WEST COAST ITEMS.

-The Chilian minister of foreign affairs is about to leave for Europe.

— A Santiago telegram of the 30th says the illness of President Errazuriz has again become aggravated.

- President Errazuriz will reasume the presidency on the 15th inst. At least so says a recent telegram from Santiago.

— In Peru Dr. Carlos Pierola has been elec-ted president of the chamber of deputies, which has occasioned a ministerial crisis.

— The Chilian government has solicited information from Bolivia in regard to the assassination of the Chilian consul at Oruro.

— A Santiago telegram of the 3rd says that President Errazuriz has postponed his return to Santiago. He was to have returned on Saturday last. — An Ornro telegram of the 2nd says that the Chilian consul there had been assassinated when entering his office. The police are inves-tigating the affair.

Eight officers of the Chilian army have left for Europe for the purpose of studying various military topics. There is always money for such studies.

— Chili is to have a permanent military tribunal, which looks as though civil govern-ment were gradually giving way to brass but-tons and special privileges.

RIVER PLATE ITEMS.

- The Argentine national guard has been called out for extraordinary service in September next.

—Buenos Aires was visited by a hea temporal last week and the lower districts the city were inundated.

— Official advices from Asuncion, Paraguay, state that after the first cases of bubonic pest recently announced, no others appeared until the 1st first, when one new cases was found.

... The Montevideo British Hospital report for June is as follows: Under treatment June 1st, 11; admitted during the month 18; dis-charged during the month 10; died 1; remaining June 30, 18

— At the invitation of the British commission Mr. Barrington and other members of the diplomatic corps had breakfast yesterday on board the «Sussex» which carries over too horses to South Africa — B. A. Herald, July 25.

July 25.

The Buenos Aires Herald of July 25th says:—aThe foreign merchants in Li Plata have decided to take part in the municipal elections. They will not be able to effect much reform unless they are able to get the foreign workman to vote in full strength.»

oreign workman to vote in full strength.»

—The London board of the London and River Plate Bank have made a present of £200 stg, to Mr. Ceferino Domingo, the keensighted receiving cashier of the bunk in Buenos Aires, who was the first to discover the recent \$500 note forgry, thereby saving his own bank and several others from a heavy loss.—Montevideo Times.

B. A. Hernat, july 25.

— Dr. Burmeister has published his report on the suitability of Puerto Deseado for the site of a town. The land round there can support toos sheep to the league. Only the sheltered river bottoms are suitable for agriculture. With the shrimp fisheries developed and a rapid line of steamers to Buenos Aires the place would thrive. The north side of the larbor would be the best site for a town and port.—B. A. Hernid.

the harbor would be the best site for a town and port.—B. A. Herald.

— Judging from certain references in the telegrams from both Buenos Aires, and Rio Janeiro. negotiations are on foot between the Argentine and Brazilian authorities for the general suppression of quarantines which of late lave grown into such a serious plagne to the River Plate, and the substitution of more modern and less prejudicial prophylatic measures. In fact, in Buenos Aires the feeling against quarantines has been growing for some time past, and the campaign against them. commenced by the English papers, has been vigorously taken up by the native press, which, in this matter has shown more enlightenment than the native Montevideo papers. This is certainly good news, and the proposed reform cannot take place too soon. We do not know whether the health authorities here have been consulted in the matter, but that is of little importance, for whatever arrangement is made, they can only resist at the expense of cutting themselves off with communication, social and commercial, on both sides, and, unreasonable as they are on the subject of quarantines, they will hardly dare to go to that length; or, if they did, the matter would soon be settled by turning them out of office and placing more sensible men in their place. Anyhow, there is the pleasing prospect that before long we will have seen the last of the revealed of times, July 25.

—For the sake of the Argentine army's honor, it is very much to be regretted that high officials should within recent times have become conspicuous as misdemeanants. Pirst we have had Colonel Perez seriously implicated in the great note forgery case: then we have Colonel Mallo guilty of such flygrant offences against justice that a court martial cannot bring itself to convict his slayer: and this week we have Colonel Fretes arrested on a charge of making a trade in stolen army stores. The high position of these men ought to cause their crimes to be regarded with special detestation; but the tone of the newspapers is such as to imply that the incidents are to be regarded as misfortunes rather than crimes. So long as this is the case, the fair name of the army must suffer; and it should be the business of officers themselves to see that justice is done, and that every effort is made to weed out offenders of any kind from their ranks. —Review, Buenos Aires.

—The Buenos Aires Herald credits the

their ranks.—Review, Buenos Aires.

—The Buenos Aires Herald credits the following to the Rosario papers, though it appeared in Tid Bils some time ago:—The Rosario press tells the following tale which does not seem at all unlikely. A thief at seven o'clock entered a house occupied by a well known musical family in that city. Just so he was entering the music room he heard a noise and slipped behind a curtain. The eldest daughter of the house come in to practice singing. She kept it up for an hour. Son after the second daughter came and sang, or tried to, for another hour. At nine the eldest son came and practiced on the flate till ten. At ten the other son came with a professor and land a violin lesson till eleven when the whole family marched in and began a classical symphony on plane, violin, flate and cello. This was too much for the thief who came out of his hiding place and sid affor the love of God send for the police and have me taken away. At the request of the family the police hushed up the case.

—According to telegrams from Buenos Aires,

taken away." At the request of the family the police hushed up the case.

—According to telegrams from Buenos Aires, the Paraguayan authorities have put such obstacles in the way of the establishment of disinfecting stations, that the idea has been abandoned, and consequently the quarantines which were recently declared will be continued indefinitely. Paraguay has also gone further, and adopted reprisisl against Argentina by ordaining disinfection of all vessels from Argentina, on the pretence that they bring infection with them. All this is supremely silly. Just because the various health authorities disagree between each other, mainly on account of petty professional jealousy, the whole trade and river shipping traffic of the Plate has to suffer, and an antiquated and peraidious quarantine system is prolonged. This only proves once more how very unfit the health authorities in this part of the world are to exercise the grave responsibilities entrusted to them. And the worst of it is that these quarantines punish the country that declares them far more than they do the country against which they are declared. For this reason we say that the quarantine plegue is the worst of all the plagues known in the Plate.—Montevideo Times, July 27.

—The private life of a nation is broadly speaking represented in the most of all the plagues known in the papels in propagation of the plate in the country plate.—Montevideo Times, July 27.

reason we say that the quarantine plegue is the worst of all the plagues known in the Plate.—Montevideo Times, July 27.

—The private life of a nation is broadly speaking represented in its public life; private morality in public morality; individual integrity in the national sense of honor. We should always bear this is mind. It will more forcibly bring home to us the necessity of our social as well as political regeneration. When we hear of robberies of war material or war stores; peculation here and there in the public administration; official denunciation of wholesale public fraud as a factor in the shrinkage of national revenue; and when we see each recurring scandal become; for a moment a journalistic sensition to be quickly dropped as no longer of public interest; it would be well for us to reflect that, fundamentally, the causes of this decadence of public morality are the same as those which have multiplied our divorce cases, increased the illegitimate birth rate, and made possible the dire record of our criminal courts. We can only mend our disgrace by ending it. We must begin over again. Freet all the monuments you please to Sarmiento: but bury his godless system of education and give the country a chance to rechristianize. We are mainly pagans mow—but without pagan virtues. Until we get back some sound moral principle as the basis of our action and recant from the religion of the main chance, our ethics shall reek. Our life is poisoned at its source: our youth is blighted in its flower. Congress drones pedantically over a sanitation law for infested live-stock; but why not pass a ferocious law dealing with the moral sanitation of our imports from Europe, human or mercantile? Look at the literature that is so freely offered for sale here and so largely read by the youth of the country without let or infested live-stock; but why not pass a ferocious law dealing with the moral sanitation of pur imports from Europe, human or mercantile? Look at the literature that is so freely offered for sale here and

One of our London exchanges showed a very marked weakness in American geography lately. In giving the telegraphic news of an electric transway accident at Tacouna, the news editor headed the item with "Trolley Car Wreck — Near New York — 35 killed 18 Injured." As Tacoma is on the Pacific coast in the northwestern corner of the United States and over 3,000 miles from New York, the London editor's idea of «nearness» will create a smile.

From the New York Times, June 21 THE CHINESE CIVILIZATION. RICHARD BRINSLEY SHERIDAN SAYS IT IS NOT ALL BAD.

«One of the reasons why the Chinese object to conversion by missionaries is because they have already a pretty good religion of their own, said Richard Brinsley Sheridan, who is at the Hotel Kensington on his way home to England, after a fitteen months' stay in Pekin and Tien Tsin. «Probably more myths have been circulated about China than about all other countries nut torether, and some day. been circulated about China than about all other countries put together, and some day, when the powers shall have thrown open the empire, we all shall be surprised to find the Chinese a pretty decent lot, suspicions of foreigners only because they fear the disruption of their own country. It is true their modes of punishment and their manner of administering justice seem to our Western minds barbarous and brutal; still, with the French Revolution at our backs and the Spanish bullfights before our faces, it is more satisfactory for uso to to judge Chinamen from our own standards of mercy, but to take them as they are, a strange people from whom we Westerners have much to learn morally and otherwise.

"To begin with their religion: a large munber of Chinese are Budthists. Buddha was born 653 B. C. Chinese Buddhists embraces a trinity known as the Three Precious Ones, namely, Buddha, the past; Dharma, the present and the Lord, and Lenga, the future and the church or the priesthood. The moral code of the religion contains ten prohibitions—killing, stealing, adultery, lying, selling wine, speaking faise of others, self-praise and backbiting, parsimony and scoffing, uncorrected anger, and reviling the Three Precious Ones. "The Buddhist, thurch in Thibet has its pope, its catdinals, its bishops, priests, and nunseacily as has the Roman Catholic Church. And more, it has infant baptism, confirmation, masses for the dead, rosaries, chaplets, candles, sacred water, and processions.

"The Buddhist Church in Thibet has its pope, its catdinals, its bishops, priests, and nunseacily as has the Roman Catholic Church. And more, it has infant baptism, confirmation, masses for the dead, rosaries, chaplets, candles, sacred water, and processions.

"The teachings of Buddha were reduced to writing 93 B. C. The entire canon of the faith was compiled in A. D. Joo. In this Buddha is described as coming from leaven, being born of a virgin, welcomed by angels, received by an old saint, presented in a temple, baptized with water, and later

execution was ordered by the Viceroy of Oning-Turg

"The seven first men were executed neatly and well, but when the executioner came to the deposed Mandarin, he struggled and declined to put forth his neck, wildly vociferating that he was innocent and had been unjustly accussed and condemned. The executioner caught his piguil and dragged his head forward from the body, with the result that the head was severed only after many blows had been struck. The head and body were terribly mutilated. When the head finally fell the mouth opened and closed, as if still trying to articulate the words. Injustice, injustice,

maily ten the mouth opened and closed, as if still trying to articulate the words 'Injustice,' a The body remained kneeling and the arms worked frantically in protest for some time till knocked over. The spectators then ran with bread and other soft foolstuffs which they dipped into the blood and ate, the superstition being that this man had died a hero and that the blood of a brave man would give courage to those tasting it.

"Among the favorite palace deaths is stoning. The victim is stretched out on his back, arms and legs extended, and a man sits on each of the limbs. The executioner appears with a lunge stone. If the victim has the money to pay for a speedy death his head is crushed at once. Otherwise the executioner may torture him at will, administering blows wherever he pleases until the victim dies of pain and loss of blood.

"The most dreadful punishment in the

him at will, administering blows wherever he pleases until the victim dies of pain and loss of blood.

*The most dreadful punishment in the Chinese criminal code is the Ling-Ch'i, which means death in a thousand pieces, and which is inflicted on men or women who marder their parents. The condemned man is placed on his back, arms and legs extended, and fettered to pegs in the ground. With a knife the executioner hacks off the flesh at the eyebrows, the cheeks, the nose, the ears, the breasts, the hips, the thighs, and the caives, and then the hands are cut off and the feet and the arms and the legs. Meanwhile the body is being hacked with a knife by another operator, who skillfully avoids vital spots, finally, when the victim is almost dead from loss of blood, with a stab in the pit of the stomach and a single sword blow at the neck he is finished.

*Compared to our own views on decapitation a Chinaman thinks nothing of the operation. A rich man can at any time purchase a substitute who will sell his life instead for the benefit of his family. This perhaps accounts for why such frightful cruelties are necessary to make a death penalty sufficiently impressive.

*But if nothing else can be taught us by the Chinese, their reverence for their parents is a lesson wherein they far outrank us. Even the famous Cheng Tan-Tae owes his entire success to the command of a dying mother to her son, and the son was none other than our old friend Li-Hung Chang.

RUSSIA AND JAPAN.

RUSSIA AND JAPAN.

Information from Japan is never quite accurate, the rulers of the empire religiously guarding state secrets, but all that arrives points to a conflict which at best can only be postponed. The Japanese are not prepared to be shut up in their islands, and know that if the Russians dominate Korea they will be shut up. On the other hand, the Russians are quite aware that unless they dominate Korea, Manchuri.—which they are now piercing with railways, and are absolutely determined to acquire—will never be a safe possession, and never give them the position tiety seek in the north Pacific. The two ambitions clash, and as neither power is certain that the other is the stronger, that means war. The only question is the time, and it is by no means certain that the time will be very long. Russia would like to wait until her Transsiberian line is complete, but that is the very reason why

Japan will avoid waiting, and may regard a quarrel between Russia and China as her best opportunity. Her preparations are very nearly complete. Her new fleet is ready, and her army, which observers reckon at half a million of men, is as well prepared as it is likely to become. What the real worth of that army is no European accurately knows. It is numerous, it is composed of brave men, and it is sure to be well supplied, but whether it has the energy and persistence necessary for a successful conflict with a European state is still uncertain.

therefy and persistency of the war with China is an unsafe guide, for China was hopelessly disorganized, and her army worm-eaten with corruption, while the Japanese had probably been preparing for years. The statesmen of Tokio may find that there is some quality in Europeans with which their own men are unable to contend, and may learn too late the value of Marshal von Moltke's saying that discipline can only be fully tested by defeat. Still, the Japanese themselves have no doubts; and it is by what observers think of it, that national policy is directed. If the Mikado's advisers think they have a good prospect of defeating Russia, they will infallibly try to defeat her; and as their enemy is daily gathering strength, the experiment will probably be tried very soon.

AREOUIPA.

Arequipa is a quaint and queer old town, and has the reputation of being the most religious city in the world. Freemasons are not allowed to live there. Protestants are ostracized, and the people devote a great part of their time to religious ceremonies. Again, it is equally famous for the purity of its atmosphere. The air is said to be clearer and the sky bluer than anywhere else. Being surrounded by desert, every breeze that rea hes Arequipa is supped of moisture. Nothing putrefies: decay is arrested in animate as well as inanimate life, so that everything dead dries up and blows away.

Arequipa has been celebrated, too, for, several centuries as a seat of learning and a centre of literary life. The most influential citizens are the monks. It has produced mury famous ecclesisatical scholars and statesmen, and, although its university is not so much sought by students as it used to be, many young men are sent there from all parts of South America to be educated.

Another source of satisfaction in that the old Spanish families have kept their blood pureand can trace their pedigree back further, it is claimed, than those of any other part of South America. Therefore they are proud—very proud—and exclusive. But pure air and pure blood are about all they have to brag of, for in the preservation of their diguity and the contemplation of their virtues they have little time to devote to their other pursuits, and poverty prevails to a most painful degree among some of the oldest and most aristocratic families. The women are beautiful; the men are reserved and austere. Progress and modern ideas are looked upon as an evidence of vulgarity, and the fact that Arequipa is so slow and old-fashioned is a matter of congratuation rather than regret.

(This is doublful, asit would show the Emperor to be as savage as the Chinese themselves.) Another version credits him with saying: "The Chinese are giving us no quarter." These phrases are causing much discussion in the German press.

JULY 30.— A letter from the German legation in Pekin dated 21st inst. and received at Tientsin says the attacks on the legations ended on the 16th inst. and that the body of Baron von Ketteler had been buried. The letter terminated by asking urgent relief.

THE PLAGUE IN AUSTRALIA.

THE PLAGUE IN AUSTRALIA.

Syducy, May 23.—The bubonic plague has now made its unvelcouse appearance in almost every Australian port, but its ravages, so far, have been kept within close limits, thanks to the promptitude with which the necessary precautions were adopted.

In Syducy the greater portion of the city has been quarantined in sections, a close, examination made of every building, all filth and refuse taken away and burned or deposited in the sea, and nuwholesome dwellings mercilessly demolished, the woodwork being destroyed by fire. The whole of the foreshores of Darling Harbor, the innermost portion of Port Jackson, have been resumed by the government, and, if sanctioned by the colonial parliament, the whole of this part of the city will be rebuilt at an expenditure of several millions.

erument, and, it sauctioned by the colonial parliament, the whole of this part of the city will be rebuilt at an expenditure of several millions.

The discovery that the plague was introduced by diseased rats has led to a widely spread crusade against the rodents, hundreds of which are daily destroyed in a large crematorium, the captors being paid from twopence to sixpence per head. It is estimated that over a million rats have been destroyed in this manner throughout the colonies, and it is expected that laws will be passed compelling shipmasters to sign certificates of rat destruction on board their respective vessels before being allowed clean bills of health.

Although the measures adopted with a view tostomping out the plague have naturally had the effect of diminishing external trade-and restricting the number of visitors from over sea, they have in no wise affected the spirits of the colonists in Sydney, Melbourne, and elsewhere. Indeed, but for the prominence given to the subject in the metropolitan journals, a stranger would not suspect that there was anything amiss. The theatres and other places of amusement are crowded nightly; race meetings and other out-door sports are as largely patronized as ever, while of concerts, shows, public meetings, and the like, there is no end.

One remarkable feature of the visitation is that of the hundreds of people who have been quarantined as a precaution after having been in contact with sufferers from the disease, not one has contracted it, although its severity is shown by the heavy proportion of deaths to recoveries.

recoveries.

In Sydney and Melbourne the most unhealthy localities were those inhabited by a population of low-class Europeans and Asiatics, especially Chinese, Malays, and Syrians, But there were other places, from which the Asiatic element was absent, almost as bad.

RIO DE JANEIRO, AUGUST 7th, 1900.

ASIDE from the terrible results of the ASIDE from the terrible results of the lawless assassinations of which the anarchists have been guilty, and for which no punishment can be too swift and stern, there are contributing causes which merit the thoughtful attention of the civilized world. It is futile to say that the crimes are lawless and destructive to organized government, to demand the punishment of the guilty, and then to go no further. We are not dealing with individual acts of criminal passion, but with an organized and deliberate purpose entertained by a very large fraction of the people. It may be that a large proportion of these anarchists are degenerates, but this fact alone shows that we are dealing with a chists are degenerates, but this fact alone shows that we are dealing with a disease rather than with an ordinary crime. That any large proportion of society can be classified as degenerate, implies the existence of physical and moral conditions prejudicial to sound development, and it is a duty as well as good policy to inquire for the causes and correct them. A considerable proportion of degenerates in any nation implies decay. It implies, also, bad government, poverty, distress, suffering, implies decay. It implies, also, bad government, poverty, distress, suffering, and hopelessness. This state of things is really at the bottom of the trouble in Italy. A much valued contemporary, speaking of the moral depravity in Argentina, says it is due to the godless system of education prevailing there, but it is to be feared that he must go further back than that for his cause. No country in the world turns out more priests than Italy, and nowhere else are anarchists and assassins to be found in such numbers. The church is at fault as well as government. Henry else are anarchists and assassins to be found in such numbers. The church is at fault as well as government. Henry Ward Beecher once declared that it was a waste of time to preach the gospel to a man with an empty stomach — and there we have the real solution to the whole difficulty. Neither church, nor law, nor moral appeal can effectively reach men whose steps are hounded by police officials and tax-collectors, whose stomachs are empty, whose bodies are exposed to the inclemencies of the weather, and whose families are dirty, ragged and starving. If they have intelligence and reasoning powers, they can not fail to see the inequalities of a social order which gives abundance to the few while the multitude is suffering for the bare necessities of life. To dwell upon these inequalities, to feel the injustice of a system which condemns the poor to oppression, want, disease, and life-long servitude, while others through the accident of birth or the use of patronage or immoral tricks have more than an abundance, can not fail to make a man a socialist of life. To dwell upon these inequalities, to feel the injustice of a system which condemns the poor to oppression, while others through the accident of birth or the use of patronage or immoral tricks have more than an abundance, can not fail to make a man a socialist

or anarchist. The problem before us is to stop making anarchists in this way. to stop making anarchists in this way. When we succeed, anarchism will die of itself. We must improve the condition of the poor, we must curb the trespasses of the strong and rich, we must restrict the facilities given for the accumulation of great fortunes, we must make justice a real factor in our social. make justice a real factor in our social order and not a bare pretence, we must find work for the unemployed, homes and work for the unemployed, nomes for the homeless, food for the starving, clothes for the naked, education and opportunity for improvement for all. There must be an end to those special privileges which help to widen the gulf between the rich and influential on the between the rich and mutential of the one side, and the struggling poor on the other. We must take off the injust burdens which oppress them. We must do away with great standing armies and the legions of unecessary officials and pensioners which contribute so much to the predicting costs of government. the crushing costs of government. We must make poverty comfortable and respectable. And then, perhaps, the church can find open hearts and open ears to which it can appeal, and the world will begin to grow better instead of worse.

THE DECREASE IN REVENUE.

In our issue of the 10th ult. we published a statement showing that the receipts of the five principal customhouses of Brazil (Rio de Janeiro, Santos, Pará, Bahia and Pernambuco) amounted Para, Bana and Pernambuco) amounted in the 1st half of the present year to 60,294.029\$970, against \$1,987,975\$985 in the first half of 1899.

business, foster odious monopolies, increase the cost of living and the prevailing discontent and contribute to prolong indefinitely the state of anarchy which for over ten years has been retarding the progress of the country. If the temptation offered by this prospect is so attractive as to be irresistible, let congress by all means induce the President to violate his pledge not to increase taxation. Towards President and congress our attitude is that of the man towards his mule when the latter persisted in taking the longer and worse of two roads: if they can stand it, we can. The most dismal howl will be that of those who howl last.

if they can standit, we can. The most dismal howl will be that of those who how last.

Our readers are well aware that we have been no apologist for the blunders and faults of the monarchy, but they will agree with us that we were then comparatively tree of the burdens and vexations which now oppress us. The republic has brought us no more liberty and happiness than we enjoyed then. On the contrary, it has brought us a multitude of restations restrictions on trade, industry and personal liberty, it has brought us a multitude of new taxes, it has enormously increased the costs of living, it has increased our public debt and annual interest charges, it has brought upon us the discredit of repudiation, it has corrupted public life and tampered with the administration of justice, and it is threatening us with ruin through a further accumulation of these bordens. In addition to the import duties and other txes levied upon business and merchandise, we must now put special consumption stemps on the luts we wear, and or our shoes and umbrellas and wilking sticks. The m-dicinal preparations sayins, perfumeries, packed provisions und fubrics we use, are also specially stunned. And now man can not even put a placerd, whether written or printed, outside his door or window, announcing the goods he has to sell or that he has a honse or room to rent, without putting a stamp upon it. Where this vexations system of taxation is to end, no one can conjecture. The phenomenal aprthy of the people and the mercenary silence of the press led us to believe that no protest will be raised until human nature can bear no more, and then the people will rise against it. Little wonder that there are anarchists when governments abuse their opportunities in this manner. A man can not submit tamely to have a policeman and a tax-gatherer always at his heels. He can not be an optimist when his children are destitute and there is no hope for them in the future. Human nature forces bim to resist sometimes, and then the becomes an anarchist. And the and then he becomes an anarchist. And Almighty will forgive him for being one!

LEGISLATIVE NOTES

JULY 21. — Chamber of Deputies. — Deputy Lamartine attacked the fresh beef monopoly at Rio de Janeiro. In two years and a half the contractors he asserted, have made a net profit of 35.000.0005. He offered a motion signed by himself and Deputies Ildefonso Alvim and Antonio Zacarias to inquire whether the government has authorized the importation of Argentine beef cattle without payment of the tax established by law. Deputy Barbosa Lina introduced a bill for guaranteeing the pay of the employes of government railways that are sold, or leased.

JULY 23. — Chamber of Deputies. — After remarks from Deputy Dino Bueno, Deputy Lamartine withdrew his motion to ask for information in regard to the importation of Argentine beef cattle without payment of duty, lly a vote of 117 to 3 the chamber on application of the judge of the 11th district court of the city of Rio de Janeiro granted permission for the trial of Deputy Irineu Machado Deputy Heredia de Sá moved to ask for information in regard to the revenue of the Rio de Janeiro water works.

Provincial Notes

-Expressions of regret and indignation have been made at many places in Brazil for the assassination of King Humbert.
-The Bahia state government has declared void the contract with Diniz & Co. for a second group of usines for the production of cane sugar.

—Notwithstanding the critical condition of the finances of that state, the Bohi el gislature has voted 50,000\$ to a local league against tuberculosis.

—A letter-carrier in Paraná has been dismissed and will be prosecuted for the theft of 2,400¢ recently sent by mail from Curityba to Morretes.

—São Paulo is still paying 400 reis a head for rats; Rio is paying nothing. In Rio the money all goes to the officials, who believe in reis, non verba.

reis, non verba.

—In Petropolis Luiz Ferreira dos Santos has been arrested for passing counterfeit notes. Palse notes of 50\$ (7th estampa) and 200\$ (7th estampa) were found on his person.

—On the 31st ult. the senate of the Bahia state assembly voted to increase the subsidy of senators and deputies from 30\$ to 40\$ and day. It is expected that the deputies will not agree to the increase.

The Paraná state government has established toll-gates on all the roids entering the capital, Curtiybi. The opposition and neutral press is criticising this as vexations and prejudicial to the small farmers of neighboring colonies. Little the mercenary politicians of that state care for this.

—It is stated that the new governor of Amazonas has already effected economies in expenditures of nearly a thousand contos a year. And probably there is still more to be done in the same direction. That's the right kind of economy to make, and we take pleasure in recommending it to the President.
—It is pleasing to note that Sentor Vicente

pleasure in recommending it to the President.—It is pleasing to note that Seniartor Vicente Machado has decided to leave Paraná long enough to come up to Rio after his pay as senator. And yet, congress thinks it is unconstitutional to limit a congressman's pay to his actual attendance! It evidently is not unconstitutional for a politician to draw pay for a service not rendered.

for a service not rendered.

—In S. Paulo Dr. Tavares accused of having, when he was a police delegate, brutally assaulted a mun named Michelotti, has been convicted and sentenced to a fine of 2005, to 9 months' imprisonment and to exclusion from public office for life. The police serjeant who assisted in the assault has been sentenced to 12 months' suspension and three months imprisonment. If abuses of power were more frequently punished, the effect would be very salutary.

S. PAULO FACTS.

S. PAULO FACTS.

Owing to the extensive Italian colony here, the sud news of the assissimation of King Humbert produced a great sensation. Flags covered with crape and flying half-mast have met the eye during the week. Congress adjourned for a day and sent telegrams of condolence to the Italian parliament, the various schools were closed, and many shops pat up their shutters.

The police having concluded their inquiry in connection with the attempt on the Banco Mercantil de Santos, the prisoners have been transferred from the central to the public prison to await their examination before a criminal judge. As the law stands, it seems unlikely that they will be convicted as they were not caught red-handed, and there is no positive proof against them. Probably the authorities mean to detain them, in prison as long as possible, and when there is no further excuse for making them uncomfortable, will suggest that the climate of the Plate is more suitable for them. They would then be shipped off with warnings as to a worse thing happening to them, should they return.

Francis Strawn, whose sudden failure some time ago made no small stir, came up for indicial examination last Friday week. His replies to certain queries were so mastisfactory that the judge committed him to prison. On Monday, however, the bankrupt obtained a writ of habeas corpus and was released. It is unfortunate that when a judge shows himself ready to make an example of a fraudulent bankrupt, that he should not be backed up by his brothers on the bench.

On the last Sunday of July, the Rev. W. B. Morris held in Suntos the 1st of what is intended to be monthly services.

The police made a fresh capture on Sturday evening. Having been informed that an attack was being planned on a shop in Rua Tymbiras, they kept watch from various houses close to. Warned by recent occurrences, the thieves took great precautions. For two hours before commencing open informed that an antack was being planned on a shop in Rua Tymbiras, they kept watch from various houses

—The estimated traffic receipts of the Leopoldina railway for the week ending 28th July were 229,328 in currency, against 505,576\$ in the same week of last year, showing the adarming decrease of 277,248\$ for the week. The exchange rate for the week was 11 3/32 d. against 8 ½ 6. last year, which give sterling equivalents of £ 10,600 this year, against £ 17,150 last, showing a decrease of £ 6,550. The total receipts since 1st January have been £ 283,508 this year, against £ 281,305 last, showing a surplus of £ 2,203. This surplus however promises to disappear in another week, and then the shareholders will have to face the chilling sensation of a steadily increasing deficit. Optimism is a pleasant feeling, but it won't stand such a chill as this many years in succession.

— The bubonic pest is exciting very little interest nowadays, and very little is said about it. Yesterday two alleged fatal cases were reported in this city and both had been without medical advice. Poor people will not have the doctor if they can avoid it. The number of cases under treatment at the plague hospital has been reduced to SS, of which 39 are convalescent.

—In the senate on Thursday there was an important debate. Senator Arthur Rios from Bahia made severe strictures on military affairs. In the course of his remarks he "Il uded to the military murder of Barão de Batoyy in Santa Catharina in 1894 and to the concealment of that murder. He inquired whether had been anything in the form of a trial. No one was able to answer the question.

If such is the conduct of a congress chosen by President Campos Salles, would it not be well to experiment a congress chosen by the people.

—In connection with the statement that of the hundreds of people quarantined at Sydney for having been in contact with persons stricken with bubonic pest, not one had contracted the disease, it should be added that only one of such quarantined persons here, so far as we are advised, has been sent to the lazaretto from the quarantine station. —The form I do Commercio has evidently not recovered from the rage and mortification caused by the failure of its attack on Councillor Ray Barbosa. The resumption of the publication of the Improvast, which is an event of national importance, is barely mentioned by the Fornal in an item of three lines. It is to be regretted that a narrow filiber I and short-sighted policy is destroying the utility of a journal that once had a powerful influence. The present conduct of the fornal is doubtless very disappointing to the friends whose timely assistance rescued it from the clutches of Rangel Pestana and Marshal Floriano Peisoto.
—Benjamin Constant Filho and Manoel Tavares da Costa Miranda, accused of the barbarous murder of Col. Gentil de Castro in March, 1867, have been dismissed from their clerkships by the prefect of the Federal District, who apparently considers them guilty of the crime with which they were charged. These two men, accused of a hideous crime perpetrated in a most stroctous manner, were tried and, in spite of the strong evidence against them, were acquitted. If the act that dismisses them from their places and leaves a stigna on their names is just, then it must be admitted that the administration of justice in criminal courts is wofully defective.

—The good people of Buenos Aires, not to be decrived of their share in the sensational

criminal courts is wofully defective.

—The good people of Buenos Aires, not to be deprived of their share in the sensational death of the King of Italy, at once put in a claim that Bressi had been a resident of that city. We should not be at all surprised, nor that he had profited by the low value placed on human life in that progressive city. But we are surprised at the claim that the assassin had been in Rio de Janeiro. What lustre can this cold-blooded assussin shed upon the sordid, tax-grubbing life of this capital? And what inspiration could be get from the long-suffering, and apathy, and timidity which characterize the people of this country? If Bressi ever was here he went away and forgot it. forgot it.

Business Notes

—The representative of a Belgian syndicate is said to be in Ouro Preto negotiating for the purchase of the Tassara gold mine.

—A Belgian company has begun mining manganese at Tripulty, an outlying suburb of Ouro Preto, Minas Geraes. The manganese mines of that state promise to be one of its principal sources of wealth in the near future.

principal sources of wealth in the near future.

The minister of marine has consented to the use of a part of the Ilha das Cobras shore by the Riode Janeiro Harbour and Dock Comson's Limited, and the director of hydraulic works has been instructed to indicate what part of this shore can be devoted to the company's uses.

The searchir of small rates is still fall in

pany's uses.

—The scarcity of small notes is still felt in business, and will continue to be felt until the caixa da amortização obliges its clerks to give out small notes when asked for. As we have stated before, they prefer to give out large notes, to save themselves the trouble of counting, and the result is that we have a surfeit of large notes and a scarcity of small ones.

ones.

—Mellin's Food, Limited (the company, not the food) declared a dividend of 14 per cent for last year and Mr. Crashley is prepared to pay all shareholders in food and biscuits as fast as they can present their documents. It should be remembered that a 14 per cent dividend is only a small part of the benefit which Mellin's Food Limited confers upon the world.

upon the world.

—Last month the gold cheques received at the custom-house of this port aggregated by the German Bank, 188,269492 by the London and Brazilian Bank, 188,269492 by the London and Brazilian Bank, 188,2915303 by the British Bank, 94,410\$174 by the London and River Plate Bank, 75,423\$480 by the Banco da Republica, 37,551\$373 by the French Bank and 15,213\$522 by the Banco Nacional. This is one of the *straws* which show where business men receive accommodation in times of emergency.

—The shipments of wine from Lisbon, Madeira, Figueira and St. Michael's to Brazil in the last three years have been as follows:

1897. 12,009,123 litres 1898. 12,685,950 « 1899. 15,999,210 «

The increase in 1899 was due to large shipments made for the purpose of escaping the heavier duties that went into force at the beginning of 1900.

beginning of 1900.

Here is a sample instance of the working of the consumption tax legislation:—For the infraction of some provision of the match tax regulations Antonio Rodrigues de Carvalho was fined 1,0004. He did not pay the fine and the national treasury brought a suit against him. A judgment was obtained and some of his property was seized. This property was sold for 5165803, which was probably much less than its value. But the costs amounted to 425502, which deducted from 3165803 leaves 915791. How much of this sum went to the national treasury and how much to the informer we are mable to say; but what seem to us unquestionable is that as long as such odious legislation is in force the discontent of taxpayers will continue.

—It is somewhat of a mystery to us that

such odious legislation is in force the discontent of taxpayers will continue.

—It is somewhat of a mystery to us that more attention is not paid to the rubber industry. The consumption is great, and growing; the production is easy, and is at present largely conducted in a pitiably wasteful fashion and in countries recking with fever, though leadthier districts are available. The latest consular report from Batha talks most enticingly of two varieties of rubber—the mangabeira and the manicoba—which growwell in Boha, and in which our consul evidently thinks there is a lot of money. The mangabeira plant yields a most delicious fruit as well as rubber milk, but requires from eight to ten years growth before it reaches the yielding stage. The manicoba tree, however, yields milk in three years, and there is at least one planter in Bahia who is cultivating these trees upon a big scale. Surely there should be a good opening for other capitalists? But an effort should be made to induce the government to find some other way of raising revenue than burdening industry with heavy export daties.—Financial News, July 14.

Financial Notes

—The Brazilian loan of 1889 was quoted at 64 ½ in London on Saturday.

64 2 in London on Saturday.
—The balance in the state treasury of São Paulo on the 31st ult, is reported to have been 5.559.8165000.
—Minister Murtinho has at last published the introduction to his report. Perhaps the report itself will be published in the course of time.

—The new governor of Amazonas has an-nulled the act of his predecessor relative to a public loan for that state. Perhaps he cannot find an excuse for so unwarranted an act.

public loan for that state. Perhaps he cannot find an excusse for so unwarranted an act.

—Officious journals pretend to see an improvement in the credit of the country; but it must he confessed that, if there has been any improvement, it is very slight. On the 2nd inst. Brazilian bonds of 1889 were quoted in London at 63 ½ against 63 on Aug. 1, 1899.

—It is said the minister of finance is preparing to resume the burning of currency, and that next Saturday will witness the destruction of 1,000,000\$ of it. We are glad enough to see the dirty stuff go, but we should like better to know that it is taken from surplus revenues and not from the money due creditors.

—a The time fixed in the funding scheme for the suspension of cash payments has been extended, —aTo what date?—aTo the date of the issue of the forthcoming report of the minister of finance and to that of the conclusion of the conspiracy case, a "Oll I see? Creditors may make up their minds to receive funding bonds during the rest of their lives."

—A Fortaleza telegram of the 1st says the

ed to \$34,000\$.

—Vesterday exchange opened at 10 ¾ d., fell to 10 ¾ d., and then went up to 10 ⅓ d. How in the world can a safe business be carried on under such conditions? I is it not time for the banks to give up this wretched game and let exchange find its own level? If not, then congress will do well to change the system and let us have a gold ring for the gambler and a real exchange rate for the business man.

gambler and a real exchange rate for the business man.

— They say that Murtinho is in favor of revising the constitution.»—He can't well avoid it. Murtinho, you see, wishes to be the next President and so does Julio de Castilhos. Murtinho's consumption taxes are unconstitutional and Castilhos, who has been informed of this, is making his henchmen in congress say so. We all know, of course, that every president habitually violates the constitution whenever he feels like it.—»—aAnd he nearly always feels like it.—»—aCertainly. But Murtinho's enemies pretend to be unaware of this and show the whites of their eyes in holy horror at the bare idea of the presidency's being occupied by a violator of the constitution. Consequently Murtinho has no chance of being elected unless the constitution is revised and consumption taxes made constitutional before the next presidential election.

— If the minister of finance had nothing to do with the recent abullings of exchange, why was the bank manager who worked the oracle in daily communication with him? Is it likely that a bank manager would go into a speculation of this character on his own responsibility, and at the same time pay visits to Rua do Sacramento every day and at all kinds of hours? The minister's apologist should be a little more cautious in his assertious.

Tropon is pure Albumen; 'tt offers this most important constituent of our daily food in highly concentrated form. The mutritive value of one pound of Trepon equals that of 5 pounds of prime beef or 80-90 eggs.

Tropon is almost cuttrely assimilated by the system and transformed into blood and muscles, a fact which is of highest importance in those cases where the digestive canal has to be cared for in mechanical respects. (Dysetery, Diseases of the intestines, etc.)

Tropon is very easily digested; it represents a food which without overstraining even the weakest stomach offers a large amount of nutriment. (For Children, disorders and diseases of the Stomach, Kidneys and the Nervous System, Liver complaints, Convaiscents, etc.)

Tropon—by replacing the lost Albumen—enables us to arrest the decline of strength caused by fever and infectious diseases. (Ve-

aused by fever and infectious diseases. low Fever, Blackwater Fever, Malaria, Tuber culosis, Typhus, etc.)

Tropon is a fasteless and odorless powder.
It can be mixed or baked or cooked with other
food or else can be taken in drinks.

Eminent medical authorities are constantly

calling attention to the merits of Tropon. Sold by all Chemists throughout Brazil
