necessity to national industry, such necessities being considered as goods which are necessary to the transformation of national produce into articles of world-wide trade, and all articles necessary to the packing, packaging, and general presentation of national goods in an acceptable form. It will be remembered that this matter was much discussed in the Federal Council of Overseas Trade. Goods strictly excluded are those which are the basic raw materials of any industry, and any products which can be obtained from national sources, or of which there is an ample national supply for home consumption.

The system will be controlled by the competent Department of the Custom House, (the Comissão de Similares) operating through the Ministry of Finance. An import quota for each article eligible for application of draw-

back privileges will be fixed by the Department annually, which may be modified by the Department in conjunction with the Minister of Finance.

Importers immediately benefitting from this system are those bona fides concerns or individuals partaking in the export or manufacture for export of goods considered of suitable quality. Interested parties will be required to lodge applications stating that all their imposts, taxes, and other dues are paid up to date, the amount of their Capital, locality of offices or factories, condition of the machinery, whether he or they have previously exported, and if so in what quantity and to what destinations. Also, it will be necessary to submit lists of goods which the party or parties wish to import, and in what quantities, couched in the customary terms of the tariff, stating whether the goods are for industrial application, or for packing, conditioning or other such purpose. The lists for application, which will be opened at once, are renewable annually, without limit, and will be published in the "Diário Oficial" periodically.

Importers, on paying Custom's duties, will be required to notify in writing that the goods involved are imported subject to the drawback conditions. After payment in full of all duties, the vouchers will be processed in the ordinary manner, with the exception that payments will be considered as deposits refundable against proof of re-export of the goods concerned.

Exporters will be required to produce full information covering the importation and payment of Custom's dues of the goods or appurtenances or packing etc., at the time of re-export, and only when all such documentary evi-

dence is satisfactorily produced will a Custom's Inspector be article to examine the exports concerned; provided this Inspector passes the goods, the refund process will be commenced without delay, but in exceptional cases, where identification of the original imports may not be clear, experts may be called in.

Refunds will be effected against the presentation of all the documents and vouchers covering the original importation, and those involved in the re-exportation. If the articles exported are afterwards re-imported, the quantity so re-imported will be subject to restitution of refunded drawback duty payments, meticulous inspection of these re-imports being made to ensure that the goods are those which were previously imported and exported.

Rigorous methods of control of the goods imported are provided, involving daily balances of stocks, import, export, and production figures, duties paid and drawback refunds received, etc. Penalties are naturally very severe: infractions in any form or manner incur forfeit of drawback refunds on export, recurrence involving cancellation of special licence and the consequent privileges. Attempts to avoid payment of duties will be considered as conducting contraband activities, and processed as such, subject to the full penalties of the criminal laws of the country.

By the institution of this excellent measure the Government has opened up almost incalculable possibilities for the increment of Brazil's foreign trade. The greatest difficulty against which Brazilian fruit, for example, has had to fight is the infinitely superior appearance of the product of other countries, simply and solely due to the packing and method of presentation of the goods on the market. It is to be hoped that exporters even this season will be able to make use of the drawback privileges and export their fruit attractively packed; it will be highly gratifying — not to say comforting — to watch prices for Brazilian oranges soar towards the end of the season. There is also the question of exports of eggs — the special packing demanded by the law governing this product is very costly, but backed by drawback refunds, exporters will be much protected, and trade possibilities enlarged.

Looking even further ahead, facilities are opened up for the export of finer and rarer fruits — tropical delicacies necessitating the most elaborate packing and conditioning — guavas, mangoes, passion fruit, ripe pineapples, and some of the more unusual citrus fruits which have never yet been heard of outside Brazil.

Underground Railway

A proposal to build an underground railway serving this capital has aroused considerable interest locally.

The project was submitted by Sr. J. Alcantara, on the plans of Dr. Raymundo Pereira da Silva, who has been studying the matter since 1929; the backing is by American interests, as yet undivulged, though it is proposed to deposit the sum of nine hundred thousand Contos of Reis with the Prefecture of the city immediately on the acceptance of the project. According to the plans, the terminal in the city would be at the Esplanada do Castello, just off the Avenida Rio Branco, the three first routes to be opened being to Copacabana, the most luxurious residential suburb, Cascadura, the last suburban district inland, and the Governor's Island, the largest island in the harbour, though as yet very undeveloped. It is extraordinary that no line is projected to Niteroy, Capital of the State of Rio de Janeiro, which is at present served by the ferries of the Companhia Cantareira, about which there has been so much debate both here and in London recently.

As far as can be ascertained, nothing definite will be decided in this connection until a complete report on the project is tendered. If this is considered feasible, the matter will be submitted to the vote in the Municipal Chamber, which will be the final word.

Cotton

Classifications of cotton in the State of São Paulo during the period July 15th. to 31st. totalled 104,024 bales, amounting to 17,918,537 kilos, which gives a total during the season to date of 794,524 bales, and 137,619,500 kilos, compared with 407,475 bales and 68,707,660 kilos for the same period last year. Lengths of fibre varied between 28 and 32 millimetres.

The new regulations for classification are welcomed in cotton circles. These regulations, compiled at meetings of the various Secretaries of Agriculture at present in conference in this Capital, provide that cotton for local consumption within the State may be classified by State organs, though all cotton for export will be compulsorily classified by Federal entities. Uniformity of the exported product is thus satisfactorily ensured, and is perhaps the most reliable means of guaranteeing satisfaction on world markets.

It is announced that the Prefecture of the city of Cam-

pinas, São Paulo, has determined to enforce the destruction of all surplus cotton at the end of the season, as also of all plants which show the slightest trace of blight or pest of any sort. This measure will be carried into effect immediately on the completion of the present harvest, and though considered rather sweeping by some, is perhaps to be approved in Brazil, where stocks are inclined to accumulate beyond all control. Cotton is benefitting from the experience of coffee and sugar — the trade will take no risks with the "white gold".

D. N. C. Two Resolutions of the Departamento Nacional do Café were published last week, Nos. 6/341 and 6/342, on the

4th. August, both dealing with despatches of coffee from the Interior to ports of shipment.

Resolution No. 6/341 modifies Article 13 of the despatch regulations; this Article read:

"In all cases where coffee despatched or delivered in the DNC QUOTA is apprehended due to inferior type to that permitted by the Departamento Nacional do Café, the corresponding RETAINED QUOTA shall also be apprehended until the delivery of a new remittance of coffee in the DNC QUOTA under the exigencies of this Regulation.

Para. 1) The Departamento Nacional do Café shall concede a term of 120 (one hundred and twenty days), improrogable, from the date of the ADVICE OF APPREHENSION, for the delivery of the new DNC QUOTA.

Para. 2) The term of 120 days established by the previous Paragraph having expired, the Departamento Nacional do Café shall sub-divide the RETAINED QUOTA apprehended into two parts:

a) 70% (seventy percent) as DNC QUOTA, acquired under the conditions of letter b) of Article 2 of the present Resolution.

b) 30% (thirty percent) to be liberated at a suitable occasion in the chronological order of the original despatch".

The modification provides that the D. N. C. will only deliver the coffee on eventual liberation against indemnisation of freight by the despatcher, within one hundred and fifty days from the date of apprehension. Once this period of tolerance has expired, the coffee will be forfeited, becoming the property of the Department without recourse.

Resolution No. 6/342 deals with the special Preferential Quota of coffee eligible for premiums under the fine coffee campaign incepted by Resolutions Nos. 6/334, 335 and 338 in April last. It is emphasised that these preferential coffees, like all other despatches, are rigorously subject to the requisites of Resolution No. 6/337, of the 1st. July, regulating the 1936/37 crop. A special provision is made whereby fine coffee will be "rushed" subject to the signature of a bond of responsibility guaranteeing that respective D.N.C. quota is in perfect compliance with the regulations; should the contrary prove to be the case, the party in question will be called upon to fulfil his obligations, i. e. to substitute the inferior quota within the period of one hundred and twenty days from the advice apprehension of the corresponding Preferential coffee, after the expiry of which period the Preferential Quota will be sub-divided into two parts — 30% to be considered as ordinary D.N.C. quota in the terms of the regulations of July 1st., the remaining 70% to be liberated in due course, against indemnisation of freight charges, within one hundred and fifty days from the date of apprehension. Should this operation not be forthcoming the Preferential quota will be encamped by the Department, without recourse. The Departamento Nacional do Café will hasten the classification of D.N.C. quotas corresponding to Preferential coffees as far as possible.

Aviation & Air Mail Services It is deeply distressing to hear of the death of the pilot and crew of the "Airfrance" mail plane, which crashed in the Pyrenees. Gaston Genin, Officer of the Legion of Honour, the Pilot, was one of the pioneers of the South American service, being the first pilot to fly on this run on the night service; he flew a total of 8,500 hours odd. Albert Aubert, wireless operator of the plane, was also one of the leaders in the service, having assisted in the perfection of flying with poor visibility and landing "blind". Roger Savarit, navigator, was one of the most up-to-date flyers in the service, being specialised in modern aerial navigation. In this disaster, the "Airfrance" has lost three of its most popular and faithful men — three more names on the roll of honour of the great air services of the world.

Meantime, while the "Airfrance" mourns, Panair is justifiably jubilant, for two reasons. The "Trinidad Clipper" broke the record from Buenos Aires to Miami, making the whole trip in forty-four and a half flying hours. Then there is the exchange of letters between H. E. Dr. Getulio Vargas, President of Brazil, and Mr. Cordell Hull, United States Secretary of State, in mutual accord that the inauguration of the new services of the Panair is a step towards still closer commercial relations between the two countries. A case of "hats off" obviously!

The daily air service to São Paulo was inaugurated in Rio and São Paulo last Wednesday, many personages of note being present, among whom were Dr. José Carlos de Macedo Soares, Minister of Foreign Affairs, representatives of the Chamber of Deputies and the Senate, Dr. Herbert Moses, President of the Brazilian Press Association, Dr. Luiz Pizza Sobrinho, Secretary of Agriculture of the State of São Paulo, and others. The passengers from Rio included Dr. Marques dos Reis, Minister of Transport and daughter, Dr. Trajano F. Reis, Director of the Department of Civil Aviation, and twelve others. The plane, the "Cidade do Rio de Janeiro", left at 8.30 a. m., and returned at 5.0 p. m.; the "Cidade de São Paulo" left the Paulista Capital at the same time, arriving in Rio at 10.0 a. m. Despite the success of the first two flights, the Company has decided to postpone the regular services until the landing fields at the termini are in better condition, as they are not considered safe to the heavy planes.

The indent of the Department of Civil Aviation for an extra sum of three thousand Contos for construction of the new airport at this city has been passed by the Minister of Transport, as also the sum of two hundred and seventy Contos for improvements to airports throughout the country.

Petroleum

There has been a marked absence of either interest or activity in the petroleum researches lately, it being surprising, therefore, to hear that operations in the north — States of Alagoas and Goyaz particularly, — continue without interruption. A telegram from Joazeiro, State of Bahia, to the President of the Republic, announced the fact that oil had been struck in that district, the well gushing strongly. To crown everything, it is announced in Porto Alegre that a Company is being floated with a capital of eighteen thousand Contos of Reis for the exploitation of the national petroleum industry, the whole sum having already been subscribed by Brazilian, Argentine and Uruguayan interests. red not long ago with a large headline proclaiming that a pure kerosene spring had been found. It is noticeable that

THIRTY FIVE YEARS AGO

Extract "The from Brazilian Review" of August 13th. 1936

— Assays of the argentiferous lead ores from Ypiranga show that whilst rich in lead, (78%), the yield of silver is almost inappreciable.

Minas — A Joint-Stock Company with a Capital of 2,300,000 francs has been organised at Brussels for working the Gold Mines of Tres Cruzes, near Ouro Preto, as also those of Falcão, Bananal Grande and Venda do Campo. These properties were sold to the new Company by Dr. Archias Medrado for 300,000 francs cash and 1,500,000 francs in fully-paid shares. It is to be hoped that no difficulties as regards titles will crop up as they generally do after the business is signed, sealed and delivered.

— The Government of Minas is contemplating legislation as regards mining rights, but as it is claimed in some quarters that mining legislation corresponds exclusively to the Union, perhaps it would be better to settle this initial difficulty before going any further.

São Paulo — At a meeting of farmers and stock breeders at Franca, São Paulo, it was resolved to constitute a Company under the denomination of the Companhia União Pastoral, to act as agents for the sale of stock and do away with unnecessary intermediaries. The tendency towards co-operation in São Paulo is very distinct.

— 36,000 immigrants arrived at São Paulo during the first half of the current year.

The Legislature of Amazonas has approved a law reducing duties on Rubber to 20% of which 33% are payable in kind, and authorising Government to receive the whole in kind, and authorising Government to receive the whole in kind if necessary, as also to negotiate a loan with guarantee of the Rubber received by the Treasury, which, it is said, will be handed over to a Syndicate in Paris with which the Governor is in negotiation. This has caused great sensation, and the Associação Commercial has called a meeting to protest.

— Coffee loaded during the crop up to August 9th., — 1,477,705 bags.

this paper has kept extraordinarily quiet on the matter ever since; not another word has been printed on this extraordinary occurrence.

Further to the fourteen provisional Brazil's Foreign Trade Agreements signed by Brazil as mentioned in last week's columns, the Foreign Office concluded other agreements by exchange of notes with Cuba, Poland, the Union of South Africa, Italy, Spain, Chile, Venezuela, Belgium, Holland, Egypt, and Turkey, all of which are provisional, and merely provide that existing relations shall be maintained until such time as new and permanent agreements are ratified between the countries concerned.

The Belgian and Dutch notes provide for the maintenance of the previous understandings, and the unbroken operation of the unfreezing of commercial credits in Brazil.

LONDON FINANCIAL POSITION

July 31st. 1936

Very little change has taken place of late in South American securities, for the effect of recent developments have been almost entirely restricted to other departments of the Stock Exchange. Spanish Fours have given way a few points this week for the first time since the revolt broke out. The situation in that country does not improve, and there is now rather more apprehension that the clash between the existing communist, or Front Populaire Government and the Fascist Party may have serious repercussions upon European politics generally. In this connection there is a not unnatural disposition to talk about Italy. In some quarters there is an inclination to exaggerate the significance of the abandonment of Continental holidays by the King and the Prime Minister.

Excluding foreign politics and their possibilities — admittedly a very important qualification — the outlook is favourable. Improved economic conditions here are indicated by the fresh high record reached by the note circulation of the Bank of England, which also holds a record large amount of gold, having effected further large purchases during the past week. Although the ostensible purpose of the gold acquisitions, which now aggregate practically £41,000,000 since the beginning of the year, is to strengthen the metallic cover of the note issue there is little doubt that they also represent a decision to enlarge the basis of credit thus enabling the outside Banks to finance a more active trade movement.

A rather important development is that the British Government will guarantee a credit of £10,000,000 for Soviet Russia, the amount to be spent in the purchase of English goods. This may be regarded as a step towards the restoration of world trade, but holders of Russian Government and municipal bonds who have received no interest since the revolution in that country and see their securities quoted at rubbish prices must regard the news with rather mixed feelings.

The outlook in France is not regarded hopefully. Apparently the flight of capital from the country has been arrested —, not so much because of a restoration of confidence, but more perhaps because of the stricter measures adopted to check the movement — and gold is returning to the Bank of France, but so far the issue of bonds in small denominations has been only a modified success. The amount subscribed is less than £20,000,000 and this total probably includes very little of the £800,000,000 of money that according to official estimates is hoarded by the French people. Moreover, it will scarcely enable the Government to proceed with its ambitious scheme of large public works. The present situation would probably have been reflected in a fresh depreciation of the currency had it not been for the stringent measures to check purely speculative operations in the exchanges. On the surface the market for francs is steady, but the chances are that a fresh crisis will be experienced if the issue of "baby" bonds proves to be a failure.

Recent developments have been favourable to our securities. The piling up of gold by the Bank of England is interpreted as an assurance of the continuance of cheap money, and consequently gilt-edged stocks have been firm. This market has also been helped by the successful resumption of municipal borrowing after a fairly long interval, but the fact that in one case a loan of £750,000 was covered about 28 times must be largely attributed to applications by "slags" — professionals who only subscribe for

the purpose of snatching a market premium.

Agreement has been reached between the railways and the major local authorities regarding the assessments of the former respecting local rates for the next five years. As also, the interim dividend announcements have been satisfactory the market for Home Rails has displayed much greater strength. There has been profit taking in various industrials induced by the approach of a holiday period, but the market is really very firm. Stimulating influences recently were the decision to build a sister ship to the "Queen Mary" and the placing of orders for two new battleships.

In certain directions the industrial activity is so intense that the supply of skilled workmen is inadequate, and it is reported that large orders for machine tools have been placed in Germany. Obviously the more our rearmament programme is accelerated the sooner will come the inevitable reaction, but nobody appears to worry about that yet awhile. Little attention, either, is given to the rising tendency of commodities which in time must affect manufacturing costs and our ability to compete in foreign markets. The railway companies, however, are already feeling the influence of higher prices. Incidental to the boom-like conditions now prevalent is the activity in new capital issues of an industrial character, but this movement may be less pronounced during the coming holiday period.

LONDON PRODUCE NOTES

LONDON, July 31th. 1936

SUGAR — The feature of the sugar market was the continued steadiness of prices for both refined and raws, and the absence of any wide movements in the terminal section. Refiners have drawn steadily on contract supplies, but were apparently reluctant to add materially to their reserve stocks. There has been, however, some inquiry for near deliveries of foreign raw sugar and parcels changed hands at 4/5¼d, per cwt., c. i. f. For delivery after September, demand was slow. In the terminal section business was only moderate but, with a certain amount of covering, values were steady. Some 30,000 tons of Mauritius, 99 per cent. Oct./Feb shipment were sold from 8/7½ to 8/9¼d. c. i. f.

RUBBER — Very quiet conditions ruled in the rubber market. Price movements were small and values on balance showed no change. Apart from a fair inquiry from the Continent for supplies afloat and near, trade demand was limited. The statistical position continued to improve, stocks in the United Kingdom being further reduced by 2,599 tons. On July 25 the available supply was returned as 114,376 tons compared with 173,108 tons a year ago. Recent inactivity viewed in conjunction with the decline in stocks suggests that when business assumes more normal proportions after the holidays in this country, higher prices can be confidently anticipated.

COFFEE — A moderate business was done in the private contract market for coffee, including foreign cleaned hold Costa Rican at 70s. per cwt. Diminishing spot supplies resulted in only small offerings at auction and the catalogues represented reprints for the most part. A fair inquiry was made for new crop Kenya coffee at advancing prices. Brazilian types eased slightly at one time but recovered.

COCOA — In the cocoa market values were upheld although business was practically at a standstill.

TEA — The cheaper grades of Indian tea at auction received good attention and made firm prices but in the case of medium descriptions which were not so much wanted, declines of a farthing to half-penny per lb. were frequently accepted. The lower grades of Ceylon tea also met a good demand and, although at one time medium grades could be bought at farthing to half-penny reduction, the sales finished with the loss fully recovered.

JUTE — The fibre markets commenced the week with a very quiet tone but gradually steadied and latterly a fairly substantial business was put through. Japanese buying of Manila hemp was reported and values in this market rose about 15s. per ton. Advices from Calcutta reporting

Messrs. K. & S. Husseindjian, Commission Agents and Representatives, of Cairo, Egypt, are interested in representing a Brazilian firm which supply **Corned Beef in Tins**. This concern already represents Messrs. Costa Penna & Cia., of Bahia, (Brazil).

Full address — K. & S. Husseindjian, Boite Postal 599, Le Caire, Egypt.

fair activity, a better understanding between the associated and non-associated mills regarding working hours, and limited imports into Calcutta, all contributed towards a firmer jute market here and values gradually advanced. Speculative buying accounted for a fairly large proportion of the sales, but trade absorption was not lacking. End of the month settling at Calcutta, together with profit-taking, caused slight recessions, which were reflected here, but values were 10s. higher on balance.

TIMBER — At auction moderate supplies of Tabasco and Lagos mahogany met with active competition and higher prices were realised. The Tabasco was of large average dimensions but somewhat shaken; the Lagos was of medium to large sizes and chiefly in good condition. The Nigerian Sapele was of large average widths but principally of faulty character, including a few figured logs and fitches. Tabasco, round, sold at 5½d. to 11½d.; Lagos at 4d. to 12d.; Nigerian Sapele at 3½d. to 11½d.; British Honduras cedar at 6½d. to 17d. per foot.

FRUIT — Oranges; Brazilian were in shorter supply and realised higher prices; South African were fairly plentiful with prices about steady. Brazilian, Peras, 150,14s.; 176,14s.6d.; 200,15s.; 216,15s. to 15s.3d.; 252,16s.3d.; 288,17s.6d.; 324,15s.6d.; 360,15s.; South African, Navels, 96,10s.6d. to 11s.6d.; 112,11s. to 12s.; 126,11s.9d. to 14s.; 150,12s.6d. to 16s.3d.; seedlings, 112/176, 10s.9d. to 12s.9d. per box. Grapefruit; South African 8s. to 13s.9d. per box Bananas; Canary 11s. to 16s. per crate; Brazilian 6s. to 7s., and Jamaica 6s.6d. per dozen. Arrivals from Brazil last week included 41,000 bunches of Bananas and 21,000 boxes of oranges.

HIDES — The market was firmer for dry River Plates with 6¾d. to 6¾ paid for B. A. Americanos and 7d. now asked. Sales included Cuyabanos at 6 3/16d., Saltas at 8¾d, and Chubuts at 6¾d. per lb. Other business covered dry Bahias at 6½d. to 6¾d and in W/S Brazils, Barretos ox at 4 3/16d. per lb. Nigerians sold at 8d, and Mombasa seconds at 5¾d. Africans and Australians were about steady.
