#### RIVER PLATE ITEMS.

-Mr. George E. Welby, who was for several years 1st secretary of legation in Buenos Aires, has been appointed British minister to Peru.

has been appointed Bittish minister to Peru.

—A Buenos Aires telegram of the 24th says that President Roca gave a banquet on that day at which the diplomatic corps, cabinet an other high functionaries were present.

—No wonder London does n't want to loan any more money to Argentina. Not only is the Argentine government proposing to build a new half for congress, but they are even appropriating \$11,000,000 for disappropriating land in the city of Buenos Aires for the site.

The Englishment of the State of the site.

land in the city of Buenos Aires for the site.

The English speaking community at Montevideo is a very small one, but still the British Hospital there is well sustained. The April report shows 19 patients under treatment from March, 18 admissions during the mouth, 21 discharged, 2 deaths, and 14 remaining under treatment at end of the mouth. There were also 11 out patients on the register. It is interesting to note that the charges are: \$3,00 a day for a private room, \$2.00 for semi-private rooms and \$1.00 for general ward. These rates are of course in gold, but they are not so high as to keep patients away. Besides this, every subscriber paying \$12 per annum is entitled to send one free patient during the year.

year.

—The reported trip of General Roca to Brazil is now confirmed by telegraphic advices from Rio. The Argentine minister in Rio has communicated to the Brazilian President that General Roca contemplates visiting that republic shortly and it is said that it will have for prime object, the celebration of an alliance between Argentina, Chile and Brazil to operate against the alleged desires of the United States to absorb those republics! This seems rather too funny, for there is no doubt that if the States made up their mind to have the three republics, the celebration of alliances would not have much effect in opposing it. The visit of General Roca will most probably be made some time this year probably in July or August when the chances of yellow fever are at a low ebb.—Times, Buenos Ayres.

—To understand what splendid sailors the

augus when the chances of yellow lever are at a low ebb.—Times, Buenos Ayres.

—To understand what splendid stilors the Argentines are, one should read the following from the Times of Argentina of 19th inst.:

"Bulged plates, twisted keel, parted rivets, bent propellete blades and other things represent the bottom of the cruiser of hillory lying in the dry dock in this port at the present time. The reporting committee admit that the damages are such as to be impossible of repair here, so that the craft will have to go back to Armstrongs under easy steam to be patched up, another little order for the Newcastle firm thas will represent about 10, 24,000. This is rather a tall price to add to the original cost of the vessel on her first real trial to sea but que vanos à hacer. We shall all have to pay and grin and bear it whilst the minister of war is grumbling about his reduced sheet of expenditure and the minister of finance singing untuneful ditties about economies and loans that won't come off, assisted or otherwise."

Here's an instance—a small one, but with a big moral attached—of the injury done to the port itself by the quarantine abuses imposed by the bungling health authorities. It deserves to be known. When the U.S.S. «Newarks arrived here, it was with the hopes of having the ship's washing done here, none having been done for some thirty days. This would have represented a bill of some \$250 or \$300 to the benefit of the poor port laundresses. But as she was kept in quarantine for four days out of the seven that she had to stop here, the washing could not be given out, and the laundresses are left launenting. This is only one instance out of many in which trade and money are kept out of the port by these miserable quarantine arrangements. Though the vessels and passengers who endure the infliction are the primary sufferers, the port also loses out of all proportion to any good the quarantine may do.—Montevideo Times.

—We have a great admiration for the South-

loses out of all proportion to any good the quarantine may do.—Montevideo Times.

—We have a great admiration for the Southern Cross of Buenos Aires. It is so lightly, brightly written where serious principles are not involved, and so fearless where they are, that we agree with our contemporaries in placing it in the forefront of English-written journalism in South America. Our colleague has, however, fallen into an unintentional error in claiming connection with Capt. Coghlan's celebrated offence to the German Emperor by singing, not reciting, "Hoch der Kaiser!" The fact of the matter is that we found that exquisite squib in the New York Muritime Register—the last paper in the world in which to look for poetry—and reproduced it in our issue of June 7th last year, giving credit to its author, "A. M. R. G. in the Capetown Oxel. On the 24th of the same month the Southern Cross republished the piece, with the same printer's error we overiooked, and all our South American exchanges did the same, about the same time. The New York until Getober last, and the mediately. Mr. Frank Carpenter did not reach New York until October last, and the men of the Oregon, who left before his arrival knew it by heart when they reached Rio early in November. This is the first time we have caught our accurate colleague in a sip, and as we are indirectly concerned, we put the case on record. We feel convinced that the Southern Cross will be the first to grant us priority of appreciation in this case, as far as South America is concerned.

—Telegrams from London state that the Argentine government has resolved to desist from raising a Joan in that market at the present time. The report that the loan had been floated was a mistake.

—Brazilian Four per Cent. bonds of 1839 have risen to 65 ½ on the speech of the President at the opening of Congress, in which he described the proposal economies, the government outlavs, and the reduction of note circulation. He said, however, that the effect of his proposals will not be felt until 1900. We would advise intending investors in Brazilian securities to await the actual results of the proposals before purchasing. —The Statist, May 6.

May 6.

— The hopeful tone of M. Cumpos Salles' message has given another fillip to Brazilins stocks. The President foresees excellent results from the policy of finucial reform which he is industriously carrying out and expects by reducing the expenses in every possible way and augmenting the customs revenue, to have a surplus in the present year of 30,378 conto. The proposal to farm out the Central rail-ways is approved of by the President; and as congress has given him entire liberty of action in this respect, we are likely to hear more about the matter before long. With the financial outlook upore reassuring there have been some good transactions in Brazilian Fours, which have advanced a point on the week. The gathering in of the coffee crop will soon be followed by a larger export trade, which may be expected to accentuate the improvement in the exchange and consequently muintain the firmness of Brazilian securities. "The Critic, May 6.

—Brazil, with all her vaunted zeal for finan-

sequently minitain the firmness of Brazilian securities.—The Critic, May 6.

—Brazil, with all her vaunted zeal for financial regeneration, finds it impossible to balance the 1898 accounts after four months. So far, the revenue of last year is guessed at 362,—862 contos, against 312,650 contos, and the expenditure is put at 409,290 contos, against 372,810. On the best showing, therefore, there is a deficit of 46,428 con 50s of reis; but President Campos Salles expects it to be reduced when the accounts are finally made up. The President's sanguine disposition is further exemplified in his estimate that the current year will show a surplus of 30,378 contos. He tells us not to be impatient for immediate results from the funding arrangement; for its effects will not be fell until next year. We sincerely hope some of them may be experienced even then. The President still talks economy; but he includes the recovery from the individual states of several taxes really belonging to the union as a necessary to the restoration of budgetary equilibrium. No doubly, if the states were self-denying they could restore the credit of the republic so far as it has not been hopelessly compromised by mismanagement and maladministration, but we fear the President has very little chance of compelling or inducing the wealthy provinces to abandon their encroachments on sources of revenue which are federal under the constitution.—Financial News, May 4.

to abandon their encroachiments on sources of revenue which are federal under the constitution.—Financial News, May 4.

— The new Brazilian President's congressional message is in accordance with what was expected of him. And if he can but carry out even a portion of his policy he will have effected much for the benefit of his country. For the past year the revenue and expenditure figures are not yet complete. But it seems clear that there will be a deficit. For the current year, judging from the first quarter, the President hopes for a surplus. During the current year two millions sterling, borrowed in London in 1897, will have to be repaid, as well as 32,000 contos of treasury bills and bank loans. Not until 1900 will the good effects from the London convention of June last be felt. He adds that 40,000 contos of paper issues will be burned in the year. Of this amount 14,000 contos have been already dealt with. This is certainly very satisfactory, and we can only hope that the President will be able to continue his policy. The President is in favour of leasing the Central railway. And in his message he shows that the lines already leased, which formerly gave deficits, are now giving surpluses. He promises sooner or later to deal with the Central railway as authorised by congress, and thus greatly to improve Brazilian finance. But to reform the finances completely it is absolutely necessary to diminish the mass of paper money. This is one of the cardinal points of the presidential policy, another being the raising of a guarantee fund and the accumulation of a redemption fund. For all this it is necessary that the greatest economies should be precised and that every possible retrenchment should be enforced. As the republic seems to be now firmly established, and order to reign everywhere, the President hopes to effect economies in the cardinal points of the president doctrine of free trade, where the produce cheaper and better than Brazil the latter ought to import. This is in itself the plainest and simplest st

#### THE WHITE MAN'S BURDEN.

version by Mr. Ernest H. Crosby

Take up the White Man's burden Send forth your sturdy sons,
And load them with whisky
And Testaments and guns.
Throw in a few diseases
To spread in tropic climes,
For there the healthy niggers
Are quite behind the times.

and don't forget the factories
On those benighted shores,
They have no cheerful iron-mills
Nor eke department stores.
Thy never work twelve hours a day,
And live in strange content,
Although they never have to pay
A single cent for rent.

Take up the White Man's burden, And teach the "hilippines What interest and taxes are And what a mortgage means. Give them electrocution chairs, And prisons, too, galore, And if they seem inclined to kick Then spill their heathen gore.

They need our labor question, too,
And politics and trand,
We've made a pretty mess at home,
Let's do the sime abroad.
And let us ever humbly pray
The Lord of Hosts may deign
To stir our feebbe memories,
Lest we forget the Maine.

Take up the White Man's burden, To you who thus succeed
In civilising savage hordes,
They owe a debt, indeed;
Concessions, pensions, salaries,
And privilege and right,
With outstretched hands you raise to bless
Grab everything in sight.

Take up the White Man's burden,
And if you write in verse,
Flatter your nation's vices
And strive to make them worse.
Then learn that if with pious words
Vou ornament each phrase,
In a world of canting hypocrites
This kind of business pays.

THE PASTURE PAMPAS OF SOUTHERN BRAZIL

THE PASTURE PAMPAS OF SOUTHERN BRAZIL.

I came in a Royal Mail steamer from Montevideo to Santos. I was warned by the captain and passengers that the yellow fever harpies were hanging over the town, and was urged to continue my voyage to Rio de Janeiro and cone back to southern Brazil by rail. I took the chances, however, and still live. I spent a day or two in Santos, and thence came over the coast mountains to São Paulo, the biggest city of lower Brazil. São Paulo is the coffee metropolis of the country. It is one of the richest cities of South America, and it is growing as fast as any town on our hemisphere. In 1870 it had 14,000 inhabitants. Within the next ten years it doubled its population, and it now has about 200,000.

Before I begin my tour through Brazil I want to give a general idea of the country. It

is as far away from Rio almost as it is from the United States.

I tell you, this is a big country. It is the Russia of the South American continent. It is as big as the United States without Alaska and our outlying possessions. It ranks fifth among the great countries of the world. It is longer from north to south than from Pittsburg to San Francisco, and wider from east to west than from New York city to Salt Lake. It comprises about half of all the land of South America, and it has in it more than half the people.

than from New York city to Salt Lake. It comprises about half of all the land of South America, and it has in it more than half the people.

We look upon South America as a Spanish continent. It would be just as proper to call it a Portuguese continent, for Brazil is Portuguese and its 18,000,000 people speak the Portuguese language. The Brazilians are different from the other South Americans. They have a character and customs of their own, and they are now for the first time running their country for themselves, and that upon republican methods.

I find Brazil far different from what I supposed it to be. Many of you look upon it as a vast lowland forest with here and there a coffee plantation or a rubber grove, and all around and everywhere the ghost of the yellow fever. The real Brazil is this only in spots. It is an empire with soil and productions equal in their variety to those of the United States, and a climate in many parts as salubrious as that of any part of our country.

Brazil is by no means all flat. The Amazon valley is a great lowland plain about as wide as from New York to Cleveland and as long as from Philadelphia to Denver, sloping gently from the Andes to the Atlantic. It is covered with forests but much of it is healthful, and on the Amazon itself the weather is cool for a great part of the year.

South of the Amazon valley are highlands, some sterile and others afflicted with terrible droughts. Just below the Amazon valley they are having a drought now, and the ships of the Brazilian government are carrying the starving people to the rubber camps of the Amazon walley have are having a drought now, and the ships of the Brazilian government are carrying the starving people to the rubber camps of the Amazon walley have are having a drought now, and the ships of the Brazilian government are carrying the starving people to the rubber camps of the Amazon walley they are having a finish there are rich farms. Many parts of them need only a slight cultivation to make them produce.

The southern half

above here, has 4,000,000 people, and just below is the well settled state of Rio Grande do Sul.

Rio Grande do Sul is an agricultural province. It raises wheat and meat. It has vast pastures upon which hundreds of thousands of cattle are feeding. It has beef factories in which more than 5,000,000 worth of jerked beef was made last year. At the town of Pelotas alone 3,000 ocenare annually slaughtered, and there are factories there making soap, candles and manure out of the refuse. Rio Grande do Sul has a number of cities in which are street rullroads, colleges and daily newspapers. In the town of Rio Grande there are five daily papers, in Porto Alegre six and in Pelotas four There are good banks run by Englishmen, but nearly all other businesses are managed by Germans. There are Germans, and on this account the country has been called West Deutschland. Of late a large number of Italians and Portuguese have come in but the workshops and nearly all the export trade is still in the hunds of the Germans, and they own, it is said, about one-fourth of the property. In a quarrel between Brazil and the kaiser this state might essily break away and demand German protection.

The climate of Rio Grande do Sul is about that of Washington city. In January, midsumer, the thermometer goes up as high as 100, and in the winter month of July the ground is often covered with snow.

North of Rio Grande do Sul re the states of Santa Catharina and Parand, both of which will some day be populated by Europeans. They are very similar to Rio Grande and have vast undereloped areas.

CRICKET IN PERNAMBUCO.

The keenness for cricket which was so wonderfully developed in the states of Minas, Rio and São Paulo in the past year or so, has extended to Pernambuco, where good sport is expected to be had during the coming year. The ground is situated in a delightful spot at Sant'Anna, about four miles outside town and is easily reached by train. The first match of the season was played on the 11th inst., before large gathering of spectators, the pavilion being well filled with the fair sex of the British community. The opposing leauns were furnished by the London & River Plate and London & Brazilian Banks and good cricket was shown. An adjournment was made at 1 o'clock at the invitation of Mr. Harding, the manager of the London and Brazilian Bank, to take lunch at his house, and during the afternion tea was served out in the pavilion by Mrs. Estill, the wife of the genial manager of the London and River Plate Bank, Mr. Geo. #### VISIT TO SANTA BARBARA AND THE COFFEE PLANTATIONS OF S. PAULO.

THE COFFEE PLANTATIONS

OF S. PAULO.

In concluding his account of the American minister's visit to the coffee centre of theistate of S. Paulo, the correspondent of the Correio Paulistano, who accompanied the diplomatic party, writes:

A festive and cordial reception was made here [at Sunta Barbara] to the American minister, by more than a lundred of his countrymen, among whom were Messrs. Charles Hill, De Mane, Whittaker and Carlton, belonging to the colony of this locality, Mr. Hall offered a splendid breakfast to Col. Bryan and his companions de voyage, in his fine, pleasant and comfortable farm-house a few meters distant from the station. Mr. Hall's family gracefully did the honors of the house.

We left here at 11:30, amidst great many cheers raised for the American diplomatist. From the veranda of Mr. Hall's house, the ladies waved their handkerchiefs as a farewell signal. Col. Bryan is the first American minister who has visited this part of the Paulista territory. His Excellency shows more and more admiration for the beauty of the country through which we are passing.

As stated in my last telegram, we arrived at Santa Veridiana to day, 19th, at 211 pm., and taking the buck-boards in waiting there, we were driven to the plautation of Brejão, a splendid excursion.

The roads are bordered all the way by extensive coffee plantations, either on low grounds, hills, or mountain tops, magnificent perspectives which were the object of the tavellers' admiration and enthusiasm.

Meanwhile, the special feature of the excursion was the forest, half way between Santa Veridiana and Brejão, a forest of enormous myrtle trees, sublime and gigantic, growing amidst euterpes, of thin espiques and inbaubas with silvered leaves.

On the margins of the road, intermingled with many old specimens of forest vegetation, we saw and admired a profusion of bignonias and ipomôcas, and on small moitas aphelandras of golden color, and olyvas of glaucous green.

and points as, and any and olyvas of glaucous green.

We stopped in front of two "jequitibas of —(contatari legalis)—two giants, one measuring in circumference 4? English feet (or 16 meters) and the other 18 meters, exclusive of the buttress-like roots, which extend some to to 12 meters along the ground. One of these trees had, perhaps in a storm, lost a small branch 30 meters long, measuring at its base one meter in diameter. Both these magnificent examples were covered with delicate octomerias and finest rhipsalis. Leaving the forest, we went on continuously through coffee-plantations to Brejão, near which we passed through the laborers' settlement. We were received by Dr. Eduardo Prado with all the chivalry he is noted for, and on the veranda were introduced to Madame Prado.

The dinner went off with the greatest animation, the key note to the feast having been given by Mr. Barbour Lathrop, a wonder-

Prom an old gun sixteen feet long, and ten miles of copper wire, the most powerful magnet in the world, with a lifting power of 45,000 pounds, has been constructed at Willett's Point, New York. It is a remarkable sight to see cannon-balls which no man could lift, rise from the ground to the muzzle of the magnet. One of the most interesting experiments was to place a soldier about a foot from the muzzle of the gun and then turn on the current. Great iron spikes would jump from the ground and attach themselves to the silent soldier, who bristled with them all over like a metallic porcupine. Even great cannon-balls would leap up and hang upon him. There he would stand holding up a much greater weight than he could possibly lift, and all with no conscious expenditure of strength. This, which was the natural, seemed the wonderful part of the scene, and always impressed the visitor. For the power was not in the man, butin the magnet behind him. It was simply working through him, and would always do so as long as he stood within the radius of its activity. When he moved away from the magnet, the iron would fall from his body because there was no power in him to sustain it.

RIO DE JANEIRO, MAY 30th, 1899

WHATEVER may be one's opinion of the political administration of the country, there can be no denying the fact that try, there can be no denying the fact that it has as yet given no cause for the gross abuse heaped upon the President during the past week by a jacobin deputy from Rio Grande do Sul. We have found many things to criticise in the administration of President Campos Salles, but we have never yet thought it lacking in patriotism and good intentions. Last year the President took upon himself the responsibility of improving the finances of the country, and in this he received invaluable assistance from foreign creditors. subject, though at the outset the Jornal do Commercio stated that there do Commercio stated that there was absolutely no occasion for the alarm in Mandos, and that permission for the navigation of this river is not required by the decree which opened the Amazon

to the world.

From various reports published by the press, we find that the «Wilmington» left Manáos for Iquitos on April 5th, arrived at Iquitos on the 12th and returned to Manáos on the 21st. The public meeting in Manáos to protest against this act was held on Sunday April 9th (and not on the 15th, as stated last week) on which day the Amazon Company's agent were assaulted. American consulate and residence of the Amazon Company's agent were assaulted and stoned. On the return voyage from Iquitos the "Wilmington" visited Tatatinga and Cadajoz, and were prevented from landing at the last-named place by officials and soldiers. At Manaos, it is stated, the health authorites did not with the health authorites did not with the health authorites did not with the health authorites did not stated, the hearth authorites du not visit the ship and a cold reception was received from officials everywhere. On the following day, orders were issued from the capitania forbidding pilots to take service on the vessel, which prevented the Willinington from ascending the Medica as intended. And it comrented the "Wilnington" from ascending the Madeira, as intended. And it compelled her commander to pilot his own ship back to Pará. On the 22nd Commander Todd, accompanied by Consul Kennedy. of Pará, called on the acting governor of Amazonas and were not received, the excuse given being that

he was very busy.

In view of the fact that the pacific objects of the «Wilmington's» visit were well known, there can be no possible excuse for these exhibitions of discourtesy and ill-will. The American officers beliaved the American to peen to the

The visit of President Roca to this capital still seems to be a matter of speculation. From local sources we learn that he is coming next month, and the naval vessels which are to meet him off Sunta Cutharina and bring him safely in, have already been selected. In Buenos Aires, however, less certainty seems to prevail. One disputch says that he will visit us in July and will remain here a week, while the Priz correspondent says that owing to the preparations which are making to receive him, he will probably come in Angust. Well, we can not see that it will make any very great difference whether it is June, July, or Angust. The shoe dosn't pinch us there at all! The main point for Argentines and Brazilians to consider, in view of the financial distress prevailing in both countries, is that of expense. Can either of them afford the expenditure which such a visit entails?

which such a visit entails?

The jacobins profess to be very indignant at the statement made by Dr. Erico Coelho that Messrs, N. M. Rothschild & Son have advised President Campos Salles to reject their overtures for an alliunce. Sach advice would, they say, be very humiliating to Brazil. But, in our opinion, still more humiliating to this country were the bill which on Sept. 18, 1893. Deputy Nilo Peçanha introduced in congress authorizing foreign nations to seize Brazilian war vessels, and decree No. 1,500, of Oct. 10 of the same year, signed by Mushal Floriano Peixoto and his cabinet, which was intended to promote covertly the same object. No less humiliating to the country were the unceasing efforts made by the government at that time to provoke the revolutionists, by means of the otherwise useless fire of sharpshooters, into bombarding the city of Rio de Janeiro and thus embroil them in a conflict with the foreign squadrous in this port.

—The approximate weekly traffic receipts of the Recife and S. Francisco (Permanbuco) railway for the week ended April 29, were 32,37,5830, as compared with 47,232,840 for the corresponding week of last year, a decrease of nearly 15 contos for the week. There has been a falling off in merchandisc of 1,310 tons, and 631 2nd class passengers in comparison with the return of last year, but there were 52 more 1st class passengers. The total receipts from Jan. 1st to April 29, were 718,022,536 or 114,484,5250 less than in the same period last year.

—With the return of cooler weather, there has been a small increase in small-pox cases larer. Care should be taken in regard to vaccination, and also to avoid infection.

—We heard a young Brazilian telling a companion, after looking at the evening paper, that steady is the soft anniversary of the coronation of Oneon Victoria. And then he remarked, reflectively, that she has reached a good old age!

—The Phir announces that through the initiative of Messus. Laenment X Co. Brazil will be represented at the Paris exposition. But what can we exhibit which will show the true state of the country? What are we doing, to which we can call foreign inspection?

—The police have succeeded in capturing the thief, or one of the thieves who stole a passenger's hand bug on the Central railway on the 20th in which was 12,505 worth of diamonds. If the eminent bunkers can prevent the communation of this disastrons alliance, they will render a valuable service to the country.

—When President Campos Salls on last Friday visited the barracks of the toth battalion of infantry the commander is said to have informed him that desertions are caused principally by the absurd practice, adopted by the government of pardoning deserters on national holidays and that it is just before these holidays that the greater part of desertions take place.

—We hear that Mr. and Mrs. Seeger arrived in Rio Grande on the 25th inst. and will probably remain in that state some three or four weeks. They have thus far greatly enjoyed their trip through southern Brazil, and are delighted with the reception they have received everywhere. We infer from this that we may expect Consul Seeger to return here about the end of June.

—The deaths that took place during the month of April in the Federal Capital were 1,388 of which 44 died of pernicions fever, 98 of yellow fever, 22 of beriberi, 29 of small pox and 1,195 from other causes. As compared with the death rate for the month of March, these figures show a great improvement in the health of the city as there were 936 fewer deaths from all causes and too less deaths from yellow fever, 47 less from pernicious fever, but there were three more cases of beriberi and 9 more of small pox. We fear that small pox is on the increase in our midst, as there were 26 deaths from the loathsome disease during the first three weeks of May.

—It is now said that President Errazuriz is coming to Rio, but fortunately not this year. It is said that he will come next year during the commemoration festivities.

—We have heard with pleasure that the committee of the British Subscription Library has renewed the lease of the premises in Rua Gonçalves Dias for another three years.

—It is easy to understand why Deputy Nilo Pecunhe claims for the government the right to interfere in elections. He wishes Campos Salles and Alberto Torres to reelect him to congress in October.

—Last week the São Paulo deputation in congress was able to show Em absentees at one time. Not much interest in esswing the republics in that exhibit, surely! When will congress recognize the necessity of paying congressmen only for actual attendance?

—The Diario Papalar of S. Mr. Taylor is as well known to the members of our community as the Sugarloaf itself, and a feeling of anxiety was general when it was known some months back that he was ill. The illness happily proved only a slight and temporary indisposition, and he is again in his usual robust health. We hear that Mr. Taylor is likely to be back again with us in about four or five months time, when we hope he will be set up for many years to come by the fresh breezes of his native air. We heartily wish him a pleasant time at home, and a speedy return.

This match took place at the learahy ground on the 21st inst, and we regret we did not receive the score in time for publication in our last issue, as it only arrived when the paper was on the press. The game was a good one throughout and resulted in a victory for the Club by 3 runs. The fielding throughout was indifferent and some easy catches were badly missed. Youle at point did some admirable work for his side and seemed to be asft as a fiddle. For the Association, Routh made top score with 26, his cutting on the off side being conspicuously good; and Ginus who played steadily for his 18, afterwards took 5 wickets for 27 runs. For the Bank, Ridgway was in splendid trim with both bat and ball, making 35 runs for his side and taking 6 wickets for 15 runs, performing the hat trick with his last three balls. Hargreaves, too, did well on the same side with a serviceable 20, and caught Routh spendidly off a smart cut in the slips. The score is as follows:

#### Business Notes

BUSINESS NOTES

—Among the imports at Genoa from Brazil in the last quarter of 1898 were 600 pine-apples from Perna mbuco.

—The government has authorized the Rio de Janeiro Harbour and Dock Company Limited to transact business in Brazil.

—At Pernambuco the Associação Commercial has called a general meeting of its members for the purpose of protesting against burdensome taxes.

—A coffee plantation near Campinas, São Paulo, said to have been valued at 130,0005, was sold at auction the other day for 13,0005, that is a better illustration of the situation than any we can find in the official reports.

—The first shipments of the Rubber Estates of Pará reached England in the beginning of this month and were disposed of within three days after arrival. The fine rubber realised 4s. id, per pound, medium 4 s. per pound, and negronicad 2s. 9 34 depround.

—The contractors who received from the state government of Amazonas the sum of 2,708,0005 in compensation for the annulment of their contract for port improvements at Mandos have quarreled over the division of the money and are now engaged in a lawsuit.

—The Bolivian government has revoked the acts of Minister Paravicini in separato to contested questions relative to boundary customhonses on the Rio Acre. Paravicini in separato to contested questions relative to boundary customhonses on the Rio Acre. Paravicini has been recalled and a new minister appointed, who will propably seek to regulate these questions by an accord between the two countries.

—On the 23rd inst. the president of the representation of business men against the new consumption taxes. The hopelessness of the situation could not be more strongly confirmed.

—During the year 1898 the savings bank (way we group and propenting) of São Paulo received 12,286

firmed. —During the year 1898 the savings bank caliva committee of \$30 Paulo received 12,786 deposits amounting to 4,764.752\$000, and paid out 10,881 withdrawals amounting to 5052,229\$590, showing on excess in withdrawals of 27,477\$590. In 1897 the withdrawals exceeded the entries by 504,513\$675, from which it is seen that the bank lost a total of 781,001\$244. 781.001\$244.

which it is seen that the bank lost a total of 781,9915244.

—The president of the Banco da Republica requests holders of gold bonds of 1868 to call today at 1 o'clock p. m. at the bank for the purpose of conferring with him in regard to the conversion of these bonds. It is reported that he is authorized by the government to extend to the said bonds the provisions of the funding scheme and to pay to bond holders who refuse to accept this offer the sum of 2,2005 for each bond.

—If agriculturists and manufacturers may go to the government for assistance, we see no reason why shoe-makers, and blacksmiths, and grideners, and printers, and stone-masons, etc., may not do the sume. Just now there is precious little work going, and they are all in need of help. Will congress provide so that each and everyone can go to the treasury and get a small loan on easy terms?

—According to the Estado the São Paulo water works will this year yield a revenue of over two thousand contos. For the month of April the gross receipts were \$21.991880,0 and the working expenses 119,236873. But how are the water rates paid, monthly, quarterly, half yearly, or yearly? And has the department no debts, and no administration expenses? If 2,000,000 represents a net surplus, then the rates should be reduced, for government ought not to make a profit on the supply of water?

—According to returns published by the custom-house the official value of imports at

water?

— According to returns published by the custom-house the official value of imports at Rio de Janeiro for the first quarter of the present year was 54,334,7195. The principal countries from which these imports came were the following:

\*\*Great Perishin\*\*

Great Britain	20,637,392\$
Germany	6,641,760\$
France	5,873,358\$
United States	5.191.970\$
Argentina	4,637,530\$
Uruguay	4,043,981\$
Portugal	3,147,928\$
Belgium	1,899,210\$
Italy	1,190,375\$
Spain	474.794\$
Chili	361.492

—A telegram of the 25th inst from Pará says that merchants in that city intend suing the Bolivian representative Paravicini for re-covery of money which he unduly collected from them in payment of duties. The same telegram states that Paravicini is reported to have remitted money to Buenos Aires.

#### FINANCIAL NOTES

— On Saturday the 20th currency auto-da-fé took place at the engine room of the custom-house, the aggregate burned up to that date being 20,000,000\$. We are glad to note that the minister is disposed to keep the fires lighted, and we hear it said that he proposes to burn double this amount before the year closes.

the minister is disposed to keep the fires lighted, and we hear it is aid that he proposes to burn double this amount before the year closes. Bravo!

—We are glad to see that Deputy Augusto Montenegro in framing his bill embodying the government's financial ideas, was not ununindful of a suggestion of The Kio Neres. The guarantee fund, according to this bill, is to be deposited, not in the mational treasury, but in some London banking establishment. Deputy Serzedello in all the zeal of his neo-jacobinism opposes this idea, which he considers derogatory to the character of previous governments of Brazil. Of those, for instance, that unceremoniously made use of the gold deposited in the treasury by banks of issue. —In the comment that we made in our issue of February 28 on Mr. Beaumont's valuable report on Brazilian finance we showed that it contained statements that were misleading on account of being founded on incomplete data. We mentioned, for instance, that readers of that report would be led to suppose that in 1897 the expenditure of the war department had been reduced to 45,166, 2988 and the whole expenditure of the contry to 312,53,8288. We were not able at the time to give figures more approximately correct, for they had not then been made public by the government, which now, however, has at last furnished a statement (still incomplete) showing that the war department spent that year at least \$7,000,000\$ and that the total expenditure was not less than 398,000,0005. The revenue for the year is now stated to have been 310,000,000\$. The testing the statement of the was consequently at least \$8,000,000\$.

#### THE RIO NEWS.

THE RIO NEWS.

This paper is now in its softh year having originally been published as The South American Mail and The British and American Mail. It assumed its present little at the beginning of April, 1879, when it was published three times a month. From a tri-monthly it has been changed to a weekly publication, and from four pages it has been increased to twelve.

As an advertising medium The News occupies an axceptionally advantageous position. It circulates widely throughout Brazil, and a.so in Europe and the United States. Its subscribers are principally business men interested in Brazilian trade, industries and investments. No other periodical, ven with much reger circulation, can offer better inducements to advertisers who seek the attention of these classes. All communications should be addressed to the Editor and Publisher, Caixa do Correio, 258, Rio de Janeiro.

No encommendas of any description will be received at the Company's offices. For passages and information apply to the office of

LAGE IRMÃOS, Rua do Hospicio, 9.
