RIO DE JANEIRO, JULY 7th, 1891.

THE ministerial changes announced by decrees of the 4th instant have no importance so far as the policy of the government is concerned. The action of Dr. Americo Braziliense in permitting his nomination for the treasury portfolio to stand until his election as governor of São Paulo was secured, served to delay the reorganization of the ministry which was decided upon a long time ago. The final decision of this gentleman not to accept the nomination left the treasury department without a head, Minister Araripe having been transferred to the department of justice. By the nominations of the 4th Barão de Lucena is transferred from the department of agriculture to the treasury and Dr. João Barbaho Uchôa Cavalcanti is transferred from that of public instruction to that of agriculture. of the 4th instant have no impor-Uchôa Cavalcanti is transferred from that of public instruction to that of agriculture. For the moment the vacancy in the department of public instruction will be filled by Dr. Antonio Luiz Affonso de Carvalho. In all probability the policy which has governed the department of finance under the administration of Councillor Araripe will be continued under his successor, while the dominating influence of Barão de Lucena in the cabinet is sure to insure a continuance of his conservative policy in his old department. Whatever new blood is introduced into the cabinet, therefore, will be in the less important departments, where no change of policy can exercise where no change of policy can exer much influence on the country at large.

It is worthy of note that the minister of agriculture appointed a commission on the 30th ult. "to proceed with necessary investigations for the purpose of clearly knowing which are the railways acquired by the Companhia Geral de Estradas de Ferro, the manner in which the concessions have been made, the capital represented by effect of these incorporations, and if the fiscal dues have been paid, or not, relative to the concession of property rights." The operations of this company have been on so large a scale and with so slight a regard for results, that this interference has become a necessity. The interests of the state by virtue of its interest guarantees are large and are directly affected by the apparently reckless administration of that company. Then, too, the public has a right to know, both as shareholders and patrons, what is being done with so valuable and necessary a property. As an applicant for one of the largest loans known in railway administration, loans known in railway administration,

-The 4th delegate of police finds that the charges against Dr. Vicente do Espirito Santo for seducing a girl attached to his household and then forcibly a grr assume to us nouselloid and then forcibly marrying her to a man who was paid for the service, are sufficiently corroborated to warrant prosecution. The crime is one that ought to be prosecuted and punished to the extremity of the law—but will it be?

—The Jornal do Commercio of the 2nd says that Brazil is to be divided into seven military districts, the first embracing Amazonas, Pará, Maranhão and Pianhy, with headquarters at Pará; the 2nd, Ceará, Rio Grande do Norte, Parahyba and Pernambuco, with headquarters at Pernambuco; the Jardy, Bahia; Sergipe and Alagoas, with headquarters at Bahia; the 4th, S. Paulo, Minas Geraes and Goyaz, with headquarters at S. Paulo; the 5th, Paraná and Santa Catharina, with headquarters at Curityha; the 6th Rio Grande do Sul, and the 7th Matto Grosso, And Rio de Janeiro and Espirito Santo? -The Jornal do Commercio of the 2nd says that

GOLDSTONE-At the S. Sebastião hospital of yellow fever on June 18th, SIGISMUND GOLDSTONE, aged 25 years.

GRAF.-PETTYS.-At the S. Sebastião smallpox hospital on June 28th, of yellow fever, JAMES M. GRAF, aged 43 years, and EDWIN J. PETTYS, aged 40 years, both natives of the United States and employés of the Baldwin Locomotive Works.

The practice of inoculating new residents of Cuba and other tropical countries with yellow fever conveyed by mosquito bites, has been con-tinued by Drs. Finlay and Delgado, of Havana, for ten years. They now report completed observatious on 52 cases of mosquito inoculation, in only 8 per cent. of which was yellow fever contracted in a well marked form, with a mortality of less than 2 per cent. Of 65 monks, who arrived in Havana and lived there under similar conditions, 33 were inoculated and 32 were not, only 2 of the tormer having well marked attacks, in neither cases fatal, while there were 11 severe cases among the uninoculated, and not less than 5 deaths. -Par Star and Herald.

## FINANCIAL NOTES

- —The "Alto Mearim" factory for making yarn, etc., was advertised on the 2nd. Capital 1,000,000\$.
- -Brazilian 4 per cents were quoted at 731/2 in London yesterday.
- -Barão de Lucena took formal charge of the Treasury yesterday.
- -The Companhia Nucleos Agricolas e Indus trines was installed in S. Paulo on the 30th ult, Its capital is 4,000,000\$.
- -On the 30th ulto, the last payment of the purchase money of the English Bank, £375,000, was made by the Banco de Credito Universal.
- -The governor of Rio Grande do Sul has issued a decree for converting the 7% bonds of that state into bonds of 6 °/0.
- -The Empreza Geral de Melhoramentos has acquired the concession for establishing five burges in Santa Catharina.
- -On the 4th the Jornal do Commercio says it was authorized to state that the Geral railway loan would be granted a quotation on the London Stock Exchange and probably on those of the Continent
- -The Rio public has been very much surprised Gondoriz was in that city charged with a financial mission. The appointment had never been publicly announced.
- -The Bolsa was held for the first time in the mew room on the 30th. There is plenty of space, which was wanting in the old quarters, and there is now an official report of the transactions distributed, which was also necessary.
- -The dividend of the Banco do Brazil for the —The dividend of the Banco do Brazil for the first half of the current year is at the rate of 20 per cent, per annum; and the Banco Pariz e Rio also distributes to its shareholders a similar dividend. The handsome profit made by the Bank of Brazil on its sale of the right of issue to the Banco da Republica explains its dividend, but that a bank hardly out of swathing clothes can pay 20 per cent. dividends also should cause some bankers to stroke their beards.
- On the 15th ulto. the Treasury returned to the On the 15th ulto. the Treasury returned to the S. Paulo argency 426,000\$ in notes of the Banco União de S. Paulo with orders to have them changed for funds current in Rio, because the agency of the bank here declined to change these notes. This is simply ridiculous. It is known that the Banco União and the present government are at "loggerheads," but for the Treasury to cast discredit on the S. Paulo bank's issue is illegal. These notes are legal tender at the S. Paulo Treasury agencies, and should be disbursed there, but if this cannot be done, there is no solution for the difficulty but keeping the notes until liabilities in S. Paulo arise.

Sovereigns sold at 13¾430, and closed with buyers at this price, sellers at 13¾400 for cash and buyers at 13¾500, up to the 15th. For Brazilian gold 145½ % was bid, and 148 % asked.

july 4.—The banks opened at 1754 on London, which was advanced by the Pariz e. Rio to 1734 early in the afternoon, and the market was fairly steady at the close. Commercial and the market was surify steady at the close. Commercial sterfing was quieted at 17½, (7 ± 1½) and 17½, and repassed paper was also done late in the day at this last quotation. There appeared to be very little doing. Brazilian gold sold at 147%, and sovereigns closed at the Bolsa with buyers at 138630, sellers at 138670, for cash.

July 6.—The banks opened at 175% on London, but with-drew this in the afternoon, when the rate for business was 1732. A demand for remittances against dividends due up to the 10th was said to have caused the "slump," up to the 10th was said to have caused the "slump," and for later steamers better rates were obtained. Some inflience thank paper, but of excellent quality, was done in the menting at 17½, at which rate repassed was to be had in the afternoon. Commercial sterling 17½—18 Soversegns closed with buyers at 13859 for cash, sellers at 138680, and buyer at 138400 up to the 3181.

Coffee. - There was a fair amount of business doing during e past week, sales amounting to about 40,000 bags, and the arket ruled steady all along. Receipts have increased arrly and stock at last begins to creep up to something like

smartly and stock at last begins to creep up to something like normal figures.

We hardly suppose that anyone interested in the trade will recall with regret the crop year which closed on the 30th tilto. Since the first of the year the whole trade must have been of an unsatisfactory character to all in the business and the plantiers alone can rejoice for they have received very high prices in currency, with which to reduce their obligations occurred when these were considerably more in gold. It is, to be sincerely desired, that the year now commencing will show a great improvement on the preceding; but we are infortunately beginning the season with high prices.

#### Imports.

There has been a fair amount of business doing for the past week. Flour is quiet and rather lower, a moderate quantity has arrived. Two cargoes of Pitch pine, both on order, and a considerable quantity of White pine have arrived. Pine at about last quotations: all the recorpts have been disposed of Kerosene is unchanged and firm; the receipts have been considerable. Lard is lower and flat. Codfish is steady and receipts moderate. Turpentine has again advanced. Hay is lower for cargoes. Gernan cement is quoted higher, but other qualities are lower. Two large cargoes of Rice have come in, to dealers, and quotations show no change.

and as a debtor to an enormous amount, and as a debtor to an enormous amount, this company occupies a position where a single false step may precipitate a fatal crisis upon the country. In view of this and of the interests involved, it is clearly the duty of the government to inquire into the gal standing of the company and into its financial administration. And let us hope that the inquiry will be made thoroughly

**А**LTHOUH inquiries have been made in congress in regard to the contract for the socalled sanitary improvement of this city, we fail to see that anything has been done in regard to those other jobs whose influence upon the appearance and well-being of the city are quite as problematical. The socalled port improvements scheme proposes to construct a permanent obstruction in the to construct a permanent obstruction in the bay which can not fail to be prejudicial to health, and to run a freight railway through the most thickly settled part of the city. The interests involved in this scheme are so The interests involved in this scheme are so great, and may be so prejudicial to the city, that an inquiry is clearly a public duty. The filling in of the shore line between the arsenal of war and the Gloria hill is another scheme also which demands some degree of investigation. While it may be admitted that certain benefits are to be derived from this work, it should be considered that there is some danger of undertaking too much by carrying the shore line too far out and of spoiling the whole effect of the improvecarrying the whole effect of the improvement by a bad arrangement of streets. This work might be made a genuine improvement and a benefit to the public, but the appearances now indicate that the company holding the concession is considering one belief only — the area reclaimed. If the object only — the area reclaimed. If the public is to be deprived of the present shallow beaches, where so many find opportunities for bathing, it has an unquestionable right to demand a public benefit in return. The filling in of the S. Christovão shore line is an improvement, however, about line is an improvement, however, about which there will be no question. The health of the city requires it, and the only point to be raised is that of the street plans and water front. In a general sense also the reconstruction of the business section of the city which is now in process of execution, is a public work and demands a large degree of official supervision. In large degree of official supervision. In view of the fact that it gives an opportunity for widening and straightening the streets, and for the execution of various sanitary improvements, the authorities ought to have taken charge of the work at once in order to secure the advantages and benefits to which the public has an undoubted right. This opportunity, however, is being lost through the apathy and neglect of those who have been charged with the adminlost istration of municipal affairs. It is a pity that this opportunity, which may never occur again, is being lost. The sanitary condition of the city is steadily growing worse, and the streets are becoming insufficient for the rapidly increasing traffic. Some needed improvements may yet be secured, and no time should be lost in taking necessary steps to that end.

THE report of the retiring minister of finance, which was published on the 3rd instant, has necessarily attracted much attention, as it is the first real attempt in that direction since the revolution. Although it does not give an altogether satisfactory view of the situation, the business-like character of the document and the conservative tone of the document and the conservative tone which characterizes it have produced a generally favorable impression. While Councillor Araripe has not made a brilliant finance minister, he certainly has made a safe and conservative one. He has not been led away by half-digested theories and absurd schemes like his predecessor, nor has he showed a disposition to advocate that most dangerous policy of anticipating that most dangerous policy of anticipating the development of the country which has led to so much indebtedness and disaster in other countries. According to the tables furnished, he estimates (for the returns are normshed, he estimates (for the returns are not all in) the receipts for 1890 at 185,924, 105\$777 and the expenditures at 239,228, 118\$801, showing a probable deficit of 53. 934,013\$024. For the current year he estimates mates the receipts, exclusive of deposits, which ought never to be considered a part of the revenue, at 204, 103,000\$000, and the expenditures at 233,585,738\$056, showing a deficit of 29,482,738\$056, which ing a deficit of 29,482,738\$056, which deficit he reduces by 4,745,000\$000 by treating the net deposits as a part of the revenue. Of course, these estimates do

not include the extraordinary obligations incurred by Minister Glycerio, which may not become effective this year and whose amount it is not easy to estimate. serious charges are contained in this repoet which affect the assets of the treasury—ont against the Banco da Republica for failing to restore a commission amounting to 222, 222\$222 on a credit arranged in London in 1889 by the Conde de Figueiredo, and the other against Dr. Salvador de Mendonça, minister to the United States, for failure to account for a balance of about \$1,000,000 on money sent to him for the purchase of silver. Both of these charges will undoubtedly be explained in due time and it is regretable that so much publicity is given to them. The statement of the public debt them. The statement of the public debt of the country is incomplete, and the total can not therefore be given. The foreign debt shows a small reduction, its total now being £30,048,500. The currency circulation on June 3rd was: Treasury issue 171,081,414\$; bank issue, 266,035,060\$; total, 437,116,474\$. The claborate arrangement made for the redemption of the Treasury issue seems to have been wholly ignored by the banking monopoly established by Sr. Ruy Barbosa. On the whole, the report has created a very favorable im-pression among business men, who are not ignorant of the difficulties encountered by Minister Araripe, and who do not hesitate to commend the conservative course which he has followed in refusing to ally the national Treasury to the speculative ideas current on this market.

#### THE HOSPITAL.

In order that no time may be lost in building a strangers' hospital in this city, for which a propaganda was begun last year we desire to inform our readers that the work has again been taken up with the purpose of carrying the scheme into practical effect, if possible, before the next hot season. A subscription paper will be circulated at once in order that funds may be obtained for the purchase of a site whenever a suitable one is found. It is desirable, therefore, that our friends should at ble, therefore, that our friends should at once decide upon the sums which they propose to give—which we trust will be most liberal. A TALK ABOUT BRAZIL.

A TALK ABOUT BRAZIL.

The Baron de Gondoriz of Brazil arrived in New-York last Saturday on the steamer Finance. He is at the Victoria Hotel. He received Monday a cable dispatch from Pará which told him that he had been appointed Financial Commissioner of Brazil to the United States and Europe.

The Baron said to a Times reporter Monday that he had not received full instructions as to his work as Commissioner. He should study the financial systems of America and of several European countries and on his return to Brazil make such recommendations as might seem wise. The government would consider this report in determining the future financial system of the republic. He did not know the precise ground that he would cover.

mining the future financial system of the republic. He did not know the precise ground that he would cover.

"The money of Brazil is now gold and currency," he said, "In this respect the transition from an empire to a republic made little change. Up to the time of the formation of the new government all debts were payable in gold con. Expert duties and other debts are still payable in currency. Now the import duties are payable in gold con. Export duties and other debts are still payable in currency. This currency is based on the pledge of the government. Sometimes it is worth more than gold. With exchange on London at 27 pence per milreis the currency is at par, and I have seen exchange higher than that.

"The republic of Brazil is now fairly settled and anxious to adopt those principles of government which have proved advantageous in other republics. It is to the American republic more than to any other that Brazil looks in its transition stage. You have Republicans are now in power, having elected Fousca to the Presidency by a vote that included three-fourths of the voters in the republic." "Who may vote in Brazil?" The Baron was asked.

"Any man twenty-one years old who can read

"Any man twenty-one years old who can read and write. The voting is by a secret ballot. The slips are selected by the voter, placed in a sended envelope, and when the voter's name is called his

slip is deposited in a box.

"There are very slight differences between the two parties. The questions of financial policy, of tariff or free trade, and other questions which are issues between the two parties in the United States do not enter into politics in our country. The Republicans, however, who are in power now, are in favor of reciprocity in trade with the United States. The Democrats are opposed to it. The subject is so new with us, however, and so many questions have arisen in the organizing of the new republic that the question of benefits has not been much discussed.

"There is little for the two parties to contend for except the offices. We do not know what civil service means, but the appointive offices are all filled by representatives of the dominant party."

"There is a third party, known as the Catholic party, which was organized by the priests, but it is small and cuts very little figure. Our legislative bodies are much like those in this country. We have a sational Senate and a national House of Deputies, corresponding to the two houses of the American Congress, and each State has its own legislature, like those in this country.

Baron de Gondoriz is the managing director of a company that deals in rubber. His company is not only the leading one in Para, handling more than all other Brazilian companies, but it owns at the present time three-fourths of all the rubber in stock in the world.

"The total stock is about equal to the demand. The crop this year is greater than it was last year, and no advance in prices is likely. Our stock is worth laid down in New York, 85 or 90 cents a pound, duties and freight paid. The export duty from Brazil is 21 per cent. Of this 12 per cent, is leviced by the state from which it is taken and 9 per cent, by the general government.

"The condition of Brazil indicates a season of prosperity. Much depends on the crops, although there are some mines there there that are being worked. These are chiefly gold, and are not very extensive. The greater portion of our

RECIPROCITY WITH BRAZIL.

Washington, June 4.—The actual results of a reciprocity arrangement with Brazil are just now occupying the attention of Representative Bynum, of Indiana, who stood chatting with friends in the Ebbitt House Tuesday night. Mr. Bynum does not believe that there are any advantages, and he proposes soon to incorporate some of his ideas into a magazine article. His papers will bristle with new facts about Brazil, and will open the eyes of many who, he says, have been blinded by the idea of reciprocity. When he undertakes to show that of the 14,000,000 people in Brazil only 150,000 are in a position to buy anything from the United States; when he points out that the cost of freight, insurance, exchange, and inability to give long credits effectually bar the Brazilian markets against American manufacturers; and when he undertakes to prove that the people of the United States are actively engaged in increasing the wealth of Brazil without receiving due return, he expects to rub some of the glittering polish from what he calls the romance of reciprocity.

—The Argentine radicals under the leadership of Dr. Leandro Alem refuse to accept any compro-mise and propose to nominate candidates of their own for the presidency and vice-presidency.

—Charges have been published in London to the effect that ex-President Juarez Celman and Dr. Wilde accepted a bribe of 8 millions for sign-ing the sanitary improvements contracts for Bue-nos Aires. The accused are threatening to pros-ecute the paper in question for libel.

—The Catamarca and Santiago del Estero revo-lutions seem to have collapsed without much of a struggle. The indications are that the rising was one of ambitious politicians, rather than one of the people. The politicians will hardly fight, but when the people are heartily tired of being swindled and plundered they certainly will fight.

ACCORDING to the returns of the British consul general at Havana, the sugar crop in Cuba for 1890 amounted to 645,894 tons, against 526,439 tons in 1889. Of molasses, the total product was 111,422 tons, as compared with 101,695 tons in 1889. The exports of sugar to Europe from the 1st of January to the 31st of July, 1890, consisted of 701 boxes and 66,960 foogheads, equaling 49,365 tons. The exports to the United States during the same period were 51 boxes and 570,843 hogsheads, equaling 395,012 tons.

## LEGISLATIVE NOTES

JUNE 29. — Senate. — Senator Esteves Junior moved that the government be requested to furnish information in regard to the alleged establishment of colonies in Santa Catharina territory by the governor of Parana. The bill for compiling the foreign coins, were discussed. Chamber of Deputies. — Deputy Garcia Pires spoke in regard to matters in Bahia and Deputy Serzedello moved that the government be requested to inform the house what law had authorised the expenditure of public money with the burial of the Archbishop of Bahia and the grant of 100,000\$ for a hospital and 50,000\$ for a public garden in Pernambuco and the privilege for building the Metropolitano railway in this city.

JUNE 20.—Senate.—Senator Coelho e Campos

JUNE 30.—Senate.—Senator Coelho e Campos spoke in regard to the election of governor in Serijee. He declared that he considers the election invalid and that he will advise his friends to make use of legal resistance to the usurping governor. He i ppeals to the President of the republic not to irritate the people with acts of anarchy, that will destroy its behef in the new institutions of the country. The bill for compiling the fiscal legislation of the country and that for giving circulation to foreign coins, were both voted in 1st discussion.—Chamber of Deputies.—Deputy Custodio de Mello reproduced the motion that had been offered and withdrawn by Deputy Serzedello in regard to the affairs of Pará. The attempted revolution in that state was, he says, a struggle for liberty and similar outbursts may be expected in other parts of the country. For the blood shed in Pará President Deodro is responsible. The eyes of the best part of the nation are fixed upon congress, which is expected to save the country from the calamities that threaten it. He foresees the time when the people, disappointed in its hope of obtaining the blessings promised by advocates of republican institutions, will in its range follow the example of the French people in 1793, with consequences that it is impossible now to foretell. He thinks that a law regulating the responsibility of the President of the republic should be voted without delay. Deputy Fores da Cruz spoke on the subject of the affairs of Rio de Janeiro. Many members of the legislature of that state, he said, either have contracts with the governor or are asking for them. Deputy Gost Anchahod introduced a bill fixing the pay of senators and deputies at 50\$ per diem. Deputy Gost Anchahod introduced a bill fixing the payof senators and deputies at 50\$ per diem. asked whether the sessions of the committee should be secret. It was decided to authorize the committee to act as it deemed advisable in regard to this. Com. aidtees on the army and navy, accounts, and fin ance and industry were elected.

JULY 2.—Sencte.—A communication was received from the minister of the interior in answer to a request for information in regard to the affairs of Goyaz. The minister states that the acting governor issued a decree for postponing to Nov. 15th the meeting of the constituent assembly; but that some of the members of the assembly met afterwards in a private house and without observing the proper formalities promulgated a constituetion. Awaiting the legal meeting of the constituent assembly on the date fixed, the government, he says, has been informed that public tranquility has not been disturbed in the state and believes that the rights of the citizens and the provisions of the constitution will continue to be respected. The Senate voted a motion of Senator Amaro Cavalcanti asking the government for information in regard to the number of sovereigns sold and the profit made by the government for information in regard to the number of sovereigns sold and the profit made by the government on the sale. It also voted motions presented by Senators Coelho e Campos, José Hygino and Americo Lobo at previous sittings. A bill was introduced for regulating powers of autorney and contracts.—Chamber deeded to accede to the request of the Senate for the appointment of joint committees for reporting on an electoral law and a law for regulating the responsibility of the President of the republic. The election of the standing committees was concluded.

JULY 3.—Senate.—Senator Ruy Barbosa moved that measures be taken to fill the vacancies in the Senate for the specific manner of the specific profits of the Senate for the Senate of the Senate for the Senate of the Senate for the Senate of the Senate of the Senate for the Senate of the Senate for the Senate.

motion on the ground that it encroached on the jurisdiction of the governors of the states. The author of the motion defended it by saying that the action of the governors depends on a communication of the senate informing them of the vacancies in this body. These vacancies are not officially known until they are recognised by the Senate.—Chamber of Dephuize.—A stormy scene was caused by a violent attack by Deputy Caetano de Albuquerque on Deputy Zana, who, in a letter addressed to Latino Coelho, had made some severe strictures on republicanism and its methods in Brazil. In the midst of this there ensued an alteration between Deputies José Mariano and Custodio de Mello. The latter charged the former with subserviency to every government. This led to such uproaching, they will be supposed to the subsequence of the control of the contro

-It is rumored that negociations are in progress to secure a change in the management of the Banco da Republica. We doubt this report, because it is also reported that the Geral is to buy the ex-D. Pedro II railway!

-Decrees dated on the 4th removed Barão de Lucena from the department of agriculture and made him secretary of the treasury. Sr. Uchōa Cavalcanti, secretary of the interior, takes the department of agriculture.

—The Banco União de S. Paulo has applied for permission to have its notes printed by the American Bank Note Company. The minister of finance orders that samples be submitted to him to be sent to the United States.

-In spite of all criticism and of every protest, work is about to begin on the so-called "improve-ments" of this port. If Congress wants to do a eal service to the country, it will lose no time in terminating some of these jobs.

-We see by a Buenos Aires telegram to the Jornal do Commercio on the 4th that "a French squadron has arrived at Santiago." It is a noteworthy feat and would imply that the squadron is under the command of a Swiss admiral.

-The minister of justice has instructed the chief of police to take vigorous steps to prevent the excessive crowding of street-cars and extortion on the part of the drivers of public vehicles. If the chief accomplishes this, he will be a public benefactor.

-A reception was held at the United States legation on the afternoon and evening of the 4th. A large number of Americans and their friends called to present their compliments to Minister Conger and Secretary Lee, and to do honor to the day.

-The 14th, it should be remembered, is an official holiday. The provisional government discovered that the dawn of American liberty broke upon that day, consequently they have consecrated it to the liberty and independence of American republics.

-The minister of the navy has instructed the captains of the port not to clear any foreign vessels revival of an old measure adopted in 1853, which, without having been actually repealed, had ceased to be observed.

-The minister of agriculture has decided to maintain his grant of the Metropolitano railway notwithstanding the protests of the street railway companies of this city. He takes the ground that the Metropolitano is not a tramway. Why not refer the legality of such a grant to the Supreme Court?

-According to the board of health statistician. there were 2,290 deaths in this city in April, of which 83 were still births, 1,728 males, 562 females, 1,233 foreigners, 907 natives, 67 unknown, 966 from yellow fever, 228 from malarial fevers, 182 from consumption, 44 from small pox, and 25 from bari beri heri-beri.

If we all had such trousers, we should not complain so much of having to pay duties in gold.

-Among the arrivals on the American packet Finance was Mr. James Deitrick, of California, a well-known railway manager and constructor. Mr. Deitrick will make only a brief visit in this city, and will employ his time as far as possible in studying the railway system in Brazil. It is a pity that Mr. Deitrick's experience cannot be utilized in the reorganisation of some of our local roads.

-Telegrams were received here on the 3rd inst. mmunicating the death of Dr. Silva Jardim, who fell into the crater of Vesuvius. It will be remembered that the unfortunate man left Brazil because of the enmity of several prominent politicians. Now everybody is culogising him, even to the extent of declaring that it took the crater of Vesuvius to give sepulchre to one so 'great.
