RIO DE JANEIRO, AUGUST 1st, 1893.

The situation in Rio Grande is still largely a matter of pure conjecture. So completely has the government closed all telegraphic communication, including the cable south, to political news that we have received no telegraphic news whatever from Rio Grande since the Wandenkolk raid. This is of course of no practical effect so far as the revolution in that state is concerned, but it is a gross and illegal interference with the free transmission of news and a gratuitous annoyance to the public. And the practical effect will be to alienate public sympathy still more from an execu-THE situation in Rio Grande is still And the practical effect will be to alienate public sympathy still more from an executive who is inclined to rule as a dictator, rather than as a constitutional president. The news of the federalist capture of Jaguardo still lacks confirmation, the reports uarão still lacks confirmation, the reports at Montevideo being very contradictory when the last mail steamer left that port. It is possible that the repeated announcements that a pacification has been arranged, and that Julio de Castilhos is to resign, has had some effect on the movements of the federalists. It may be assumed that they will not be averse to any satisfactory settleand that Juno de castinos is to resign, has had some effect on the movements of the federalists. It may be assumed that they will not be averse to any satisfactory settlement of the dispute, but it is certain that they will demand guarantees against another betrayal such as that of the Bagé agreement some three years ago. It would be of great advantage to the country could a really honorable and satisfactory settlement be arranged, but such a settlement, to be permanent, must definitely prohibit all further federal interference in the local affairs of the state. Whether the President is prepared to give up his penchant for political intrigue we do not know, but we do know that he will never see peace and prosperity in Brazil until he does.

The complication in Santa Catharina has at last resulted in an armed conflict. At Blumenau, on the 28th or 29th ult., a state police force was met by the revolutionists and compelled to retire, both sides, tionists and compelled to retire, both sides, it is reported, suffering losses. The police force was under the command of the chief of police, and was under orders to suppress the Hercilio Luz revolution in that place and to reinstate the deposed municipal council. The revolutionists were armed with the rifles recently dispatched to the place by the military officials in Desterro. At the time this conflict occurred considerable bodies of armed men, calling themselves able bodies of armed men, calling themselves "civic guards" (guardas civicos) were arriving in Desterro from the disturbed localities, and with them the leaders of the revolution. They were all received and quartered at the military barracks, from which they went out to parade the streets and incite an insurrection against the state authorities. This open protection of insurgents by the national commandant, Col. Serra Martins, of course prevented any action against them by the police authorities and gave them a strength and advantage which the movement could not otherwise ties and gave them a strength and advantage which the movement could not otherwise have obtained. On the 30th a military demonstration was made by Col. Serra Martins, who paraded his whole force and fired artillery salutes in the streets, with the purpose evidently of overawing the police force defending the state executive. Open preparations were also made at the barracks for an attack on the governor's residence. for an attack on the governor's residence, as shown by telegrams of that same date asking the Rio government for assistance. It as shown by telegrams of that same date asking the Rio government for assistance. It is said that telegrams were sent from the war department instructing Martins to remain neutral and to recognize only the legal state government, but in spite of all this the "civic guards" left the barracks on the early morning of the 3 rst and attacked the governor's palace from all sides. The revolutionists were armed with Comblain (military) rifles, and were under commands issued from the barracks, as shown by their suspending fire on a signal from that place. The telegrams published this morning report the death of two persons in the palace, the sentinel at the door and a citizen in the street. The assailants were then withdrawn and Col. Serra Martins advised the governor that he would maintain order, but he subsequently permitted the revolutionists to break into the state treasury and the municipal hall, and is said to be concealing the revolutionary governor, Hercilio Luz, in his quarters. The result of this shameful intigue will be to create a civil war in the state of Santa Catharina similar to that which exists in Rio Grande, and for this the government of Floriano Peixoto is largely to blame. Had the Blumenau insurgents not received aid and encouragement from the national government, and the assurance of support from the military forces in that state, they would never have resorted to arms. They have no abuses to complain of and no reasons whatever for resisting the legal authorities of the state. It is simply a political controversy, in which the state authorities are accused of being friendly to the Rio Grande revolutionists. Two military officers, Col. Serra Martins and Major Firmino, have been largely instrumental in organizing this opposition to the state government, and as they have been retained there notwithstanding the complaints against them their superiors must take the responsibility for their revolutionary conduct. Were there any impartial and rational government in this capital these officers would be co be court-martialled and punished at once for their intrigues against the executive of an independent state, but this is more than we can expect. The wretched intrigue will be encouraged until the state authorities in Santa Catharina are overthrown and by that time anarchy will also be established. It is to be bitterly regretted that the people of this country can not be induced to leave their rivalries and political contentions to the peaceful decision of the ballot-box, but the peaceful decision of the ballot-box, but as long as a dictatorship exists and personal influences and prejudices are superior to all influences and prejudices are superior to all law, such a result can not be expected. Under existing conditions anarchy and rapid demoralization, socially and politically, can only be the logical results.

#### AMERICAN STATISTICS.

AMERICAN STATISTICS.

The United States Transury department has issued the following circular to customs officials and others in regard to the statistical returns on imports from countries having a depreciated currency:

"The department has been notified that the statistics of imports from countries having a depre-

ciated currency are seriously vitiated by the fact that collectors of customs, in reporting the values of such imports, make out their reports in the depreciated currency indicated by the invoice, instead of in its equivalent in United States money, as is the intent of the laws and regulations governing the method of stating the values of imports.

"This defect is especially noticeable in returns of free goods, as for example, coffee and india rubber coming from Brazil, and goods subject to specific duty, such as wood coming from the Argentine republic.

"At the present time, in view of the fluctuating balance of trade, it is especially important that statistics of imports and exports shall be prepared as accurately as possible.

"You are therefore instructed to require importers to declare upon all entries of goods which are free of duty or subject to specific rates of duty whether the value of the goods is especially important that statistic of important that provides the control of the provides and the control of the contr

HOSPITAL SAMARITANO-SÃO PAULO

The annual general meeting of subscribers was held in the American College on July 20th. The chief business was the election of three directors in piace of the three whose term of office had expired. Mr. William Speers, superintendent of the Sac Paulo railway was re-elected and General Couto de Magalhäes and Mr., Bento Ferraz were elected to

place of the three whose term of office had expired. Mr. William Speers, superintendent of the São Paulo railway was re-elected and General Couto de Magalhães and Mr. Bento Ferraz were elected to serve for there years.

The statement submitted by the Treasurer showed that up to the end of the financial year the total amount received was 71,8768-10, and at that time there was a balance in hand of 14,7918-300.

The president of directors in his report gave an account of the progress made with the building. The foundation-stone was laid on July 21st, 1892, and now the centre two-storeyed building is completed as well as the kitchen and laundry department. One of the wings is well advanced and when completed there will be accommodation for about 20 beds, besides unures' accommodation, thining-room and physician's room.

A qualified murse has been here for some time and is ready to begin work as soon as the building antifernishing is completed. But more money is required, Gratefal mention was made of a donation of 2,000\$ given by the state government, 10,000\$ given by the London and Brazilian Bank and of other donations given by numerous friends. But everything in São Paulo is so expensive that even with the greatest comony, a great deal more will be required to put the hospital in a fully equipped state. From all appearances next hot season is likely to be a very sickly one; the draded yellow fever which for so many years has spared São Paulo, has at last appeared, and last summer no inconsiderable number of cases occurred in this city, apart from imported cases. The expense of other cities has been that yellow fever appears at first on a very limited scale and that each succeeding years sees an increment in the animber of cases, muil a specially hot and day summer comes and then the disease bursts out in a grand epidemic, such as was experienced in 1850-990 in Campinas, in 1891-292 in Rio Claro and many other interior towns in the state of São Paulo. For two summers past yellow fever hab been recognized in São Pau

to improve their methods of treating the sect, and sepecially the poor, who are committed to their charge.

Surely with such objects in view there should be no difficulty in raising sufficient funds to put the Hospital on a thorough-going basis and that it will be a great boon to many a young man struck down by illness while living in boarding-boases or lonely lodgings, to many a poor man condemned to see most of the seamy side of life, to many a poor woman bereft, perhaps, of friends and forced to earn her daily bread by her own physical exertions, that it will be a boon to these and many more can not be doubted.

Argentine News, (sosario.—The old, wretched story of contradictions has begun again. Telegrams were first received announcing that the federal leader Sarawin had had a lecisive victory over the republicus near Vagnaron. Later and apparently better substantiated telegrams, however, announce the exact contrary, asserting that he has suffered a serious reverse, and his troops are broken up and have fled to Ana Curren, who his a revolutionary stronghold. He managed, however, to steal the horses of the republicus, so as to prevent pursait! The reputed death of General Soares of the republican party is denied. A few weeks ago, we mentioned the case of a German merchant vessel that had gone aground, and was in imminent danger of becoming a total wreck, not far from the port of Baha Blanca, and although help was asked for, the port authorities were unable to afford any, as they did not even possess a boat capable of lending any assistance whatever, and if it had not been for help rendered by private individuals the entire crew would have been drowned. —It is said that the Uruguayan government, in compliance with a request of the Brazilian government, has issued an order of arrest against Colonel Laurentino Pinto, who has committed off-mess which bring him within the extradition law. Certainly, it seems to us, that his seizure by force of the merchant vessel Iralia was an act of common pinacy, altogether unjustifiable under any plea of revolution, and his arrest and punishment would be a merited lesson. The arrest has not yet been effected because he cannot be found. Probably he received a hint to get out of the way. If arrested, he would be detained until sufficient proof was offered of the offences charged against him. On the other hand, it is also said that the Uruguayan government is offended at the Brazilian gunboats being ordered here, which it regards as an attempt at intimidation. # LEGISLATIVE NOTES

JULY 24.—Senate.—Senator Catunda spoke on the political situation of the country. He said that he had been one of those who longed for the republic, expecting that it would be a guarantee for the rights and liberties of citizens. He continues, he said, to long for a republic, for what now exists is not a republic but a dicatorship. Senator Aristicles Lobo in reply denied the existence of a dictatorship and deprecated comparisons between the former system of government and that which now exists. When such comparisons are made by republicans, what, he asked, is the conclusion that people naturally draw? That the monarchy is a better system of government than the republic. People complain, he added, of the preponderance of the military, but whose fault is it? Why, that of the agitators, who are constantly threatening public tranquillity and order and even the institutions of the country. When the country is in this state, how is it possible, he asked, to do without the army? It is only by means of force that order can be preserved.—Chamber of Deputies.—Deputy Epitacio moved to inquire what steps had been taken by the government to cleek the abuses committed by federal officers in Santa Catharian. Deputy Jacques Ourique moved to inquire (1) what authority had order and the investigation of the conduct of Admiral Wandenkolk by a military court of inquiry; (2) whether the Admiral, although a senator and a retired officer, was at the time of his arrest employed in any military commission; (3) what military crime had the Admiral committed to be thus tried by a military court. The committee on public works and colonization reported in favor of the bill for granting a subsidy of 500,0008 per anoun for a line of steamers between the ports of Paraf, Maranilao, Ceará, Pernambuco, Maceió, Lisbon, Barcelona, Marseilles and Genoa.

JUNY 25.—Senate.—The navy bill was voted in 3rd discussion with amendments.—Chamber of

Pará, Maranhão, Ceará, Pernambuco, Maceió, Lisbon, Barcelona, Marseilles and Genoa. July 25.—Senate.—The navy bill was voted in 3rd discussion with amendments.—Chamber of Deputes.—Deputy Zama offered a motion, strend by limself and Deputy Seabra, for the appointment of a committee of three to call on the President of the republic and ask him to put an end to the charactly and disorder caused in Santa Catharina by troops and government employés. The debate on this motion became so stormy that the president suspended the sitting. The motion, offered at the previous sitting by Deputy Jacques Ourique, to ask for information in regard to the arrest of Admiral Wandenkolk, was passed by a vote of 58 to 49. The bill on judicial costs was voted in 1st discussion, and the Matto Grosso railway bill in 2nd discussion. The committee on colonization reported a bill authorizing the government to contract with Vice-Admiral Arthur Jacequay (Silveira da Motta) for introducing into the country 50,000 immigrants to be employed in maritume industries, such as fisheries, ship-building, oyster culture, etc. The same committee reported a bill for a subsidy of £1,200 per trip for a line of steamers between Aracnojik, Paralyha, Natal, Pará, Lisbon, Antwerp, Liverpool and Hamburg.

between Aracajū, Parahyha, Natal, Pará, Lishon, Antwerp, Liverpool and Hamburg.

Juty 26.—Senate, Senator Rodrigues Alves in a speech on a railway bill said that the net revenue of the Central railway hill said that the net revenue of the Central railway hill said that the probably not exceed 1,000.000\$.—Chamber of Deputics.—Deputy Lauro Muller answered the speech made at the previous sitting by Deputy Zama. The governor of Santa Catharina, he said, has trampled on the rights of the people of the state and is now engaged in adding the revolutionists of Rio Grande, whose object no one knows unless it be to restore the monarchy. The people of Santa Catharina, however, do not approve of the conduct of the state government and they are right in rising against it. Deputy Frederico Borges, in a speech on the currency bill, said that, if it were not for the financial state of the country, he would be in favor of issuing founts to the amount of 200,000,000\$.

July 27.—Senate.—Senator Christiano Ottoni spoke against the proposed railway grant to F. Dunker. Such grants, he asserted, should never be made save in view of previous surveys and only then to contractors offer the most advantageous terms.—Chamber of Deputing.—Deputy Seath ad defended the motion offered by himself and Deputy Zama in regard to affairs in Santa Catharina. All the concurrent circumstances prove, he said, that the revolutionary movement in that state is instigated

by the general government, all of whose recent appointees are enemies of the state government. The depositions of municipal councils have all been in districts in which military officers of the general government are engaged in organizing the civic guard. In another speech, the same deputy opposed the approval of the decree of Dec. 17th and asked why the report of Ewerton de Almeida on lanks of issue had not been published. Deputy Mayrink said that the Oeste de Minas ailway loan was a failure and a disgrace to the nation. He asserted that only 30°/3, of the amount required had been subscribed. He offered several amendments to the currency bill. One of these amendments authorizes the government to deliver to the Banco da Republica do Bazzil the bank deposits in the Treasury for the purpose of being used, under the inspection of the Treasury, in exchange operations.

the inspection of the Treasury, in exchange operations.

JULY 28.—Senate,—Senator Christiano Ottoni spoke against the hill for a railway between Rio de Janeiro and Entre Rios, which was defended by Senator Biaz Carneiro. The latter said that by means of this road the trip which over the Central now takes five hours can be made in two hours and a half.—Chamber of Deputies.—Barâo de Villa Vigssa introduced a bill on agricultural banks. Deputy Tosta introduced a bill singed by himself and others on the organization of the national guard. Deputies Mayrink and Rosa es Silva spoke on the currency bill. The latter insisted on the expediency of retaining in the Treasury the deposits made as a security for the notes issued by banks. He agrees with Deputy Mayrink in thinking that the Oeste de Minas railway loan was a failure.

JULY 29.—Senate.—Senator Almeida Barreto.

a failure 20,—Senate.—Senator Almeida Barreto protested against the appointment of President Floriano Peixoto to the office of member of the supreme military court by a decree signed by the president of the Senate. He also protested against the appointment, which, he claims, is illegal, of two brothers, Vissonde de Maracejút and Barálo do Rio Apa, as members of that court.—Chamber of Deputate.—For want of a quorum there was no sitting of this chamber.

into the safe treasury and municipal hall and dominate the city.

—What's the matter in Santos? Is the crypto-cocus of Dr. Freire threatening another invasion? The Dravio de Santes of Wednesday last says that the garrison there has been active and in readiness since Monday. At 8 p.m. on that day a force of 50 policemen went out to the barn, and at 9,30 a steam lanuch with Dr. Så Linn, Major Jesus and Captain Candido went down the river to the same locality. A detachment of the 22nd battalion was also sent over to the pill-box fortress on the other side of the river. Thirty soldiers remained on the beach all night, while the steam lanuch cruised anxiously about. On Tuesday more soldiers went down the river, and the cruising continued. Tuesday night the major slept, but a guard was maintained. Why was this thusly? It has since Tuesday inglith the major slept, but a guard was maintained. Why was this thusly? It has since transpired that these precautions were laken because of a private report that Gumersindo Santiva, Cassal and Caheda were coming to capture Santos. The steamer Alexandia was subsequently stopped and searched, an Italian steamer was almost scared out of the water by being fired upon from the ruined fort, and every tow-hoat carries a police soldier. The scare is a real one, absurd as it may seem.

# RAILROAD NOTES

AILROAD NOTES

The great Central railway, with its hundred and fifty thousand contos of invested capital, is to produce only 1,000,0008 net revenue this year, is it not time for the government to go out of husiness and lease the road to someone who knows how to manage it? It is a burning discredit to a government to own so hadly managed a road.

—The Central railway seems to be becoming rapidly militarized and demoralized. The new regulations now permit the ticket-office and gate to be opened only ten minutes before the departure of a train, and the passage to the platform is guarded by two files of about twenty soldiers, who created any one who wishes to complain. Of course ten minutes are not enough, and the result is that scores of people are continually missing their trains.

—We understand that, in view of the obstacles to trade between the interior of S. Paulo and the port of Santos, it has been proposed to connect the Mogyana and Paulista roads with the Sapucally, giving an outlet to their traffic through the port of Untaiuba. According to line, by which will connect it with the Sapucally. The latter will connect with the Mogyana by means of its Penha branch. We have frequently advocated the development of these extensions to connect with the Untaiuba line, as it will give S. Paulo a new and more commodious port.

The governor of Minas Geraes sanctioned on the 25th ult, the railway act mentioned in these columns some weeks ago. It authorizes contracts for a railway line from Ouro Preto, or other point on the Central, to Peçanla and thence to Theophilo Ottoni, and another line from Santa Barbara, by way of Ponie Nova and Manhuassá, to the boundary of Espirito Santo to connect with the line in that state passing through Alegre. The state offers 50 years' privilege, a zone of 60 kilometres and a guarantee of 6% for 30 years on the capital not exceeding 50,000\$ per kilometre. The governor is also authorized to assist the Sapucalty, Muzambinho, Bahia e Minas, and the Theophilo Ottoni to Esterna companies in the completion of their lines, by guarantees. The guarantee clorist of the Sapucalty main line is fixed at 18,736,503-162, the company to surrender its concessions for branches to Lavras and Lambary and extension to Pouso Alegre. The Muzambinho guarantee is to cover only the line from Lavras to the S. Paulo boundary line. As to the Bahia e Minas line, the governor is authorized to disappropriate and build the road in case he fails to make a satisfactory contract.

—At a meeting held the day before yesterday the party of which Congressman Glycerio is the leading organizer, adopted its platform. The name-chosen for the party at this meeting is Partido Renublicano Federal. The executive committee will issue a manifesto.

—Instead of piniting exclamation points over the high price of heef, why are our native contemporates not going into the reason for it? If they will investigate the obstacles imposed upon the introduction of live cattle from the River Plate perhaps they will discover one of the reasons.

—The Montevideo Times thinks that two or three foreign nations should send their gunboats to Rio Grande and stop the las barons war in progress there, insisting on the punishment of all persons guilly of piracy, brigandage, cruelty, etc. If that is to become the rule, the aforesaid foreign nations will have their hands fall in South America.

—We are surprised to see that Sr. Augusto de Carvalho has been telling our local geographical society that the discovery of Brazil was not accidental, but was the result of premeditation. In that case the discoverer either owes us an apology, or an explanation to the effect that be did not foresee the advent of the Brazilian positivist republic.

—It is reported in Montevideo that the Brazilian

dental, but was the result of premeditation. In that case the discoverer either owes us an apology, or an explanation to the effect that he did not foresce the advent of the Brazilian positivist republic.

—It is reported in Montevideo that the Brazilian government is suppressing all copies of newspapers containing unfavorable political allusions. Of course the Nkws can not be classed among the proscribed ones, but we should be glad to hear whether these reported censors have been interfering with us, all the same. If they have, we shall join the Montevideo Times in asking for a few foreign gunboats.

—We are requested to announce that English religious services will be held at the American church, Largo do Cattere, up to the 4th inst. (Friday), at 8 p.m., by the Rev. G. C. Grabb and his mission party. Portuguese services are to be held, we understand, at other points during the same time. Mr. Grubb's fame as an evangelist will undoubtedly give an exceptional interest to these services and will insure for him full houses every night.

—The court of inquiry for investigating the conduct of Admiral Wandenkolk has declared itself incompetent to act in the case, which, in its opinion, helongs to the civil caleard itself incompetent to act in the case, which, in its opinion, helongs to the civil caleard itself incompetent to act in the case, which, in its opinion, helongs to the civil caleard itself incompetent to act in the case, which, in its opinion, helongs to the civil caleard itself incompetent to act in the case, which, in its opinion, helongs to the civil caleard itself and the country is not under martial thay service and as the country is not under martial thay he appointment of a military court of inquiry was certainly out of order. It seems to have been forgotten at Itamaraty that Brazil is nominally a civil povernment.

—Hurrah! On the night of the 25th one of the editors of the Pais was stopped in the Praça 11 de Iulio by a soldier of the 1st cavalry, who demanded his money. Thereupon the editor opened upon him one of the regular Pais editorials on the uniform he wore, the dependence of the republic upon his partiotism and honor, upon the disgrace cast upon his profession and good clothes by such criminal acts—but here the poor fellow broke down (the soldier, we mean) and asked for 200 reis in order to place the greatest distance in the shortest space of time between himsell and the rest of the editorial. He also excused himself by saving that he thought the Pais editor was a soldier—but never dreamed that he was to meet such a Gatting gan of words. It will now he known in military footpad circles that the Pais Gatings are sure fire and deadly.

suffering because there is no capital here for investment!

—It is significant that Deputy Mayrink has again returned to an active participation in the financial discussions of the day. And it is no less significant that his first proposition is to the effect that the gold deposits in the Treasury guaranteeing the redemption of the bank issues (if those deposits really exist any longer) may be loaned to the Banco da Republica for exchange operations. In view of the fact that every official interference in exchange operations has resulted in a heavy loss to the Treasury, this subtle counsel from the father of our "bubble hanking system" is not only significant, but it may be accepted as a fair measure of the financial statesmanship which is seeking leadership in this country.
