Notes

The following are the considerations on which the resolution taken at the Bogotá Coffee Conference were based.

After what appears to have been a very short session for so important an occasion, the Bogotá Coffee Conference closed on Saturday. The following and the considerations on which the resolutions taken were based:

1) That for some years prices prevailing for coffee on foreign markets have not been remunerative to the growers;

2) That besides the low prices, the foreign trade has suffered from the effects of speculation, resulting in a complete uncertainty as to future prices which is a grave difficulty to the importing roasters and the American producers alike.

3) That it is desirable from all points of view that the price of coffee should be established at a level which, without being prejudicial to the consumer, will protect the roasters against possible losses and permit of the growers receiving a proportionate equitable remuneration suitable to their standards of living, thereby increasing the purchasing capacity of the producing countries to the ultimate advantage of the industrial coffee consuming countries.

4) That it has become necessary and just that all producing countries in America should actively co-operate in the efforts which Brazil alone has made hitherto in order to maintain equilibrium of prices, by sacrificing a part of their crops, an effort which the other producing countries expressively recognise to be a measure of benefit to the entire coffee industry.

In consideration of the above points, the American Coffee Conference resolved:

That the entities represented at this Conference would compromise themselves to furnish their active co-operation and employ every effort within their power to sustain the prices of their respective coffees, on a level corresponding to that fixed for Brazilian coffees, which will be taken as a basis. They will also bring into play the means and resources at their disposal to maintain on the internal markets of their countries prices which correspond to the quotations abroad, allowing for the overhead charges involved.

No mention has been made throughout the Conference of any measures to control production, and it must be assumed that this matter is considered beyond the control of world Conferences. However, if the resolution above is carried into effect there is room for little doubt that speculation at least will be effectively controlled, and the coffee market which for so long has been one of the most sensitive, will be more or less in the hands of the Conference growers.

The coffee writer of the "Diário de Notícias" again succeeded in obtaining first hand comments from the President of the Departamento Nacional do Café, who, although he refused to divulge any further information than that already contained in the press communication, as this had been agreed upon by the Conference, Sr. Souza Mello declared that there would be a ratification of the resolutions at a plenary meeting to be held in Washington during the second week of November next. Conference of producers will probably be held from time to time to the first of which has been fixed for September 1937, to meet in Brazil. The President of the D. N. C. declared himself as immensely satisfied with the successful outcome of the Conference.

— A Notice of the Department published on Wednesday last stated that the coffee of the D. N. C. quota must be delivered in bags which, although they may be well used, must be sufficiently strong for effective service, all unserviceable bags being subject to refusal of acceptance.

— A further notice published by the Department reported on the offers received from producers for the purchase of second and third hand coffee bags of which the Department had a large stock. It appears that only one offer was accepted, at a rate of 2\$500 for second and

— Conversations between Sr. Mussolini and the Brazilian Commercial Attaché in Rome are said to have bordered on the reduction of the excessively high import taxes on coffee imported into Italy; this is the rumor at present current in coffee circles locally and commercial circles in Italy.

— A movement for the reduction of coffee import taxes is also reported from Vienna; as the Brazilian product practically monopolises this market, there are strong possibilities of an increase in consumption in this centre.

Samples Fair

The inauguration of the Ninth International Samples Fair of Rio de Janeiro took place on Monday last with the usual brilliant ceremony. The

President of the Republic, attended by members of his Cabinet and the foreign diplomatic corp, performed the opening function, afterwards making a short tour of the grounds. Five military bands enlivened the proceedings.

— The pavilion of the Ministries contains a novel feature in a number of large graphs and drawings showing the development of various branches of industry, commerce and agriculture throughout the country, operated by the Government and private interests.

— A number of pavilions and stands had not yet been completed; the Argentine House was inaugurated at an equally brilliant ceremony on the 16th., by Sra. Getulio Vargas, and a strong contingent of the Argentine diplomatic corp and colony, together with a number of exhibi-

tors of that country who are on a visit to this city.

— The exhibition of paintings and sculpture is the centre of much attraction, as has been noticed in previous years; this year several works by famous Brazilian artists are on show, such as Rodolpho Amoedo's "Eros", and five or six of Henrique Bernardelli's canvasses.

— The National Press has installed a very imposing stand in the pavilion of the Ministries, showing the development of the Brazilian printing industry; this stand will show visitors that contrary to the usual belief, high class printing can be done in Brazil.

— The twenty-third annual Cattle Fair held under the auspices of the Cattle Breeders Association was opened last week in Bagé, State of Rio Grande do Sul; this is one of the most important exhibition of this type in South America being surpassed only by one Argentine show. Uruguayan and Argentine exhibitors attended this year as usual, which has greatly enhanced the attraction.

— Following the improvement campaign which the present Minister of Agriculture, Sr. Odilon Braga, introduced on his nomination to this post, the State of Alagoas has voted a verba to cover the institution of twelve agricultural inspectorates in that State for the coming year. These inspectorates will operate in co-operation with the Department of Vegetable Production of the Ministry of Agriculture.

— The President of the Republic has submitted a message to the Federal Chamber of Deputies communicating the exposition of motives of the Minister of Agriculture regarding the enforced fiscalisation of the seed selling

trade, which is at present subject to no form of inspection whatever, with the result that some-so-called seeds are of doubtful origin and destination. The measure, which will involve no extra expenditure by the Ministry, is the subject of much debate.

Agriculture Communications have been received from various sources in Europe reporting on the very much improved condition in which Brazilian citrus fruit is arriving at destinations, and prices have certainly been more steady this year than last. There can be no doubt that the stringent regulations enforced by the Fruticultural Services of the Ministry of Agriculture is responsible for this. It is now announced by this Ministry that the orchards of the Baixada Fluminense, (lowlands of the State of Rio de Janeiro) which is the chief producing zone of citrus fruit in the vicinity of the Federal Capital, are to be completely expurged on the termination of the present crop, only those growers having certificates of expurgation being permitted to export next season. It is hoped that this measure will be carried out throughout the State of Rio de Janeiro, and the Federal District but this may not be possible after this season's crop. The Secretariat of Agriculture of the State of São Paulo has already commenced expurgating orchards in that State.

— With a view to improving the viniculture industry of the State of São Paulo, a tour of the growing regions of Minas Geraes was recently made by Paulista experts, who will submit a report on their visit. The Ministry of Agriculture maintains an experimental vineyard at Poços de Caldas in the South of Minas, and a similar institute may be contemplated for the State of São Paulo if the tour of the experts proves satisfactory.

— The Seed Week held at Bragança, in the State of Pará, some three weeks ago proved an unqualified success hitherto unequalled by any other Seed Week in the country. No less than 112 exhibitors were registered, which is a high record.

Aviation & Air Mail Services An extension of the Condor Syndicate air service to Florianópolis in the interior of the State of Piauí will commence operation shortly, landing grounds and agencies having already been completed. This extension will be 530 kilometres in length, and commencing at Parnahyba, will make stops at Porto Alegre,

João Pessoa, Miguel Alves, União, Therezina (the State Capital), Amarante and Florianópolis. Planes will leave Parnahyba on Sundays, and return on Wednesdays, thus making connection with the Condor services operating up and down the coast on the regular flights.

— Statistics divulged show that the "Hindenburg" maintained an average speed on her North Atlantic crossings of 130 kilometres per hour, sometimes attaining 300 kilometres. 3,800 kilos of freight were carried, 4,500 tons of mails; total number of passengers on the Atlantic voyage was 1,307, and the distance covered was slightly under 250,000 kilometres. Official statements show that the Zeppelins are particularly suited to the North Atlantic service, with the consequence that the regular crossings will be repeated next year, this year's schedule having expired. The "Hindenburg" will make three South Atlantic crossings before the end of the current year.

— Brazil was thrilled and delighted to hear of Miss Jean Batten's spectacular Australia flight, and amazed at the 24 hour lowering of the record; Miss Batten endeared herself to Brazilians on her flight in November last year, and consequently has a proprietary right to the lasting affection of the country at large.

— The Department of Civil Aviation has requested the Department of Ports and Navigation that steps be taken for the removal of the gasoline and inflammables disembarkation port, as this causes serious delays and much inconvenience to the seaplanes which make use of this portion of the harbour. This refers to the barges of the several petroleum Companies operating in Rio de Janeiro, which unload to the tank trucks at this point.

— The contract between the Government of the State of Minas Geraes and the Pan American Airways for the Rio-Bello Horizonte service has been signed, the subsidy being 500 contos of reis per annum. The company has undertaken to open up the Bello Horizonte to Uberaba line, and that to Theophilo Ottoni.

— The Prefect of the Federal District has submitted a message to the Municipal Chamber calling the opening of a credit of fifty contos of reis to provide prizes for touring aeroplane races, which will presumably be part of the Flying Week annual festivities.

— The Minister of Finance has remitted to the Chamber of Deputies an exposition of motives for the opening of a supplementary credit of three thousand contos of

Central do
Brazil Rly.

The "Jornal do Commercio" reports that rumours are current that the Director of the Central do Brazil Railway contemplates the possibility of instituting a fund or bank for liquidating the debts of the railway employees. Presumably, the employees would refund to the bank at low interest rates on installments; this would be a great stride towards a closer tie between the Directorate and the workmen which would probably have excellent results.

— A further train for the Railway arrived during last week, consisting of a locomotive unit and two passenger coaches. There may be running trials before the end of the month, but this is considered unlikely, and will not be of an official or definite character.

— A serious outbreak of fire took place in the locomotive and waggons sheds of the Railway at Engenho de Dentro, due to a short circuit in the lighting system, which set light to some inflammable paint. Three coaches were completely destroyed, and five others suffered severe damage; a large stock of timber and other materials was reduced to cinders, the total losses being estimated at four hundred contos of Reis. There was fortunately no loss of life.

— The President of the Republic has sanctioned a special credit of six thousand contos of reis for the electrification of the Central do Brazil Railway, the necessary steps having been taken in regard to the routine credit operations involved.

The weekly session of the Federal Council of Council of Overseas Trade was held on Wednesday last, in lieu of Monday as this was a holiday last week. The President of the Republic presided, and the Ministers of Foreign Affairs and Agriculture attended, together with the full complement of Counsellors.

The weekly subject matter was particularly long last week, the main items of which were as follows: letter from the newly founded Chamber of Propaganda and Commercial expansion of the State of Parahyba, covering a representation of an exporter soliciting permission to export to Germany 6,000 tons of cotton against payment in compensation marks, the sale of which was closed prior to the prohibition date; petition from a Rio de Janeiro exporter requesting authorisation to export 6,000 tons of cotton to Germany with payment in compensation marks; letter from a Curitiba, Paraná, concern advising that director of the firm was proceeding to Poland shortly and requesting advice from Council in regard to the propaganda of Brazilian products in that country; official communication from the National Agricultural Society remitting a report on timber, pointing out the necessity for the standardisation of the national timber trade, as consistent complaints had been received from overseas importers that the shipments were not in accordance with samples of specifications; telegram from the Matto Grosso representative in the matter of the creation of the National Matté Council, communicating the approval of the project as submitted to the Council by Minister Sebastião Sampaio; a similar telegram from the Matté Institute of Paraná, affirming approval with slight modifications; like telegram from the Santa Catharina Institute congratulatory telegram on the same lines from the National Agricultural Society; letter from a Rio de Janeiro concern suggesting that a most-favoured-nation be concluded with Ecuador similar to that signed

recently with Chile; Telegram from the Chamber of Propaganda and Commercial Expansion of the State of Ceará requesting that steps be taken for the enforcement of the German-Brazilian agreement, in view of the fact that Ceará exporters have as yet been unsuccessful in selling low types of cotton to that country; letter from the Matté Institute of Paraná requesting that exports of this commodity be permitted in volumes of 2½ kilos without the obligation of official exchange quota deliveries; and other matters.

Counsellors Raul Leite and Euvaldo Lodi spoke on the matter of a telegram from the Commercial Association of Pará requesting information in regard to the progress in the Council of a petition for the reduction of the official exchange quota incident on exports of shelled nuts, the President of the Republic replying that the resolution of the Council had been approved, whereby the quota will be reduced from the present 35% to 20% only.

Sr. Arthur Torres Filho read a long report on the importance of rural colonisation in the interests of the economic development of Brazil, mentioning the social and political aspects of the subject, and accentuating the fact that a semi-feudal system has built up a form of monopoly of the vast interior of the country.

The most important item discussed in the order of the day was the project for the creation of the National Matté Council, as proposed by Minister Sebastião Sampaio, Executive Director of the Council. Sr. Euvaldo Lodi presented a few amendments, and it was decided that the matter should be discussed at a further meeting of the united Chambers of the Council, the final voting thereon probably taking place at the regular meeting on the following Monday, i. e. today.

The Council finally approved a motion of Sr. João Maria de Lacerda, approving the request of the Belgo-Brazilian Chamber of Commerce in Brussels, that a quantity of coffee be despatched thereto as a bonus aid, provided this coffee is distributed for consumption on the express understanding that it is of Brazilian origin. Further, the motion of Sr. Raul Leite was approved, in that the suggestions of the Cotton Conference of the Japanese Colony should be distributed among the cotton producing States.

It will be noticed that the figures of the foreign trade statistics contained in another part of this week's Review show differences of 64,514 contos of reis, £505,656 gold, and £836,610 paper. These modifica-

tions are the result of an alteration in the figures taken as a basis for the coffee statistics which are now supplied to the Directorate of Economic Statistics by the Departamento Nacional do Café, and not, as hitherto obtained from the export manifests.

Lloyd Brazileiro

The new navigation programme of the Cia. de Navegação Lloyd Brasileiro which will be inaugurated shortly calls for the collaboration of many of the Company's existing lines. The European service and those from Manaus to Buenos Aires, Rio de Janeiro to Laguna, Lagoa Mirim and Matto Grosso (by river) will not be modified, but the old service to Sergipe and the interior will be substituted by a line from Penedo (Alagóas) to Porto Alegre, alternating with another line from Belem to São Francisco.

Many of the minor ports of call will be omitted from the new programme, and a few voyages per year have been reduced. The schedules of the Company have been approved by the Department of Ports and Navigation.

Pan American Union

The Division of Agricultural Cooperation of the Pan American Union has commenced the publication of a new series of excellent articles on Cooperatives, which, printed in Portuguese as well as English, will prove very useful to progressive Brazilian agriculturalists and business men of any foresight.

The first of this series is entitled "The Philosophy of Co-operative Marketing" by E. G. Nourse, forms a fitting introduction to a system as yet in its infancy in Brazil; the subject is viewed from a practical angle and the man-in-the-street will find no difficulty in understanding this question, which has probably had its complicated aspects to his mind. The second of the series, "The Cooperative Sale of Californian Fruit" is particularly applicable to Brazil, and no modern grower or exporter should lose the opportunity of reading this booklet.

The Pan American Union periodically publishes booklets of this nature, and full information in the connection can be obtained direct from the Union, the address of which is: Pan American Union, Division of Agricultural Cooperation, Washington, D. C.

We trust our readers will avail themselves of this occasion to obtain first class ideas on their own problems from one of the most famous of the recognised authorities on American national and international matters.

LONDON FINANCIAL POSITION.

LONDON, October 9, 1936

The financial world has settled down more to the altered conditions produced by the devaluation of European currencies, but naturally there is no indication yet that stability has been reached. Temporarily rates are considerably influenced by a repatriation from London of foreign balances which were sent here partly to secure an exchange profit when devaluation was announced, and partly for reasons of safety. The movement has involved purchases of French francs and American dollars, the latter more particularly, and consequently has meant a depreciation of sterling which is reflected in a rise in the London price of gold to the highest point for fully a year. Very large amounts of this metal have been dealt with in the open market of late, a considerable portion representing de-hoarded gold. Part has gone back to France, but much to America, shipments to the latter country this week having amounted to £7,000,000. It is certain, therefore, that the U. S. total will attain a new high record, and it has been intimated that if necessary, it can reduce the gold content of the dollar to 50 per cent of its pre-war value. The London Money Market has been quite uninfluenced by these developments. The discount rate for three months bank bills is no more than 9/16 per cent; the Government can borrow on 3 months Treasury Bills at below that figure, and the clearing banks can get only ½ per cent for their loans to Lombard Street against the best security. At a dinner given by the Lord Mayor to the bankers of London, the Governor of the Bank of England mentioned the enormous reduction in the amount of bills covered by the London discount market since pre-war days — the result of the shrinkage of trade.

The aggregate deposits of the 11 London clearing banks in September reached the new high record of £2,256,638,000, the amount showing an increase of nearly £11,000,000 compared with August last. Investments are also larger, and there is a welcome increase of £5,000,000 in the advances — an indication of greater trade activity.

Remarkable firmness has been displayed by the Stock Exchange for some time past, and the buoyancy has scarcely been checked by the threat of action on the part of Soviet Russia because certain countries have not fulfilled their undertaking of non-intervention in the Spanish affair. France takes a serious view of this, but Germany is inclined to abuse Moscow. Gilt-edged securities are quieter largely because interest, and especially speculative interest, mainly centres in home industrial shares where boom-like conditions are prevailing. The strength of this section is based on the exceptional trade activity at home and the hope that as a result of the tripartite currency agreement there will be a recovery in international trade. The movement received a fillip from an optimistic speech of the Chancellor of the Exchequer at the dinner mentioned above. In this he indicated that industrial activity in this country is not solely due to the house building or rearmament programmes, while he saw no indication of an early check to the process of recovery. Despite this, it is very doubtful if the rise in prices is justified. To some extent the buying is of an investment character, and with the market supply of shares quite small this has a somewhat abnormal effect upon quotations.

There is also a strong speculative element in the movement, in which respect it bears some resemblance to the Industrial share boom of 1928-29. There is, however, this important difference, that whereas 7 or 8 years ago the rise in prices was largely in the new and unproved un-

undertakings, now the movement largely centres in shares of well-established, sound and financially strong concerns, such as Triplex Safety Glass, Turner & Newall (Asbestos), British Oxygen, Imperial Tobacco, Vickers, John Brown and the like. Shares of miscellaneous engineering companies benefiting from rearmament and the iron and steel revival have also been pushed up, and some of these concerns a year or two ago were not known to the investing and speculating public, although for the most part they can show a satisfactory record of past results. A danger is that worthless or doubtful undertakings will be floated in order to take advantage of the present exceptional conditions, so that ultimately the public will lose money as they do in most booms.

The revival in Argentine Rails received a check from the disappointing Buenos Aires Great Southern and Buenos Aires Western dividend announcements. The former is paying nothing for the past year on its 6 per cent preference and only 1 per cent on the 5 per cent stock, while the Western Co., though paying in full on the 5 per cent preference, is cutting down the dividend on the 4½ per cent stock from 2¼ to 1 per cent. Prices have naturally reacted sharply, but of course still show a big rise on the year. Brazilian Rails have kept up very well, and there has been almost sustained firmness in Brazilian Government bonds. For a time the demand was chiefly for the low-priced issues, which were bought on the theory that if economic conditions in the country show a further improvement, the bonds are worth higher prices because of the good yields from the reduced interest rates now being paid, while next year, of course, the percentages will be larger. Afterwards the demand extended to the Funding loans, which naturally are the safer purchase. Such things as San Paulo 6 per cent 1928, São Paulo City 6 per cent, Rio de Janeiro 7 per cent 1927, Colombian Sixes and Peruvian Corporation issues have also appreciated, and there has been an inquiry for Uruguayan loans. Bank of London & South America shares have risen well. To some extent, probably, the rise is due to purchases induced by a belief that securities which have been heavily depreciated will be affected by the stronger hope of world recovery.

Altogether Stock Exchange business is exceptionally active, and the belief that it will continue to be good for a considerable time to come is indicated by the quotation of Stock Exchange shares at a record high figure, and the rise in the price of "nominations" for membership to about £1,500 or £1,600.

THIRTY FIVE YEARS AGO
EXTRACTS FROM THE BRAZILIAN REVIEW
OF OCTOBER 22nd 1901

Local Items We are glad to note that according to latest telegrams Mr. Santos Dumont's recent experiments with the air ship of his invention, have been entirely successful. He has unquestionably a right to the "Deutsch" prize. www

— The Committee on Public Works reported favourably on the concession of a railroad between this city and Nitheroy. According to this project the two cities will be connected by a submarine tunnel, and an electric railway constructed, to run through the latter.

— There are again many complaints raised against the scarcity or complete want of water in different parts of the city. This should be looked into by the Authorities as a lack of water, especially at the present time, might be of serious consequence.

Minas Geraes By the President of the State a concession was ratified for the construction, use and enjoyment for the term of 50 years of a railway from Guaxupé, in the district of Passos, to the left bank of the Rio Grande river.

— Samples of wheat grown by Italian colonists in the district of Tapera have been on exhibition at the office of the "Pharos" of Juiz de Fora.

Bahia The new lighthouse of Belmonte, in this State, was inaugurated on the 12th. of this month.

— In view of the critical situation of the Sugar industry the State government has made a temporary reduction in rates on the Santo Amaro railway.

Pernambuco In consequence, it is said, of the extremely low price of milho (corn), farinha and other food stuffs in this State, plantation wages have fallen to 800 reis per diem.

São Paulo The Light & Power Company has not yet established electric traction on the Araça line on account of the general strike in the United States in consequence of which some of its orders have not been filled. It is expected that the line will be opened to traffic at the beginning of next month.

LONDON PRODUCE NOTES

LONDON, October, 9, 1936

SUGAR — The week has seen some further adjustments in Continental currencies, but these have had no adverse influence on the London produce markets. Generally the tone has been better and there are hopes that when the new values of the currencies settle down, some relief will be afforded from the restrictive influence of quotas and tariffs which have been built up during the past few years by some countries.

The sugar markets have, rather surprisingly, been firmer and two increase of $1\frac{1}{2}$ d per cwt. was in refined sorts although demand was not very good. The rise has followed the higher prices for raws, which has been due chiefly to the reserve of first hand sellers, especially of Cubans, and refiners paid $4\frac{1}{4}\frac{1}{2}$ d. per cwt for basis 96 per cent Oct/Nov. shipment. The appreciating United States dollar has also helped this market. It must be remembered, however, that the season of the year is one where there is the maximum pressure from the new crops from Empire sources while the local and Continental beet crops are now being harvested. Mr. F. O. Licht's first estimate of the 1936/37 beet crop puts the European production, without Russia at 6,862,000 tons and Russia at 2,250,000 tons, compared with 6,502,852 and 2,600,000 tons respectively a year ago. The chief European exporting country, Czecho Slovakia, showed a considerably larger production at 775,000 tons against 563,446 tons, and this is of some importance in the futures trend of sugar prices. That country is one of those that have, this week, devalued their currency, and this places exporters in a better competitive position for shipments abroad. The present price of sugar, however, is hardly an inducement, and the tonnage of beet that will be ground into sugar for human consumption by that country is awaited with some interest. The Java sugar selling agency has raised their prices to fully offset the devaluation of the guilder, so that there is no change in the position in the East.

RUBBER — There has been a good demand from the Continent for plantation rubber, while America has also sent along more orders. Smoked sheet, spot, sold up to 7½d. per lb. the highest prices recorded since the restriction scheme started. The Netherlands East Indies Government has again raised the export tax, so that the native producers receive no more for their rubber than before the devaluation.

COCOA — The cocoa market has continued strong and prices showed an improvement of about 2s.6d. per cwt. on the week. There is a persistent demand in the United States for actuals and with first hand sellers rather reserved, the firm market is expected to continue. There is talk of 40/- per cwt. cocoa in the near futures, while the present price is around 36/6.

TEA — Demand for Indian teas was rather quiet and the tendency was generally easier, especially for medium Orange fanning and Broken Orange Pekoes. Common Ceylons were in good demand, but light liquoring broken Orange Pekoes were easier. Fine teas showed improved quality and made corresponding higher prices.

JUTE — The Government of India has decreed that the restriction of the next jute crop will be three-sixteenths, based on the 1934 acreage. Last year the restric-

tion was one third. The market was little influenced by this announcement and after minor fluctuations, closed steady at £17.5.0 per ton for first marks, new crop. Oct-Nov. shipment, c. i. f.

TIMBER — A satisfactory demand was experienced for mahogany and with the market bare of first-hand supplies, prices were firmly maintained. Fair quantities of teak sold readily and Japanese oak had a steady trade at full recent rates. Values of softwoods remained firm and a feature of the market was the late shipment of Russian stocks this year. Owing to the advanced prices of all Baltic timber, considerable attention has been diverted to the Canadian market and a large business was transacted in British Columbian pine and Western hemlock.

FRUIT — Oranges had a fair demand at easier prices; Brazilian, boxes, 126,14s.6d to 15s; 150,15s. to 16s; 176,16s. 6d. to 17s; 200,18s.6d; 216,18s.6d; 226,18s.6d. to 19s; 288, 19s. to 20s; 324,20s.6d; 360,19s.6d. to 20s; South African, Navels, 125,15s.9d. to 16s.3d; 150,13s. to 16s.6d; 252-324,15s. to 17s.3d; Vallencias, 11s.9d. to 19s. Bananas had a steady trade; Canary 10s. to 16s. per crate; Brazilian and Jamaica 6s.6d. to 7s. per box. Grapefruit was easier; South African 9s. to 13s.6d.; Jamaica 8s.6d. to 12s. per box. Imports from Brazil last week included 46,000 bunches of bananas and 67,000 boxes of oranges.

HIDES — In the hide market prices were occasionally dealer with Capes advanced on Italian buying; dry firsts selling at 8½d, and seconds at 7 3/8, and D/S at 7d. and 6d. respectively. Dry River Plates showed little change with B. A. Americanos at 7½d; B. A. Becerras at 7½d, and Sierra Cordobas at 8d. to 8½d, per lb. Nigerians and Bombasas sold well on the Continent, but business in Australasians was slow.

THE "SOUTH AMERICAN JOURNAL" and Brazil & River Plate Mail

(Established 1863)

This weekly paper has for long been the recognized organ for Latin-American affairs. It covers all aspects, makes a special feature of trade and finance, is free of any Government or other control and deals with Brazil in a fearless but friendly manner, bringing a long experience to bear upon any subject.

Circulates throughout the countries of Latin-America, Great Britain, the United States, Europe, Japan, etc.

The prepaid terms of subscription are 40/- per annum in Great Britain 45/- per annum elsewhere.

Communications respecting advertisements or subscriptions should be addressed to: —
